chlorinating granules
Quick Dissolving • Granular Stabilized Chlorinator

KEEP OUT OF REACH OF CHILDREN
DANGER

FIRST AID: Remove the product container or label with you when calling a poison control center or doctor, or going for treatment.
If IN EYES: Hold eye open and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If ON SKIN OR CLOTHING: Take all contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If INHALED: Move person away to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if necessary. Call a poison control center or doctor for further treatment advice.
IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN: Probable mucosal damage may contaminate the use of gastric lavage.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS. DANGER: Corrosive: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly after handling. Remove contaminated clothing and wash before reuse.
ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.
PHYSICAL OR CHEMICAL HAZARDS: Strong oxidizing agent. Do not mix with other chemicals. Mix only with water. Never add water to your pool. Always add product to large quantities of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Combustion with materials, organic matter or other substances may cause a fire or explosion. If allowed to start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposion do not reseal container. If possible, isolate container in open air or well ventilated area. Food area with large volumes of water.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.

DIRECTIONS FOR USE:
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. Read entire label and use strictly in accordance with precautionary statements and directions.

FOR SWIMMING POOL DISINFECTANT: When used as directed, this product is effective as a swimming pool water disinfecting agent.
Ensure all pool equipment is working properly. Backwash the filter system following manufacturer’s directions. Adjust pH to between 7.2 - 7.6. Add stabilizer to establish a minimum level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual.
Check for metals. Before using this product, add scale and inhibitor to prevent staining of pool surface due to metals. When using other products as outlined in the directions for this product, always follow directions on those products.
SUPERSANITIZATION: Supersanitization is necessary at the beginning of the bathing season, whenever the pool is filtered, every week during hot weather, and following heavy rain or windstorms. Superchlorinate the pool with a suitable granular product by following directions below or on another product’s label. Keep pump-filter system running for at least 10 hours after treatment. Frequency of treatment is dependent on ambient temperature, light intensity, and other factors. DO NOT reenter pool until the chlorine residual has dropped to 1.0 – 3.5 ppm.
For superchlorination, broadcast 1 pound of this product per 10,000 gallons directly into the water in the deep end of the pool. To prevent damage to pool surface, use a pool brush to disperse granules that may have settled to the bottom of your pool. NEVER ALLOW UNDISLOTTED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES.
In water temperatures less than 70°F, or in an alternate application procedure, predetermined pH adjustments for this product prior to application of up to 100 mg/l (ppm) per 10,000 gallons. For other products, in a clean plastic bucket stirring with a clean plastic or wooden spoon. Add this product to water. NEVER add water to this product. NEVER add more than 1 pound of this product to 3 gallons of cold water. Do not mix with other products while pre-dissolving.
MAINTENANCE DOSAGE: With pump running, broadcast 4 ounces of this product per 10,000 gallons directly into the water in the deep end of the pool as an initial treatment. Repeat additions until a residual of 1.0-3 ppm chlorine is established as determined by the use of a test kit. To prevent damage to pool surface, use a pool brush to disperse granules that may have settled to the bottom of the pool.

NEVER ALLOW UNDISLOTTED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES. Regular use of a test kit is necessary to determine when it is necessary to add another dose of this product to maintain a residual of 1-3 ppm of available chlorine in the pool water. An average daily dose requirement is 2-3 ounces of this product per 10,000 gallons of water.
After use of this product it is recommended that a preventative algae treatment be added on a weekly basis.
ENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM CHLORINE DUE TO RISK OF BODY INJURY.

FOR SWIMMING POOL ALGAE: When used as directed, this product kills algae and will rid your pool of unsightly algae spots. This product is ideal for use in vinyl lined, fiberglass or colored plaster surf

STORE AND DISPOSAL:
Do not contaminate water, soil or food by storage and disposal.
PESTICIDE STORAGE: Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and food area with large amounts of water to dissolve all material before discarding.
DISPOSAL:
If empty, Nonrecyclable container. Do not reuse or refill this container. Offer for recycling if available.
If partly filled, Call your local solid waste agency for disposal instructions. Never place unused prod
