Eliminates Algae and Keeps Water Clean

GreenClean
Granular Algaecide

Net Weight: 8 lbs

CONSROLS
ALGAE BLOOMS

For use in water features containing live fish and plants

Active Ingredient:
Sodium Carbonate Peroxyhydrate* .................. 42.50%
Other Ingredients: .................................. 57.50%
Total: .............................................. 100.00%

* This product is equivalent to 13.80% Hydrogen Peroxide by weight.

KEEP OUT OF REACH OF CHILDREN
DANGER - PELIGRO

Si usted no entiende la etiqueta, busque a alguien para que se lo explique a usted en detalle. (If you do not understand this label, find someone to explain it to you in detail.)

See back label for first aid, additional precautionary statements and directions for use.
GreenClean Granular treatments are successful when control of the algae is needed for the season. Applications can be made directly on the water surface, from shore or from a properly equipped boat. A hand spreader or any other applicator that will ensure uniform coverage is acceptable.

**APPLICATION METHODS**

**SPREADING / BROADCASTING:**
Broadcast GreenClean Granular with a mechanical spreader or by hand, directly on the water surface, from shore or from a properly equipped boat. A hand spreader or any other applicator that will ensure uniform coverage is acceptable.

**SPOT TREATMENT:**
Apply GreenClean Granular directly over the infested area. Retreatment is required when heavy growth occurs.

**SURFACE TREATMENT:**
Use GreenClean Granular on all but non-porous surfaces, to prevent and control algae, moss, slime molds and their spores, and the odors and conditions that these organisms cause.

**APPLICATION RATES**
[Note: 1 lb of GreenClean Granular by weight = 2 Cups in volume]

<table>
<thead>

</thead>
<tbody>
<tr>
<td>ORGANICALLY</td>
<td>2-3 pounds of GreenClean Granular per 1,000 square feet of area</td>
<td>1-2 pounds of GreenClean Granular per 1,000 square feet of area</td>
</tr>
</tbody>
</table>

Apply granular applications over a wet surface or activate with water immediately following application.

**GENERAL TREATMENT NOTES**

- Granular applications are most effective.
- Control is most easily achieved when growth is not yet well established. Treat when growth first begins to appear.
- Dense, thick mats of algae throughout the water volume are indicative of heavy algae growth.
- GreenClean Granular is water activated. Waiting before application is preferred over misting after application.
- When applying GreenClean Granular to soft, silted, or other similar media, incorporated the application of GreenClean Granular into the first bath of substrate for optimum effectiveness.
- To maintain clear surfaces, apply GreenClean Granular at maintenance rates every 57 days or as needed to control new or established conditions.
- After application, do not allow unidiluted granules to remain in an area where humans or animals are exposed. Swallow or remove unidiluted granules. Unidiluted granules may also be eliminated by thoroughly flushing down with water.
- Non-target plants will suffer contact burn if unidiluted granules are accidentally spilled on them. Do not apply in such a way that the concentrated product comes in contact with grass, ornamentals and other foliage.
- Do not tank mix with aquatic herbicides or algaecides containing copper or bromides. Always apply GreenClean Granular at least one day prior to the application of these products.

**APPLICATION METHODS**

**SPREADING / BROADCASTING:**
Broadcast GreenClean Granular with a mechanical spreader or by hand. A lawn spreader or any other applicator that will ensure uniform coverage is acceptable.

**SPOT TREATMENT:**
Apply GreenClean Granular directly over the infested area. Retreatment is required when heavy growth occurs.

**LIQUID:**
Make a solution with GreenClean Granular (refer to liquid application rates). Spray this solution on the desired treatment surface. Use liquid application method for surface treatments only. Do not use liquid application method for water treatments.

**First Aid**

1. Stop the contact.
2. Remove any remaining algae from the skin or mucous membrane.
3. Wash the affected area with soap and water.
4. If symptoms persist, seek medical attention.

**For Pond Cleaning:**
1. Drain pond (remove fish & plants)
2. Apply GreenClean Granular to all surfaces
3. Rinse with water (30 minutes)
4. Drain pond
5. Re-fill pond (replace fish & plants after dechlorinating as appropriate)

**For Pond Water Algae:**
1. Shock with GreenClean Granular at the high application rate.
2. Treat as needed once per week with GreenClean Granular for the 10 day corrective rate in conjunction with water conditions.

**GreenClean is Easy to Use.**

For Treating String Algae:
1. Toss into circulation
2. Apply GreenClean Granular to affected areas - including waterfalls and streams
3. Turn circulation back on after 10-20 minutes

For Pond Cleaning:
1. Drain pond (remove fish & plants)
2. Apply GreenClean Granular to all surfaces
3. Rinse with water (30 minutes)
4. Drain pond
5. Re-fill pond (replace fish & plants after dechlorinating as appropriate)

**For Pond Water Algae:**
1. Shock with GreenClean Granular at the high application rate.
2. Treat as needed once per week with GreenClean Granular for the 10 day corrective rate in conjunction with water conditions.

**Tips for Testing Green Water Algae**

1. **Test Method:** Use a test kit (e.g., HACH 2100 N) or visual inspection.
2. **Application:** Apply a small amount of the test solution to the water sample.
3. **Interpretation:** Compare the color of the treated sample to the standard chart provided with the kit.

**SUGGESTIONS FOR USE**

- Treat only a half or a third of any existing pond water with a Propermix series product to start.
- Treat every three weeks throughout the growing season or as needed to maintain clear water conditions.
- Treat all ponds and fountains when algae growth is visible.
- Avoid applying the product during heavy rains or storms.
- For best results, wait at least 24 hours after applying the product before adding other treatments or chemicals.

**EFFECTIVENESS FACTORS**

- Effects of GreenClean Granular treatment are limited only by weather (e.g., rain or wind), water conditions, and pond depth.

---

**GRANULAR TREATMENT OPTIONS**

- **Small Volume (up to 2,000 gallons):** Use 1 oz. per 100 gallons of water.
- **Large Volume (over 2,000 gallons):** Use 1 oz. per 200 gallons of water.

**WATER TREATMENT**

Use GreenClean Granular to treat, control, and prevent a broad spectrum of algae. Effects of treatment are immediately apparent. Ponds treated with GreenClean Granular are permitted to be used without prior inspection.

**DETERMINING WATER VOLUME**

- Measure length (L), width (W), and average depth (D) in feet (ft) or meters (m) and calculate volume using one of the following formulas:

  - **V = L x W x D**
  - **V = (L x W x D) / 1,000**

**Notes:**

- Use a test kit to monitor water quality periodically.
- Avoid applying the product during heavy rains or storms.
- For best results, wait at least 24 hours after applying the product before adding other treatments or chemicals.
- Use a test kit to monitor water quality periodically.
- Avoid applying the product during heavy rains or storms.
- For best results, wait at least 24 hours after applying the product before adding other treatments or chemicals.
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMAN AND DOMESTIC ANIMALS: DANGER: Corrosive. Causes irreversible eye damage. Do not get in eyes, on skin or on clothing. Wear protective eyewear (goggles, face shield or shielded safety glasses). Harmful if swallowed, inhaled or absorbed through skin. Avoid breathing dust. Wash thoroughly with soap and water immediately after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. When prolonged or repeated contact may occur, use chemically resistant gloves and full body clothing.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to birds. Do not contaminate water when cleaning equipment or disposing of equipment wash water or rinsate. GreenClean Granular is NOT intended for use in drinking water.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Corrosive. Mix only with water in accordance with label instructions. Do not bring in contact with other pesticides, cleaners or oxidative agents.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container in a cool, well-ventilated area, away from direct sunlight. Do not allow product to become overheated in storage. This may cause increased degradation of the product which will decrease product effectiveness. In case of spill, flush area with large quantities of water. Do not store in a manner where cross-contamination with other pesticides or fertilizers could occur.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: If empty - Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available. If peritectically filled - Call your local solid waste agency or 1-800-CLEANWHP for disposal instructions. Never place unused product or any indoor or outdoor cleaner.

WARRANTY: This material conforms to the description on the label and is reasonably free from the purports referred to in the directions for use. To the fullest extent permitted by law, the seller shall not be liable for injury, unfavorable temperature, water conditions, presence of other materials,残忍等 all conditions, weather, watering practices, action of soil, disease problems, condition of crop, incompatibility with other chemicals, prevailing conditions, or other conditions influencing the use of this product. Buyer assumes all risks associated with the use, storage, or handling of this material not in strict accordance with directions given hereon. NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY IS MADE.

FIRST AID
If in eyes:
- Hold eye open and rinse slowly and gently with water for 15 - 20 minutes.
- Remove contact lenses (if present) after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If on skin or clothing:
- Take off contaminated clothing.
- Wash skin immediately with plenty of water for 15 - 20 minutes.
- Call a poison control center or doctor for treatment advice.

If swallowed:
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mask-to-mouth, If possible.
- Call a poison control center or doctor for treatment advice.

NOTICE: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-225-7222 for emergency medical treatment information. NOT TO PHYSICIAN: Probable mucosal damage may obstruct the use of gastric lavage. See inside panel for additional precautionary statements and directions for use.
