DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For use as a remedial treatment in large structural timbers such as utility poles, pilings, bridge timbers and laminated wood products located outdoors. Apply to areas of timbers where decay is suspected or is likely to occur.

For remedial treatment of wooden poles/timbers:
1. Plug the pre-drilled holes immediately after application.
2. Do not treat structural beams indoors.
3. Do not drill an application hole through seasoning checks to apply product.
When the hole intersects a crack, plug the hole and drill another. If more than one treatment holes intersect an internal vord or rot pocket, redrill the holes farther up the pole into relatively solid wood.

Large structural timbers have many different end uses. The groundline area of a 40" circumference standing pole is taken as a guide and example for application of this product.

For interior decay bore a pattern of 4 holes at a 45 degree downward angle. Minimum hole depth is 12" and maximum depth is 16". For smaller diameter poles or timbers, it will be necessary to increase the boring angle to allow for a 12" deep hole. The first hole shall be at the groundline and succeeding holes about 6" higher and rotated 90 degrees from the next lower hole. For an excavated pole, the first hole shall be below the ground line utilizing the pattern and spacing presented in the table below.

1. Always open tin and tubes in an open area.
2. Have both the opening device and tube with active ingredient within arm's reach.
3. Open tin carefully. Place opening device on top of the tube. Remove the cap from the tube.
4. Insert the tube into pre-drilled hole. Then insert the cap into the hole. For poles, it is recommended that the opening end of the tube be placed downwards. For other timbers, it may be appropriate to insert with open end up. Plug hole with a tight fitting plug using the precautions of wearing safety goggles and gloves to prevent exposure to the product.
5. Repeat application procedure for each pole.

Dosage Rate: 1 tube (2 gallons) per hole.

Dosage rate and drilling pattern for standing utility poles:

KEEP OUT OF REACH OF CHILDREN

DANGER/PELIGRO POISON FLAMMABLE

"Si usted no entiende la etiqueta, busque a alguien para que le explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)"

FIRST AID

IF INHALED: Move a person to fresh air. If person is not breathing, call 911 or an ambulance. Then give artificial respiration, preferably mouth-to-mouth. If possible. Call poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Continue rinsing eye. Call a poison control center or doctor for further treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with warm water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: Call poison control center or doctor for treatment advice. Do not induce vomiting unless told to do so by the poison control center or doctor. If person can swallow, give a glass of water. Do not give anything by mouth to an unconscious person.

HOT LINE NUMBER: CHENIETREC (800) 424-8930 (24 hours)

The product container or label with you when calling a poison control center or doctor for going or treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate use of gastric lavage.

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage:

• Store only in closed original container to prevent leakage.
• Store only in cool, well-ventilated, locked areas, away from food and feedstuff.
• Avoid exposure to heat and/or direct sunlight.

Do not drop container onto or slide across sharp objects.

Pesticide Disposal:

• Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinseate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING:

• Nonrefillable container. Do not reuse or refill these containers.
• Fiberboard box: Completely empty fiberboard box. Offer for recycling. If available, or dispose of in sanitary landfill.
• Steel container: Completely empty steel container. Offer for recycling. If available, or puncture and dispose of in a sanitary landfill or by other procedures allowed for by state and local authorities.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and mammals. For terrestrial uses:

Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark.

PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill or store near an open flame.

Batch Code: Located on bottom of container.
