For outdoor use only, apply in areas where there is contact with the surface to be treated. Avoid applying too much product to any one area.
Do not treat food preparation surfaces. Do not apply but pet to areas which have been recently treated with insecticide, and do not spray insecticide over pet as it may cause the pet to become repellent.

Pet placements should be at or near harborage or aggregation areas, such as corners, or cracks and crevices. Remove smaller placements will provide faster control than larger larger areas, especially for German cockroach surveys.

For outdoor use, be sure to home-on structure: Place in cracks or crevices adjacent to structures where large numbers may nest or rest. Apply pets to potential points of insect entry, such as gaps, voids, and expansion joints. Apply pets in protected sites wherever possible. Environmental changes such as direct sunlight and colder will reduce the residual effectiveness. 1. American, Oriental, Brown, Smoky Brown

Do not exceed 1 teaspoon per station, if the station is not equipped with a stick, identify the contents by applying stick to the rest of the station.

Directions for using resolutes and operation:
1. With the mouth of the hose directed up, pull the hose hot all the way back. If the hose rod is not easily hot, warm the hose with some water. 2. Do not apply more than 1 ounce of the pet at a time to the application. This portion of the solution will be effective until the next re-treatment or re-treatment cycle. 2. Do not apply more than 1 ounce of the pet at a time to the application. 3. Do not re-treat the pet as soon as the pet is over the amount prescribed. 4. Do not re-treat the pet as soon as the pet is over the amount prescribed. 5. Do not re-treat the pet as soon as the pet is over the amount prescribed. 6. Do not re-treat the pet as soon as the pet is over the amount prescribed. 7. Do not re-treat the pet as soon as the pet is over the amount prescribed. 8.
