GENERAL INFORMATION
BRONC® MAX water conditioning agent is specially formulated to be used with many post-emergence type herbicides, which perform best when mixed with ammonium sulfate.

This water conditioning agent is filtered through a special process to remove impurities and other contaminants generally associated with dry or other liquid ammonium sulfate products. This lack of sedimentation reduces nozzle plugging, wear and corrosion of equipment.

Typical Properties:
- Appearance: Light Green Liquid
- Specific Gravity: 1.23
- Freezing Temperature: 4°F
- pH: 3.5 - 4.2
- Corrosion Factor: Very Low

DIRECTIONS FOR USE
BRONC MAX is a water conditioning agent. It does not replace the need for an adjuvant or nonionic surfactant. If the spray material label recommends it, then additional adjuvant or nonionic surfactant should be added.

DO NOT ALLOW THIS PRODUCT TO FREEZE.
