**MAXFORCE® FC Professional Insect Control Roach Killer**

**PROFESSIONAL INSECT CONTROL**

**CONDITIONS:**

The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. In the event that this product is inadvertently ingested or comes in contact with any person, animal, or plant, the following should be done:

- **If in eyes:** Wash with water for at least 15 minutes. If irritation persists, seek medical attention.
- **If on skin:** Wash with soap and water for at least 15 minutes. If irritation persists, seek medical attention.
- **If swallowed:** Call a poison control center or doctor for treatment advice.

**DOMESTIC ANIMALS**

In zoos, apply only in areas inaccessible to zoo animals. In households, apply in locations that are inaccessible to children and pets. Apply bait in protected areas whenever possible. Avoid contact with skin, eyes, and clothing. Wash hands after handling.

**NON-FOOD/NON-FEED AREAS**

Non-food/non-feed areas include kennels, kitchens, manufacturing facilities, spice plants, manufacturing plants, dairies and dairy product processing facilities, candy plants, canneries, cereal processing and enclosed processing systems (mills, dairies, edible oils, etc.).

**APPLICATION RATE**

The quantity of Maxforce FC Professional Insect Control Roach Killer bait added to the bait station will vary depending on the severity of infestations, see the application rate table. Do not exceed 2 - 4 spots per station (3" - 6" depending on the severity of infestations, see the application rate table). Do not exceed 2 - 4 spots per station (3" - 6" depending on the severity of infestations, see the application rate table).

**REFILLABLE STATIONS**

Refillable stations:

- Use approximately small amounts of gel per spot. Do not apply bait to areas that are routinely washed, such as cracks and crevices in tops of small amounts between different elements of structures) control of cockroaches in residential areas and to moderate infestations or re-treatments, and the higher infestation and species to be controlled (see application rate table).

**RESERVOIR CHANGES**

Directions for changing reservoirs:

- With the teeth of the drive rod facing up, pull the drive rod all the way back. If the drive rod is initially hard to pull, give the drive rod a gentle tug. The drive rod should slide smoothly into the reservoir. If the drive rod does not slide smoothly into the reservoir, do not attempt to force it. Do not reuse empty container. Place in trash or offer for recycling if available. If Partly Filled: Call your local recycling center or waste disposal company. If Empty: Do not reuse container. Place in trash or offer for recycling if available. If Partly Filled: Call your local recycling center or waste disposal company. If Empty: Do not reuse container. Place in trash or offer for recycling if available. If Partly Filled: Call your local recycling center or waste disposal company.

**STORAGE AND DISPOSAL**

- Keep out of reach of children and pets. Store in a cool, dry place. Do not expose to heat, direct sunlight, or freezing temperatures. Do not spray insecticide over gel as it may cause the bait to lose effectiveness. Environmental stresses, such as direct sunlight and water joints. Apply bait in protected areas whenever possible.
