**Syllit FL FUNGICIDE**

FOR CONTROL OF CERTAIN DISEASES OF APPLES, BANANAS*, CHERRIES*, PEACHES, PEARS AND WALNUTS*.

*NOT REGISTERED FOR USE IN CALIFORNIA.*

**ACTIVE INGREDIENT:**
Dodine (n-dodecylguanidine acetate) 39.6% *

**OTHER INGREDIENTS:** 60.4%

**TOTAL:** 100.0%

*Equivalent to 3.4 pounds Dodine per gallon

EPA Reg. No. 55260-6

EPA Est. No. 55260-BL-001

**KEEP OUT OF REACH OF CHILDREN**

**DANGER PELIGRO**

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

(If you do not understand the label, find someone to explain it to you in detail.)

**NET CONTENT: 2 GALLONS**

**FIRST AID**

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing and shoes. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

**HOT LINE NUMBER**

For MEDICAL and TRANSPORTATION EMERGENCIES ONLY call CHEMTREC® 24 hours a day 800-424-9300.

For PRODUCT USE Information call your Distributor.

“Have the product container or label with you when calling a poison control center or doctor, or going to treatment.”

**NOTE TO PHYSICIAN**

Probable mucosal damage may contraindicate the usage of gastric lavage.
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER
Corrosive. Causes irreversible eye damage. Causes skin irritation. Do not get in eyes, on skin, or on clothing. Harmful if swallowed. Harmful if absorbed through skin. Harmful if inhaled. Avoid breathing spray mist or vapor.
Some materials that are chemical-resistant to this product are barrier laminate or vitron. If you want more options, follow the instructions for category G on an EPA chemical resistance category selection chart.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
All mixers, loaders, applicators and other handlers must wear:
• Coveralls over short sleeved shirt and short pants,
• Chemical-resistant footwear plus socks,
• Chemical-resistant gloves,
• Goggles or face shield,
• Chemical-resistant headgear for overhead exposure,
• Chemical-resistant apron for mixers and loaders

See engineering controls for additional requirements.

USER SAFETY REQUIREMENTS
Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them. Follow manufacturer’s instructions for cleaning /maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENGINEERING CONTROLS
Pilots must use an enclosed cockpit that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170.249(d)(6)).

USER SAFETY RECOMMENDATIONS
User should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of the gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas.

Surface Water and Erosion Control Statement: This product may contaminate water through runoff and has the potential for runoff for several weeks after application. Poorly draining soils and soils with shallow water tables are more prone to produce runoff that contains this product. A level, well maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential for contamination of water from rainfall-runoff. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours. Sound erosion control practices will reduce this product’s contribution to surface water contamination.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulations.

AGRICULTURAL USE REQUIREMENTS
Use the product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 48 hours.
PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated such as plants, soil, or water, is:
• coveralls worn over short-sleeve shirt and short pants,
• chemical-resistant gloves made of any waterproof material,
• chemical-resistant footwear plus socks,
• protective eyewear, and
• chemical-resistant headgear (if overhead exposure).

Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.
Do not induce vomiting unless told to do so by a poison control center or pesticide regulations.

Clothing/PPE immediately if pesticide regulations.

Causes skin irritation. Do not get in eyes, on skin, or on clothing. Harmful if swallowed. Harmful if absorbed potential

• Do not apply less than 7 days from the last application.
• Do not apply more than 9 pints of

Restrictions:

APPLES:

Swath Adjustment

Release Height

AERIAL APPLICATION

Release Height – Do not release spray at a height greater than 10 feet above the ground or crop canopy.

AERIAL APPLICATION

Boom Length – The boom length must not exceed 75% of the wingspan or 90% of the rotor blade diameter.

Swath Adjustment – When applications are made with a cross-wind, the swath will be displaced downwind. The applicator must compensate for the displacement at the downwind edge of the application area by adjusting the path of the aircraft upward. Leave at least one swath unprayed at the downwind edge of the treated field.

APPLES:

Restrictions:

• Do not apply more than 9 pints of SYLLIT FL per acre per year (3.9 lbs ai/acre/year).
• Do not apply more than 3 pints of SYLLIT FL per acre per application.
• Do not apply more than 3 applications per year.
• Do not apply less than 7 days from the last application.
• Do not apply within 7 days of harvest.
Scab (*Venturia inaequalis*) - Protection Schedule

**Ground and Air Application:**

**Syllit FL alone** - Use 3 pints per acre of SYLLIT FL at 7 day intervals to maintain scab control beginning at green tip. Fill the spray tank with clean water half of final desired volume. Start agitation. Slowly add SYLLIT FL at the specified rate. Add water to desired final volume. Mix thoroughly and apply at once. Maintain sufficient agitation during mixing and spraying operations to ensure a uniform spray mixture.

**Syllit FL in tank-mix for resistance management** - Use 1.5 pints per acre of SYLLIT FL at 7 day intervals to maintain scab control beginning at green tip. Tank-mix with a captan based formulation (2 lbs ai/acre) or with a mancozeb based formulation (2.25 lbs ai/acre). Fill the spray tank with clean water half of final desired volume. Start agitation. Slowly add SYLLIT FL at the specified rate. Slowly add captan or mancozeb based formulation at the specified rate. Add water to desired final volume. Mix thoroughly and apply at once. Maintain sufficient agitation during mixing and spraying operations to ensure a uniform spray mixture.

**BANANA: (NOT REGISTERED FOR USE ON BANANA IN CALIFORNIA)**

Restrictions:

- Do not apply more than 7.5 pints of product per acre per year (3.2 lbs ai/acre/year).
- Do not apply more than 1.5 pints of SYLLIT FL per acre per application.
- Do not apply more than 5 applications per year.
- Do not apply less than 7 days from the last application.

Sigatoka (Air Application): Use 0.85 to 1.5 pints per acre of SYLLIT FL as needed to maintain Sigatoka control in a mixture of 19 to 25 pints water/acre and 4 pints mineral oil/acre. Repeat application thereafter at 7 to 15 day interval. It is recommended for subsequent cover sprays to use SYLLIT FL in rotation with other labeled fungicides that have a different mode of action.

**CHERRIES (SOUR AND SWEET): (NOT REGISTERED FOR USE ON CHERRIES IN CALIFORNIA)**

Restrictions:

- Do not apply more than 12 pints of SYLLIT FL per acre per year (5.2 lbs ai/acre/year).
- Do not apply more than 6 applications per year (2 applications at 3 pints of SYLLIT FL per acre (1.3 lbs ai/acre), and 4 applications at 1.5 pints of SYLLIT FL per acre (0.65 lb ai/acre)).
- Do not apply less than 7 days from the last application.
- Do not apply within 7 days of harvest.

**Leaf Spot** (*Blumeriella jaapii anamorph, Coccomyces hiemalis*): Use 1.5 to 3 pints of SYLLIT FL per acre at petal fall or when first leaves unfold. Repeat application thereafter at 7 to 10 day intervals. If conditions favor leaf spot, continue applications through harvest. For resistance management, tank-mix with a captan based formulation (2 lbs ai/acre). Fill the spray tank with clean water half of the final desired volume. Start agitation. Slowly add SYLLIT FL at the specified rate. Slowly add captan at the specified rate. Add water to desired final volume. Mix thoroughly and apply at once. Maintain sufficient agitation during mixing and spraying operations to ensure a uniform spray mixture.

**Post-Harvest Applications to Trees:** Apply 1.5 to 3 pints of SYLLIT FL per acre immediately after harvest and as needed.

**Brown rot blossom blight** (*Monilinia laxa/Monilinia fructicola*) *(States West of the Mississippi River)*: For disease suppression, use 3 pints of SYLLIT FL per acre at the time flower buds begin to open (white bud-popcorn bloom stages). Repeat application at full bloom and again at petal fall. Applications of SYLLIT FL to cherries when temperatures and humidity are excessively high may cause spotting to foliage or fruit.

**PEACHES:**

Restrictions:

- Do not apply more than 9 pints of SYLLIT FL per acre per year (3.9 lbs ai/acre/year).
- Do not apply more than 3 pints of SYLLIT FL per acre per application.
- Do not apply more than 3 applications per year.
- Do not apply less than 7 days from the last application.
- Do not apply later than 5 weeks after petal fall.

**Leaf Curl** (*Taphrina deformans*): Use 3 pints of SYLLIT FL per acre as a dormant or delayed dormant application. Additional applications may be made just before buds swell in the spring.

**Brown rot blossom blight** (*Monilinia laxa/Monilinia fructicola*) *(States West of the Mississippi River)*: For disease suppression, use 3 pints of SYLLIT FL per acre at pink bud. Repeat application at full bloom and again at petal fall.

**Scab** (*Venturia carpophila anamorph, Cladosporium carpophilum*): Use 3 pints of SYLLIT FL per acre at petal fall. Repeat application at 2 and 5 weeks after petal fall.

**Shot hole** (*Wilsonomyces carpophilus*): Use 3 pints of SYLLIT FL per acre at dormant stage, and repeat application at petal fall.
PEARS:
Restrictions:
• Do not apply more than 9 pints of SYLLIT FL per acre per year (3.9 lbs ai/acre/year).
• Do not apply more than 3 pints of SYLLIT FL per acre per application.
• Do not apply more than 3 applications per year.
• Do not apply less than 7 days from the last application.
• Do not apply within 7 days of harvest.

Scab (Venturia pirina) and leaf spot (Fabraea spp.) – Protection Schedule
Ground and Air Application: Use 3 pints per acre of SYLLIT FL at 7 day intervals to maintain scab control beginning at green tip. Fill the spray tank with clean water half of final desired volume. Start agitation. Slowly add SYLLIT FL at the specified rate. Add water to desired final volume. Mix thoroughly and apply at once. Maintain sufficient agitation during mixing and spraying operations to ensure a uniform spray mixture.

WALNUTS: (NOT REGISTERED FOR USE ON WALNUTS IN CALIFORNIA)
Restrictions:
• Do not apply more than 9 pints of SYLLIT FL per acre per year (3.9 lbs ai/acre/year).
• Do not apply more than 3 pints of SYLLIT FL per acre per application.
• Do not apply more than 3 applications per year.
• Do not apply less than 10 days from the last application.
• Do not apply within 7 days of harvest.

Brown rot blossom blight (Monilinia laxa/Monilinia fructicola) - For disease suppression, use 3 pints of SYLLIT FL per acre at pink bud, full bloom, and petal fall.

Scab (Venturia carpophila anamorph, Cladosporium carpophilum) - Use 3 pints of SYLLIT FL per acre at petal fall; Repeat application 2 and 5 weeks later.

Shot hole (Wilsonomyces carpophilus) - Use 3 pints of SYLLIT FL per acre at leaf emergence (bloom through petal fall). Repeat application 2 and 5 weeks later.

Anthracnose (Gnomonia leptostyla) - Use 3 pints of SYLLIT FL per acre when first leaves unfold. Repeat application at 10 to 14 day intervals.

IMPORTANT: READ BEFORE USE
Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once.

By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

CONDITIONS: The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of AGRIPHAR S.A.. To the extent consistent with applicable law, all such risks shall be assumed by the user or buyer.

DISCLAIMER OF WARRANTIES: AGRIPHAR S.A.
