**CONTAINS INGREDIENTS LISTED BELOW SATURATED IN SYNTHETIC ABSORBENT CLOTH ENSCAPULATED IN CHEMICAL AND VAPOUR RESISTANT CONTAINERS WITH AN ADDITIONAL CHEMICAL RESISTANT VAPOUR BARRIER EXTERIOR.**

| ACTIVE INGREDIENT: Copper naphthenate* | 17.80 |
| INERT INGREDIENTS** | 82.20 |
| TOTAL | 100% |

* 2% copper as metal
** Contains Petroleum Distillates

Net Contents: 9.5 oz. each 9" pouch
Net Contents: 6.8 oz. each 6" pouch

**DIRECTIONS FOR USE:**

It is a violation of Federal Law to use this product in a manner inconsistent with its labelling.

**FOR EXTERIOR USE ONLY**

**CONTINUOUS ROLL [52.5 ft.]**

Cobra™ Wrap SD containing copper naphthenate is intended for use only on poles, posts and pilings as a wood preservative treatment. Cobra™ Wrap SD containing copper naphthenate provides protection against moisture, fungal rot and termite damage. This copper naphthenate wood preservative and insecticide will preserve, protect and seal wood surfaces that will be in contact with soil or concrete. Depending upon climatic conditions, species of wood to which applied, moisture and humidity, treatment extends service life several years.

**PREPARATION AND APPLICATION**

Wood should be clean, dry, well seasoned and free of bark. When using Cobra™ Wrap SD as a groundline treatment encircle around wood to allow top of wrap to extend 2" (5cm) above groundline.

Protect eyes and skin from contact.

Wire brush area 3" (7.5cm) above groundline and approximately 18" (36cm) below groundline removing dirt and decayed material.

Cut off sufficient length of Cobra™ Wrap leaving 2" - 6" (5cm - 15cm) of wrap to serve as overlap. Cut open pouches by slicing diagonal lines every 3 to 4 inches through the inner plastic layer exposing the saturated pads. The overlap portion leaves a sufficient tail attached to the outermost edge forcing preservative to move back into wood zone for penetration.

Wrap proper length Cobra™ Wrap around the pole with saturated pad against the pole and staple or tack firmly in place. Staple short side of the backing first and overlap with longer edge. Allow wrap to extend 2" (5cm) above groundline.

Backfill excavation, tamping firmly.

---

**PHYSICAL OR CHEMICAL HAZARDS**

**COMBUSTIBLE:** Do not use, pour, spill or store near heat or open flame. Use only with adequate ventilation.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Store at temperatures between 64°F (18°C) and 120°F (49°C). DO NOT STORE opened pouches.

**PESTICIDE DISPOSAL:** If product has been spilled, spread absorbent, pick up and place in containers. Dispose of according to state and local regulations.

**CONTAINER DISPOSAL:** Wrap any cut portion of product in paper and put into trash collection.
