When used as directed, Sklar Disinfectant effectively kills the following microorganisms at room temperature: Herpes Simplex Virus type 1 and 2, Human Immunodeficiency Virus type 1 or 2, Human T-Cell Lymphotropic Virus (HTLV-I and HTLV-II), Influenza Virus, Strain A/Chang, Hong Kong, 1968, and Mumps Virus. It is particularly effective in cleaning and disinfecting in medical facilities, hospitals, surgical centers, operating rooms, and other similar establishments. It is used for disinfecting a wide variety of surfaces, including stainless steel, painted, and plastic surfaces, paper, glass, porcelain, and polyurethane.

DIRECTIONS FOR USE: This product has been determined to be non-toxic by the EPA. It is effective against viruses, bacteria, fungi, yeasts, and spores. It is also effective against a wide range of bacteria, including those that cause tuberculosis, TB, and hepatitis C virus (HCV), and those that cause salmonellosis, listeriosis, and meningitis (meningococcal meningitis). It is effective against a variety of fungi, including Aspergillus, Candida, and Cryptococcus.

For Use as a Pre-Cleaning Instrument Soak: Fill the appropriate container with distilled water, and fill the instrument with the appropriate disinfectant solution. Place the instrument in the container, cover, and Sterilize for 10 minutes. Discard the solution and replace with fresh solution. Repeat the process until all items are clean. The solution can be used for up to 15 minutes, then discarded.

For Use as a Surface Disinfectant: Apply Sklar Disinfectant by spray to pre-cleaned surfaces. Allow to remain for 3 minutes, then wipe dry using a clean paper or cloth towel. Remove all items and rinse. For critical and semi-critical items, follow with the appropriate disinfectant solution. Allow to air dry.

When used as directed, Sklar Disinfectant is non-toxic and effective against a wide range of microorganisms. It is particularly effective in cleaning and disinfecting in medical facilities, hospitals, surgical centers, operating rooms, and other similar establishments. It is used for disinfecting a wide variety of surfaces, including stainless steel, painted, and plastic surfaces, paper, glass, porcelain, and polyurethane.
PRECAUTIONARY STATEMENTS

Contact 1-800-359-3347 for emergency medical treatment information.
