ACTICIDE® LG

ACTIVE INGREDIENTS:
6-Chloro-2-methyl-4-isothiazolin-3-one .... 11.1%
2-Methyl-4-isothiazolin-3-one .... 0.37%
TOTAL: ........................................ 11.47%

KEEP OUT OF REACH OF CHILDREN
DANGER - PELIGRO

FIRST AID

If in Eyes: >Hold eye open and rinse slowly and gently with water for 10-20 minutes. >Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. >Call a poison control center or doctor for treatment advice.

Swallowed: >Do not induce vomiting unless told to do so by the poison control center or doctor. >Have person sip a glass of water if able to swallow. >Do not induce vomiting unless told to do so by the poison control center or doctor.

If on Skin: >Rinse skin immediately with plenty of water for 15-20 minutes. >Call a poison control center or doctor for treatment advice.

Inhalation: >Move person to fresh air. >If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. >Call a poison control center or doctor for further treatment advice.

Note to physician: Peptic ulcerous damage may override the use of peptic ulcer.

For Transportation / Spill Emergency: Call Chemtrec at 1-800-424-9300

PHYSICAL AND CHEMICAL HAZARD
This product is corrosive to mild steel.

STORAGE AND DISPOSAL
This product (ACTICIDE LG) is corrosive to mild steel.

PESTICIDE STORAGE: Do not store or transport in unlined metal containers.
Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

PESTICIDE DISPOSAL: Pesticide wastes are actively hazardous. Improper disposal of wastes can create other hazards in a violation of Federal Law. If waste cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL:
Non-refillable container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple rinses as follows: [For container size 5 gallons in size] - Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recirculate for 10 seconds. Pour rinsates into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. [For container size 5 gallons in size] - Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water and recirculate for 10 seconds. Pour the container on the end and tip it back and forth several times. Turn the container over onto its side and tip it back and forth several times. Empty the rinsates into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for reusing if available or purchase and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

GENERAL: CONSULT FEDERAL, STATE OR LOCAL DISPOSAL AUTHORITIES FOR APPROVED ALTERNATIVE PROCEDURES.

CONDITIONS OF SALE AND WARRANTY
Thor GmbH warrants that the product conforms to its descriptive label and is reasonably fit for the purpose stated on the label only when used in accordance with labeled directions under normal conditions of use. THOR GMBH MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES EITHER OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Handling, storage and use of the product by Buyer or User are beyond the control of Thor GmbH and Seller. Risks such as inefficacy or other unwise consequences resulting from, but not limited to, failure to follow label directions will be assumed by the Buyer or User. IN NO CASE WILL THOR GMBH OR SELLER BE HELD LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE HANDLING, STORAGE OR USE OF THIS PRODUCT.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Industrial microorganisms for use in metalworking fluids, soaps, waxes, and finishes. Hydrosolubles, metal scavengers, polymeric additives, and soaps and other components, and in household use. Industrial, institutional, and household use.

READ AND FOLLOW THE DIRECTIONS FOR USE ON THE ACCOMPANYING INFORMATION SHEET.

Not approved for use in the State of California.

67071-1_Acticide LG_20151222_3_67071_.pdf

Batch: __________________________ Mfg Date: __________________________
Net Contents (pounds): __________________________
**INDUSTRIAL PROCESS WASH WATER**
ACTICIDE® LG microbicide is recommended for the control of bacteria and fungi in the storage of process wash waters.
*Not approved for this use in the State of California*

| Concentration | 0.05 – 0.30% | 0.5 – 3.0 LB per 1000 LB wash water |

**PRESERVATIVE FOR METAL WORKING FLUIDS**
ACTICIDE® LG microbicide is recommended for the control of bacteria and fungi in aqueous metal working fluid solutions and emulsions.

The preservative should be dispensed into the use dilution of the metal working fluid using a metering pump and uniformly dispersed throughout the system.

For a noticeably fouled system use an initial dose of 64 to 160 fluid ounces (4 to 11 lb) per 1000 gallons of emulsion followed by subsequent maintenance dosage. A higher dosage rate and/or increased frequency of treatment may be required depending upon the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

| Concentration | 32 FL OZ (2 LB) per 1000 GAL of emulsion every 4 weeks |

**WATER-BASED HYDRAULIC FLUID PRESERVATION**
ACTICIDE® LG microbicide is recommended as a preservative for use in the manufacture and use of high water-based hydraulic fluids and invert emulsion hydraulic fluids typically prepared by emulsifying 40% by volume water in 60% by volume of mineral oil using an oil soluble emulsifying agent.

For a noticeably fouled system use an initial dose of 150 to 250 fluid ounces (10 to 17 lb) per 1000 gallons fluid to be followed by subsequent maintenance dosage. A higher dosage range and/or increased frequency of treatment may be required depending upon rate of dilution of the preservative with make-up fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

| Concentration | 120 to 150 FL OZ (8 to 10 LB) per 1000 GAL of fluids every 8 weeks |

**CONCENTRATES:**

ACTICIDE® LG microbiocide should be added to concentrates at a level to ensure that the final use dilution of the product will contain 0.05 to 0.33% ACTICIDE® LG.

*Not approved for this use in the State of California*
## HOUSEHOLD CONSUMER, INDUSTRIAL, JANITORIAL PRODUCTS

For the control of bacteria and fungi in liquid and solid soaps, liquid and solid cleaners, liquid and solid detergents, liquid and solid laundry products, liquid and solid dishwashing detergents, waxes, polishes, liquid and solid fabric treatment/refresher products, liquid and solid air fresheners/deodorizers, car care products, and other similar cleaners.

**ACTICIDE® LG** may also be used for the control of bacteria and fungi in package utility products such as pre-moistened sponges and mops.

**ACTICIDE® LG** may also be used for the control of bacteria and fungi in solutions that are then put into/onto wet wipes for use in industrial, commercial, residential and household uses cited above.

Wet wipes containing a solution preserved with this product may not be used for personal care, as baby wipes, or for food contact.

### CONCENTRATES:

**ACTICIDE® LG** microbiocide may be added to those products formulated as concentrates which are in turn diluted for use at a level to ensure that the final use-dilution product will contain between 0.04 and 0.15% **ACTICIDE® LG** microbiocide.

### PRESERVATIVE FOR PAINTS AND COATINGS

**ACTICIDE® LG** microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in water based coatings such as paper, wood coatings and paints used for architectural, product finishes and special purpose coatings.

For storage during high temperatures and humidity or for highly susceptible systems.

OF ACTICIDE® LG

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

*Specifically for a wood coating, ACTICIDE® LG is recommended for the protection of wood and wood products such as landscape timbers, fences, posts, pilings, cross ties, decks and similar exterior structures, from mold and mildew. As a pressure treatment for mold and mildew control for southern yellow pine, hemlock, ponderosa pine and other soft woods. Thoroughly wet and allow to dry. A single application will afford protection for 12 weeks. Under extreme mildew conditions. Thoroughly wet and allow to dry. A single application will afford protection for 12 weeks.

*Not approved for this use in the State of California

ACTICIDE® LG
INFORMATION SHEET

THIS ACTICIDE® LG INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT
OF ACTICIDE® LG

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

*PHOTO/PHOTOPLATE PROCESSING, FOUNTAIN SOLUTIONS, AND
INK/INK COMPONENTS

ACTICIDE® LG microbiocide is recommended for the control of bacteria, fungi, and biofilms in photo/photoplate processing chemicals, stabilizing solutions, fountain solutions, printing inks and ink components. ACTICIDE® LG is recommended for water-based printing inks such as flexographic, gravure, screen and ink jet types. ACTICIDE® LG is recommended for the control of bacteria and fungi in printing ink components such as resins, plasticizers, water soluble dyes, pigments, gelling agents, waves, surfactants, and thickeners.

CONCENTRATES:

ACTICIDE® LG should be added to concentrates at a level to ensure that the final use dilution of the product will contain 0.1 to 0.33% ACTICIDE® LG.

To ensure uniform mixing add ACTICIDE® LG microbiocide to the product slowly with agitation. The actual concentration required will depend upon the specific substance to be treated, frequency of repeated contamination expected and level of protection required.

*Not approved for this use in the State of California

*ELECTRODEPOSITION

ACTICIDE® LG microbiocide is recommended as a tankside additive for the control of bacteria, fungi, and algae in re-circulating electrodeposition systems and associated rinse systems. Alternately, ACTICIDE® LG microbiocide may be added through the components of the electrodeposition paint prior to their addition to the electrodeposition system.

ACTICIDE® LG
INFORMATION SHEET

THIS ACTICIDE® LG INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT OF ACTICIDE® LG

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

| Tankside Addition to Electrodeposition Systems: |
| ACTICIDE® LG microbiocide should be dispensed into the recirculating rinse system, ultrafilter permeate, or final distilled rinse system at a point to insure uniform mixing. |
| When the system is noticeably fouled, add 650 to 2245 ppm ACTICIDE® LG microbiocide (6.5 to 22.5 gallons per 10,000 gallons of fluid in the system). Repeat until control is achieved. |
| When microbial control is evident, add 320 to 1000 ppm ACTICIDE® LG microbiocide (3.2 to 10 gallons per 10,000 gallons of fluid in the system) weekly or as needed to maintain the system. |
| A change of frequency of treatment may be required depending on the rate of dilution of the preservative with the makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc. |

*Not approved for this use in the State of California

**TREATMENT OF ELECTRODEPOSITION PAINT COMPONENTS**

*Initial Dose of Paint Components:*

ACTICIDE® LG microbiocide should be added to the resin, pigment, or other component of the electrodeposition paint at a level to ensure that the final use-dilution fluid will contain 320 to 2245 ppm product.

*Supplemental Tanked Dosing of Electrodeposition System:*

- If additional microbial control is necessary, ACTICIDE® LG microbiocide may be added to the electrodeposition system tankside to supplement the microbiocide incorporated through paint components.
- If the system becomes noticeably fouled, add 650 to 2245 ppm ACTICIDE® LG microbiocide (6.5 to 22.5 gallons per 10,000 gallons of fluid in the system). Repeat until control is achieved.
- When microbial control is evident, the system can be maintained by addition of 320 to 1000 ppm ACTICIDE® LG microbiocide (3.2 to 10 gallons per 10,000 gallons of fluid in the system) weekly or as needed.

*Not approved for this use in the State of California

**NOTE:** Regardless of the manner of incorporation, the total level in the system should never exceed 2245 ppm ACTICIDE® LG or 22.5 gallons per 10,000 gallons of system fluid.
