DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. DO NOT MIX WITH OTHER CLEANERS. FOR all-distribution of lad surfaces in hospitals, health-care facilities, schools and residential homes, use Wex-Cide 128 at a dilution of 1 ounce per gallon of water for walls, floors, bathroom fixtures, stainless steel, chrome, glass and vinyl. Wex-Cide 128 solution may be applied with a cloth, mop, brush, or sprayer.

For use as a Disinfectant and Deodorizer: Apply one solution evenly over surface to be cleaned. Wipe with cloth, mop, squeegee or paper towel.

For use as a One-Step Cleaner/Disinfectant: Wet all surfaces thoroughly. The surface must remain wet for at least 10 minutes and allowed to air dry. Great films and heavy soil must be removed before applying cleaning solution. When used for mopping or from an open bail, solution must be changed at least daily or more often if the solution becomes discolored or soiled. Wex-Cide 128 is suitable for cleaning floors and walls in the departments of food processing plants at 1:18 use dilution.

DECONTAMINATION OF CRITICAL OR SEMICRITICAL DEVICES PRIOR TO TERMINAL STERILIZATION/STERILIZATION LEVEL DISINFECTANT: This product is not to be used as a terminal or high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either as an implant or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. The product may be used to decontaminate critical or semicritical medical devices prior to terminal or high level disinfection.

WEX-CIDE 128 KILLS HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in health care settings or other settings in which there is an unexpected breaking or leaking of infectious substances with blood or body fluids, and in which the surfaces/objects Body to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus type 1 (HIV-1) (associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATING SURFACE/SURFACES SOILED WITH BLOOD AND BODY FLUIDS WHICH MAY CONTAIN HIV-1 (AIDS Virus).

PERSONAL PROTECTION: Wear disposable rubber or latex gloves, gowns, face masks and eye coverings as appropriate, when performing manual cleaning of these surfaces.

CONTACT TIMES: Leave surfaces wet for 1 minutes. This contact time will not control ctenovirus types of viruses and bacteria.

CLEANING PROCEDURE: WEX-CIDE 128 solution may be used to remove and clean blood and other body fluids from surfaces and objects before disinfection. For heavily soiled areas, wipe off usual solutions with WEX-CIDE 128 solution, then wash and rinse with a second application of the WEX-CIDE 128 solution. For large spills the contaminated area must be flooded with the WEX-CIDE 128 solution before cleaning, then decontaminated with fresh WEX-CIDE 128 solution.

DISPOSAL OF INFECTION MATERIAL: Blood and other body fluids must be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal.

STORAGE AND DISPOSAL: Do not carry water, food, or food by storage or disposal.

PESTICIDE STORAGE: Keep blank up to tightly closed. Store in original container in areas inaccessible to children.

PESTICIDE DISPOSAL: Pesticides waste are not environmentally hazardous. Improper disposal of excess pesticides, spray mixtures or rinse water is a violation of Federal Law. If these wastes cannot be disposed of by accordance to label instructions, contact your state Pesticide or Environmental Control Agency, the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Do not cause harm container. Triple rinse (or equivalent), then either for recycling or reconditioning, or dispose of in a sanitary landfill or by incineration. If allowed by state and local authorities, consult with local authorities on disposal suits for approved alternate procedures. If burned, stay out of smoke.

Made in the USA
CONCENTRATED GERMICIDAL DETERGENT
Cleans • Disinfects • Deodorizes
GERMICIDAL, PSEUDOMONACIDAL, TUBERCULOCIDAL, FUNGICIDAL and VIRUCIDAL*

ACTIVE INGREDIENTS:
ortho-Phenylphenol .......................................................................................................................... 3.40%
ortho-Benzyl-para-Chlorophenol ......................................................................................................... 3.03%
INERT INGREDIENTS: .......................................................................................................................... 93.57%
TOTAL: .................................................................................................................................................. 100.00%

EPA REG. NO. 34810-31 • EPA EST. NO. 34810-MO-1

KEEP OUT OF REACH OF CHILDREN

DANGER

GERMICIDAL QUALIFICATIONS: (AOAC Use Dilution Confirmation) in the presence of 400 ppm hardness as Calcium Carbonate and 5% serum at 1:128 (Ps. aeruginosa, S. aureus, S. enterica including S.aureus [MRSA] [PR] and S. Epidermidis [MRSE], Enterococcus faecalis [VRE]).
TUBERCULOCIDAL ACTIVITY: (AOAC M. bovis) in the presence of 400 ppm hardness as Calcium Carbonate and 5% serum at 1:128. FUNGICIDAL ACTIVITY: (AOAC T. Mentagrophytes) in the presence of 400 ppm hardness as Calcium Carbonate and 10% serum at 1:128. VIRUCIDAL ACTIVITY*: Influenza A Virus / Hong Kong, Pandemic 2009 HINI Influenza A Virus (formerly called Swine Flu), Adenovirus Type 2, Herpes Simplex Virus Types 1 and 2, Vaccinia Virus, Human Rotavirus, and Respiratory Syncytial virus in the presence of 400 ppm hardness and 5% serum, and HIV-1 [AIDS]) in the presence of 400 ppm hardness as Calcium Carbonate and 10% serum at 1:128.
PRECAUTIONARY STATEMENTS: HAZARD TO HUMANS AND DOMESTIC ANIMALS. DANGER. Corrosive. Causes eye damage or skin irritation. Avoid breathing spray mist. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling the concentrate. Harmful if swallowed. FIRST AID: IF IN EYES - Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice. IF ON SKIN OR CLOTHING - Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF INHALED - Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. IF SWALLOWED - Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told by a Poison Control Center or doctor. Do not give anything by mouth to an unconscious person. HOT LINE NUMBER: In case of an emergency call toll free 1-800-123-4567 (24 hours.) Have the product container or label with you when calling a poison control center or doctor or going for treatment. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

Contents: One Gallon (128 Fluid Ounces)
DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **DO NOT MIX WITH OTHER CLEANERS.** For all disinfection of hard surfaces in hospitals, healthcare facilities, schools and nursing homes, use Wex-Cide 128 at a dilution of 1 ounce per gallon of water for walls, floors, bathroom fixtures, stainless steel, chrome, glass and vinyl. Wex-Cide 128 solution may be applied with a cloth, mop or brush, or soaking.

For use as a Cleaner and/or Deodorizer: Apply use solution evenly over surface to be cleaned. Wipe with clean cloth, mop, sponge or paper towel.

For use as a One-Step Cleaner/Disinfectant: Wet all surfaces thoroughly. The surface must remain wet for at least 10 minutes and allowed to air dry. Gross filth and heavy soil must be removed before applying cleaning solution. When used for mopping or from an open pail, solution must be changed at least daily or more often if the solution becomes diluted or soiled. Wex-Cide 128 is suitable for cleaning floors and walls in the departments of food processing plants at 1:128 use dilution.

**DECONTAMINATION OF CRITICAL OR SEMI-CRITICAL DEVICES PRIOR TO TERMINAL STERILIZATION/HIGH LEVEL DISINFECTION: This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.**

"**WEX-CIDE 128 KILLS HIV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS** in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of human immunodeficiency virus type 1 (HIV-1) (associated with AIDS)."

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATING SURFACES/OBJECTS SOILED WITH BLOOD AND BODY FLUIDS WHICH MAY CONTAIN HIV-1 (AIDS VIRUS).**

**PERSONAL PROTECTION:** Wear disposable rubber or latex gloves, gowns, face masks and eye coverings as appropriate, when performing manual cleaning of these surfaces.

**CONTACT TIME:** Leave surfaces wet for 1 minute. This contact time will not control other common types of viruses and bacteria.

**CLEANING PROCEDURE:** WEX-CIDE 128 solution may be used to remove and clean blood and other body fluids from surfaces and objects before disinfection. For lightly soiled areas wipe off visual soil/clean with WEX-CIDE 128 solution, and disinfect surface with a second application of the WEX-CIDE 128 solution. For large spills the contaminated area must be flooded with the WEX-CIDE 128 solution before cleaning, then decontaminated with fresh WEX-CIDE 128 solution.

**DISPOSAL OF INFECTIOUS MATERIAL:** Blood and other body fluids must be autoclaved and disposed of according to Federal, State and local regulations for infectious waste disposal.

**STORAGE AND DISPOSAL:** Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE:** Keep upright with cap tightly closed. Store in original container in areas inaccessible to children. **PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinse rates is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. **CONTAINER DISPOSAL:** Do not reuse empty containers. Triple rinse (or equivalent), then offer for recycling or reconditioning, or dispose of in a sanitary landfill or by incineration, if allowed by state and local authorities. Consult federal, state, or local disposal authorities for approved alternate procedure. If burned, stay out of smoke.
