DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ ENTIRE LABEL. USE ONLY IN ACCORDANCE WITH LABEL INSTRUCTIONS

HOW TO USE

Important: Eliminator® Weed & Grass Killer Super Concentrate is an all-purpose weed and grass killer which will kill almost all plants contacted. If necessary, use cardboard or plastic to shield desirable plants. If plants are accidentally sprayed, rinse off immediately with water. Spray when air is calm. Spray to evenly wet the weed.

To apply this product use:
- Plastic, aluminum or stainless steel tank sprayer
- Hose-end sprayer recommended for weed killers
- Hand-trigger sprayer
Use the following table to determine the amount of Eliminator Weed & Grass Killer Super Concentrate you need. Close cap tightly after use.

1 teaspoon = (1 tsp)  
1 Tbsp = 1 Tablespoon (Tbsp) = 3 tsp  
1 fl oz = 2 Tbsp
Do not use or store solutions of this product in galvanized steel or unlined steel spray tanks, or apply through any type of irrigation system or with a sprinkler cone. Rinse sprayer and flush all sprayer components with water 3 times after use. Spray rinse water on bare soil or gravel. After very thorough cleaning, sprayer may be reused to apply other products.

For best results after mixing with water, use within 2 weeks.

**WHEN TO USE**

Use systemic weeds are actively growing. Most treated weeds usually show initial symptoms within 1 week and complete kill in 1 to 2 weeks. Larger, more established weeds may take up to 4 weeks to complete kill. For best results, apply on warm sunny day when daytime temperature is above 60°F and no rainfall is forecast for 24 hours. Warm, sunny weather will speed up weed control. Apply only when air is calm. Reapply if rain is within 2 hours after application. Rerain or watering 2 hours after application will not wash away effectiveness. Hard-to-control weeds such as black mustard may require a repeat application if they regrow. NOT recommended for spot weed control in lawns since Eliminator Weed & Grass Killer Super Concentrate is fatal to all green plants, including lawn grass.

**WHEN TO USE**

For general weed control: Use along fences, paths, sidewalks and driveways, around trees, shrubs, and ornamental plantings and lower beds, around buildings, and in brick and gravel walkways. Use to kill and edge landscape areas. Do NOT use for spot weed control in lawns since Eliminator Weed & Grass Killer Super Concentrate is fatal to all green plants, including lawn grass.
For Spot Spraying: Use on actively growing weeds in and around flower beds, ornamental trees, fruit and nut trees, grapevines, shrubs, lawns, driveways and walkways. Spray when air is calm.

Make sure Eliminator® Weed & Grass Killer Super Concentrate does not contact the leaves, green shoots, or exposed roots of plants you don’t want to kill. If necessary, use cardboard or plastic to shield plants. Eliminator® Weed & Grass Killer Super Concentrate will not move into or on the soil to harm treated plants. If Eliminator® Weed & Grass Killer Super Concentrate is used to control weeds around lawns or on trees or grapevines, allow 21 days before eating the fruit or roots.

For Landscaping: Use to prepare areas for planting of ornamentals, trees, shrubs, densely landscaped, rock Gardens, flower beds or smaller plantings. Treated areas can be replanted 4 days after treatment.

For Lawn Renovation:
- Use Eliminator® Weed & Grass Killer Super Concentrate to kill existing weeds and grasses including the old lawn.
- For best results, apply in Spring or Fall, when daytime temperatures are at least 60°F.
- Under dry conditions, water every other day for a week before using Eliminator® Weed & Grass Killer Super Concentrate.
- Do not mow for 7 days before or after treatment.
- After 7 days, prepare the soil for planting by raking or rototilling the lawn. Fertilize and remove broadleaf trash or debris.
- Mix in starter fertilizer and other amendments, if needed. Level the soil.
- Apply seed according to directions on seed package, or install sod. Grass seed must have a good contact with soil to germinate and grow.
- Keep area moist for 2 weeks to establish new lawn, then water as needed.
For Brush Control: Use when bush is green and growing. If plants are taller than 3 feet, cut back and spray immediately. Brush sprayed in the fall may not be fully controlled until the following season.

Hard-to-control species such as Blackberry, Kudzu, or Poison Oak may require a second application.

**RE-SEEDING AND REPLANTING IN SPRAYED AREAS**

**Wait To Replant**
- All ornamental flowers, trees, and shrubs may be planted 1 day after application.
- The following flowers may be planted 1 day after application:
  - Blackberry, Blueberry, Bayberry, Cranberry, Curant, Dewberry, Elderberry, Gooseberry, Huckleberry, Loganberry, Blackberry, and Raspberry.
- The following trees, vegetables, and herbs may be planted 1 day after application:
WEEDS CONTROLLED INCLUDE: Bahiagrass, Sawsedgegrass, Bermudagrass, CanadaThrift, Chickweed, Common Ragweed, Crabgrass, Dandelion, Fescue, Field Browser, Field Sandbur, Foxtail, Johnsongrass, Kentucky Bluegrass, Knots, Lamb'squarter, Orchardgrass, Perennial Ryegrass, Poison Ivy, Poison Oak, Quackgrass, Red Clover, Sheepsperum, Smooth Brakelace, SunChoke, White Clover, and Yellow Nutsedge.
