INERT INGREDIENTS:

TOTAL 100.00%

TRIMEC® DMB #2 S.I. Herbicide is intended to be applied by lawn care operators and
operators. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

(continued on next column)

First Aid

If in eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If on skin or clothing:
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If swallowed:
• Give 2-3 glasses of water. If person is not breathing, call 911 or an ambulance, then give artificial
breathing, preferably mouth-to-mouth if possible.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

If inhaled:
• Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial
respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for treatment advice.

Environmental Hazards
This product may be toxic to fish and aquatic invertebrates and may adversely affect non-target
species. Do not apply directly to water, to areas where surface water is present, or to intertidal areas
below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water
adjacent to treated areas. Do not contaminate water when disposing of equipment wash waters or
rinse.

This chemical has properties and characteristics associated with chemicals detected in ground-
water. The use of this chemical in areas where soils are permeable, particularly where the water
table is shallow, may result in groundwater contamination. Application around a cistern or well may
result in contamination of drinking water or groundwater.

NOTICE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric
lavage.

PRECAUTIONARY STATEMENTS

Hazard to Human and Domestic Animals
DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed or absorbed through
skin. Do not get in eyes or on clothing. Avoid contact with skin. Prolonged or repeated skin contact
may cause allergic reactions in some individuals.

Personal Protective Equipment (PPE)
Some materials that are chemical-resistant to this product are natural rubber. If you want more
options, follow the instructions for category A on an EPA chemical-resistance category selection
chart.

All users, loaders, applicators, flaggers, and other handlers must wear:
• protective eyewear,
• long-sleeved shirt and long pants,
• shoes and socks, plus
• chemical resistant gloves
• chemical resistant apron when mixing or loading, cleaning up spills or equipment, or otherwise
exposed to the concentrate.

User Safety Requirements
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for wash-
ables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations
• Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toliet.
• Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly
and put on clean clothing. If pesticide gets on skin, wash immediately with soap and water.
• Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

General Precautions and Restrictions:
• Do not enter or allow people (or pets) to enter the treated area until sprays have dried.
• Do not apply this product in a way that will contact workers or other persons, either directly or
through drift. Only protected handlers may be in the area during application.

SITES: TRIMEC® DMB #2 S.I. Herbicide is intended to be applied by lawn care operators and
landscape personnel for use in ornamental lawns and turf established in ornamental sites. Ornamental sites include turfgrass established around residences, parks, streets, retail outlets,
cemeteries, industrial and institutional buildings. Cool season turfgrass species include Kentucky
bluegrass, perennial ryegrass, and the fescues.

MIXING INSTRUCTIONS WITH WATER AS THE CARRIER:

1. Prepare only the amount of spray mixture which can be used the day that it will be sprayed.
2. Fill the spray tank to 3/4 of the required amount of water. If tank mixtures are being prepared,
add the companion product when the spray tank is approximately 3/4 full.
3. Add TRIMEC® DMB #2 S.I. Herbicide into the spray tank and maintain continuous agitation during mixing and application is essential.
4. Fill the spray tank with 1/2 to 3/4 of the required amount of water and begin agitation. Sufficient
agitation during mixing and application is essential.
5. Finally, add the balance of the required water volume and maintain agitation prior to and during
the application. Apply the spray mixture on the same day of spray preparation.

First Aid (cont.)

If on skin or clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If swallowed:
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

NOTE TO PHYSICIAN:
Probable mucosal damage may contraindicate the use of gastric
lavage.

2217-851_Trimec DMB 2 S.I. 20180307_77_2217_.pdf
APPLICATION RATES FOR ORNAMENTAL TURFGRASS
For Kentucky bluegrass, Perennial Ryegrass: The maximum application rate for established turfgrass is 2.74 pounds (1.25 pounds 2,4-D acid equivalent) per acre. An application rate of 2.0 pounds 2,4-D acid equivalent per acre is acceptable, excluding spot treatments. Limited to two spot treatment applications per year. A minimum of 30 days between applications is required.

The equivalent application rates are presented below:

<table>
<thead>
<tr>
<th>Pounds of 2,4-D Acid Equivalent Per Acre</th>
<th>Maximum Application Rates of TRIMEC® DMB #2 S.I. Herbicide</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.25</td>
<td>2.74 lb./A</td>
</tr>
<tr>
<td>2.74 lb./A</td>
<td>1 oz./1000 sq. ft.</td>
</tr>
</tbody>
</table>

For selective broadleaf control in ornamental turf, apply a maximum of 2.74 pounds of product per acre per application with spray volumes ranging from 20 to 220 gallons per acre. Or, apply a maximum of 1.0 ounce of product per 1,000 square feet of turf per application with spray volumes ranging from 0.5 to 5.0 gallons per 1,000 square feet of turf.

Spray Drift Management
A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, relative humidity) and method of application (e.g., ground, aerial, airblast, chemigation) can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

Droplet Size: Use only medium or coarser spray nozzles according to ASAE (standard 572) definition of standard nozzles or a volume mean diameter of 300 microns or greater for spinning atomizer nozzles.

Wind Speed: Do not apply at wind speeds greater than 15 mph. Only apply this product if the wind speed is less than 4 feet above the crop canopy.

Temperature Inversions: If applying at wind speeds less than 3 mph, the applicator must determine if a) conditions of temperature inversion exist, or b) stable atmospheric conditions exist at or below nozzle height. Do not make applications into areas of temperature inversions or stable atmospheric conditions.

Susceptible Plants: Do not apply under circumstances where spray drift may occur to food, forage, or other plantings that might be damaged or crops thereof rendered unfit for sale, use or consumption. Susceptible crops include, but are not limited to, lettuce, okra, flowers, raspberries (in growing stage), fruit trees (foliage), soybeans (vegetative stage), ornamentals, and most lawns. Do not apply to newly seeded grasses until well established. Do not apply when air temperatures exceed 85°F; some injury may be expected with spot treatments when air temperatures exceed 80°F. Seed can be sown to 3 to 4 weeks after application at recommended rates.

Equipment: All aerial and ground application equipment must be properly maintained and calibrated using appropriate carriers or surrogates.

Additional requirements for ground boom application: Do not apply with a nozzle height greater than 4 feet above the crop canopy. The maximum number of broadcast applications per treatment site is two applications per year. The maximum seasonal rate is 5.5 pounds of product per acre (2.5 lbs 2,4-D acid equivalent per acre), excluding spot treatments. Limited to two spot treatment applications per year. A minimum of 30 days between applications is required.

Storage and Disposal
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container. To prevent cross contamination, do not store near other pesticides, fertilizers, food, feed, or seeds.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray tips, or rinsate is a violation of Federal law and may contaminate groundwater. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control authority or the Hazardous Waste Disposal Emergency Rapid Response nearest EPA Regional Office for assistance.

CONTAINER DISPOSAL: Completely empty bag into formulation equipment. Then dispose of the dripline of trees and other ornamental species. Do not apply to newly seeded grasses until well established. Do not apply when air temperatures exceed 85°F; some injury may be expected with spot treatments when air temperatures exceed 80°F. Seed can be sown to 3 to 4 weeks after application at recommended rates.
