# Weed Blast 4-G Weed Killer

**ACTIVE INGREDIENTS:**
- Bromacil (5-bromo-3-sec-butyl-6-methyluracil) ................................................................. 2.0%
- Diuron: (3,4-dichlorophenyl)-1,1-dimethylurea ........................................................................... 2.0%
**OTHER INGREDIENTS:** ........................................................................................................... 96.0%
**Total:** ................................................................................................................................... 100.0%

**NON-CROP WEED CONTROL:**

**INDUSTRIAL USE ONLY**

Weed Blast 4-G is a nonselective herbicide for controlling a wide range of annual and perennial weeds and grasses. It is registered for industrial use only such as railroad, utility and highway rights-of-way. 220 to 400 pound applications of Weed Blast 4-G per acre usually result in a nonproductive condition of the soil for a period of one year on more. The duration of nonproductivity is dependent upon rainfall, soil type, and other conditions. Application with a sprayer, a pump-fed backpack sprayer or a gravity-feed backpack spreader is prohibited.

Weed Blast 4-G should be applied as furnished with a spreader, a fertilizer spreader, or mix with equipment which will distribute the chemical uniformly over the area to be treated. For the control of annual and most perennial weeds and grasses, apply Weed Blast 4-G at the rate of 300 to 400 pounds per acre; on smaller plots, 45 to 52 pounds per 100 square feet. Repeat spot treatment may be required when deep-rooted perennial weeds are present. To obtain the best results, Weed Blast 4-G should be applied to the ground where it will be absorbed by the roots. Applications made early in the season have been found to give results superior to applications at a later seasonal date. Weed Blast 4-G may, however, be applied at any time of the year except when the ground is frozen. Maximum effectiveness in regions is obtained when application is made just prior to the rainless season. Unten should consult state agricultural experimental stations or soil conservation service weed specialists for recommendations as to use in their particular area. Not to be used in any recreational areas of in or around homes. May not be used to treat bars of chia, seasonally dry plant food, dill, mallow, morning glory, sowthistle, sunflower, and transitional areas between upland and lowland sites.

**ENTRY RESTRICTIONS:**
Do not enter or allow others to enter the treated area until dusts have settled. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

**IMPORTANT:** Do not apply on or near desirable woody or herbaceous plants or on areas where their roots may extend because of this product. Thoroughly clean spreading equipment with a suitable chemical cleaner before using for other purposes or do not use same spreading equipment for other purposes. Dispose of waste according to "Disposal" instructions found under "Storage and Disposal." Do not use on croplands or any land to be used for subsequent cropping. Keep animals off treated areas.

**POTENTIAL HAZARDS:**
- Always wear protective clothing when using this product.
- Wash hands thoroughly with soap and water after handling, before eating, and after using this product.
- Allow treated areas to dry before entering.

**ENVIRONMENTAL HAZARDS:**
- Do not use in areas where ground is frozen.
- Do not use this product on or near desirable woody or herbaceous plants or on areas where their roots may extend.
- Do not contaminate water when disposing of equipment wash waters or rinsate.
- Do not discharge equipment wash water without proper treatment.

**RECOMMENDATIONS FOR USE:**
- Do not use under any conditions of sale or distribution.
- Use under conditions of sale quoted by your dealer, as applicable.
- Use under conditions of sale quoted by your dealer, as applicable.

**CONDITIONS OF SALE:**
- If the product is not used as directed on the label, other than under conditions of sale, the product may be used in accordance with applicable law.
