MAXFORCE CARPENTER ANT BAIT GEL - 0.95 OZ (27g)

FOR USE IN COMMERCIAL, INDUSTRIAL AND RESIDENTIAL AREAS

ACTIVE INGREDIENT: Fipronil* .......................................................... 0.001%

OTHER INGREDIENTS: ............................................................ 99.999%
*CAS NO. 120086-37-3
Contains: 1 plastic reservoir

KEEP OUT OF REACH OF CHILDREN
CAUTION: SEE CAUTIONS BELOW

Use only in areas not easily accessible to children and pets.
Product may stain textiles and clothing.
This product provides FAST CONTROL of ants in 3-5 days. MAXFORCE Carpenter Ant Killer Bait Gel is formulated to effectively control ants. That's because this product contains Fipronil, a last-action active ingredient. Its speed is still slow enough, however, for foraging ants to return to the colony and feed the bait to larvae and queen(s) so that the entire colony is killed through the Domino Effect.

This product is formulated for effective ant control. The high moisture content of this gel enhances the bait's attractiveness to target ants. The bait's attractiveness is greatest within two weeks of application. This product is a bait product, formulated to take advantage of ant foraging behavior. Through foraging, workers bring the bait while foraging, then feed it to the rest of the colony. The larvae digest the solid bait and produce a liquid containing the Fipronil that is toxic to the rest of the colony and queen(s).

This product controls a broad spectrum of ants. Thus this product not only controls Carpenter Ants, but it also controls additional ants including Argentine, Pavement, Pavement, Honey, Acrobat, Odorous House, Thief, Big-headed, Centrified, and Field.

When exposed to higher temperatures (above 80°F) for extended periods of time, the gel will change color and lose effect.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: May be harmful if swallowed. Avoid contact with skin and clothing. Keep exposed gel away from open food and food contact surfaces. Wash hands thoroughly after handling.

PHYSICAL AND CHEMICAL HAZARDS
Do not use this product in or on electrical equipment where a possibility of shock hazard exists.

FIRST AID
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice.
Have person sip a glass of water if able to swallow.
Do not induce vomiting unless told to do so by the poison control center or doctor.
Do not give anything by mouth to an unconscious person.

IF IN EYES: Remove contact lens (if worn). Rinse with water for at least 15 minutes. Seek medical attention.

IF INHALED: Seek fresh air promptly. Remove person to an area where fresh air is available. If breathing is difficult, administer oxygen. If breathing stops, get immediate medical attention.

IF SKIN CONTACT: Wash with soap and water for at least 15 minutes. If irritation persists, seek medical attention.

IF FÉRTILIZED: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

For questions or comments about MAXFORCE, call toll-free 1-800-334-7517 for emergency medical treatment information.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal.
STORAGE: Store in a cool, dry area out of reach of children.
DISPOSAL: If Empty: Do not reuse container. Place in trash or in a public recycling container.
If Fully Fertilized: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never store unused product down any indoor or outdoor drain.

DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. All product labeling must be in possession of the applicator. Application rate is dependent on level of infestation and species to be controlled. Bait should be applied as spots. Applications to Food/Food Handling Establishments. Application within food areas or food handling establishments is limited to crack and crevice treatment only. Apply with syringe applicator or bait injector directly into cracks and crevices. Place applicator tip into cracks and crevices and where ants may travel. Apply gel (up to 1 gram) per spot. Apply bait in small amounts in the different elements of construction, openings leading into voids and hollow spaces in floors, walls, ceilings, equipment legs and bases, around plumbing pipes, doors and windows, cabinets, sinks, drains, and other places where ants may enter the establishment. During follow-up visits inspect bait placement and reapply when necessary. Do not apply bait to areas where food, feed, or food processing surfaces may become contaminated. Do not apply bait in crack and crevices of areas that are routinely washed. Do not use bait in areas where food, feed, or food processing surfaces may become contaminated. Do not apply bait in cracks and crevices of areas that are routinely washed. Do not apply bait to areas where food, feed, or food processing surfaces may become contaminated. Do not apply bait in crack and crevices of areas that are routinely washed.

Contains 1 plastic reservoir
