TRIMEC® DMB #2 S.I.

KEEP OUT OF REACH OF CHILDREN

DANGER

Hazards to Human and Domestic Animals

DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed or absorbed through skin. Do not get in eyes or on clothing. Avoid contact with skin. Prolonged or repeated skin contact may cause allergic reactions in some individuals.

Personal Protective Equipment (PPE)

Some materials that are chemical-resistant to this product are natural rubber. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart.

All mixers, loaders, applicators, flaggers, and other handlers must wear:

- protective eyewear,
- long-sleeved shirt and long pants,
- shoes and socks, plus
- chemical resistant gloves,
- chemical resistant apron when mixing or loading, cleaning up spills or equipment, or otherwise exposed to the concentrate.

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

If in eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Seek medical attention.

If on skin:

- Rinse skin immediately with plenty of water for 15-20 minutes.
- Seek medical attention.

If swallowed:

- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for treatment advice.

First Aid

If inhaled:

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for treatment advice.

If swallowed:

- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

General Precautions and Restrictions:

- Do not enter or allow people (or pets) to enter the treated area until sprays have dried.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

SITES:

TRIMEC® DMB #2 S.I. Herbicide is intended to be applied by lawn care operators and landscape personnel for use in ornamental lawns and turf established in ornamental sites. Ornamental sites include turfgrass established around residences, parks, streets, retail outlets, cemeteries, industrial and institutional buildings. Cool season turfgrass species include Kentucky bluegrass, perennial ryegrass, and the fescues.

MIXING INSTRUCTIONS WITH WATER AS THE CARRIER:

1. Prepare only the amount of spray mixture which can be used the day that it will be sprayed.
2. Fill the spray tank with 1/2 to 3/4 of the required amount of water and begin agitation. Sufficient agitation during mixing and application is essential.
3. Add TRIMEC® DMB #2 S.I. Herbicide into the spray tank and maintain continuous agitation to avoid separation.
4. Fill the spray tank to 3/4 of the required amount of water. If tank mixtures are being prepared, add the companion product when the spray tank is approximately 3/4 full.
5. Finally, add the balance of the required water volume and maintain agitation prior to and during the application. Apply the spray mixture on the same day of spray preparation.

TRIMEC® DMB #2 S.I. — Page 1 of 2
APPLICATION RATES FOR ORNAMENTAL TURFGRASS

For Kentucky bluegrass, Festuca spp., and perennial ryegrass: The maximum application rate for established turfgrass is 2.74 pounds (1.25 pounds 2,4-D acid equivalent) per acre per application site. The maximum number of broadcast applications per treatment site is four applications per year. The maximum seasonal rate is 5.5 pounds of product per acre (2.5 lbs 2,4-D acid equivalent per acre), excluding spot treatments. Limited to two spot treatment applications per year. A minimum of 30 days between applications is required.

The equivalent application rates are presented below:

<table>
<thead>
<tr>
<th>Pounds of 2,4-D Acid Equivalent Per Acre</th>
<th>Maximum Application Rates of TRIMEC® DMB #2 S.I. Herbicide</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.25</td>
<td>2.74 lb./A</td>
</tr>
<tr>
<td>2.74 b/A</td>
<td>1 oz./1000 sq. ft.</td>
</tr>
</tbody>
</table>

For selective broadleaf control in ornamental turf, apply a maximum of 2.74 pounds of product per acre per application with spray volumes ranging from 20 to 220 gallons per acre. Or, apply a maximum of 1.0 ounce of product per 1,000 square feet of turf per application with spray volumes ranging from 0.5 to 5.0 gallons per 1,000 square feet of turf.

Spray Drift Management

A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, relative humidity) and method of application (e.g., ground, aerial, airblast, chemigation) can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

Droplet Size: Use only medium or coarser spray nozzles according to ASAE (standard 572) definition of standard nozzles or a volume mean diameter of 300 microns or greater for spinning atomizer nozzles.

Wind Speed: Do not apply at wind speeds greater than 15 mph. Only apply this product if the wind direction favors on-target deposition and there are not sensitive areas (including, but not limited to, residential areas, bodies of water, known habitat for nontarget species, nontarget crops) within 250 feet of the treated field.

Temperature Inversions: If applying at wind speeds less than 3 mph, the applicator must determine if a) conditions of temperature inversion exist, or b) stable atmospheric conditions exist at or below nozzle height. Do not make applications into areas of temperature inversions or stable atmospheric conditions.

Susceptible Plants: Do not apply under circumstances where spray drift may occur to food, forage, or other plantings that might be damaged or crops thereof rendered unfit for sale, use or consumption. Susceptible crops include, but are not limited to, cotton, okra, flowers, grapes (in growing stage), fruit trees (foliage), soybeans (vegetative stage), ornamentals, and many ornamental and vegetables, including tomatoes, beans, and other vegetables, or tobacco. Small amounts of spray drift that might not be visible may injure susceptible broadleaf plants.

Other State and Local Requirements: Applicants must follow all state and local pesticide drift requirements regarding application of 2,4-D herbicides. Where states have more stringent regulations, they must be observed.

Equipment: All aerial and ground application equipment must be properly maintained and calibrated using appropriate carriers or surrogates.

Additional requirements for ground boom application: Do not apply with a nozzle height greater than 4 feet above the crop canopy.

USE PRECAUTIONS: Do not apply this product through any type of irrigation system. Do not pour spray solutions near these plants. Do not spray on carpetgrass, dichondra, nor on lawns or turf where desirable clovers are present.

Use only low-type sprayers. Coarse sprays are less likely to drift. Do not spray root systems of ornamentals and trees. Do not exceed specified dosages for any area. Be particularly careful within the drip line of trees and other ornamental species. Do not apply to newly seeded grasses until well established. Do not apply when air temperatures exceed 85°F. Some injury may be expected with spot treatments when air temperatures exceed 85°F. Seed can be sown 3 to 4 weeks after application at recommended rates.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container. To prevent cross contamination, do not store near other pesticides, fertilizers, food, feed, or seeds.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mix, or rinsate is a Federal law and may contaminate groundwater. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Completely empty bag into formulation equipment. Then dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities by burning. If burned stay out of smoke.

LIMITED WARRANTY AND DISCLAIMER

The manufacturer warrants only that the chemical composition of this product conforms to the ingredient statement given on the label, and that the product is reasonably suited for the labeled uses as applied according to the Directions for Use. The MANUFACTURER NEITHER MAKES NOR INTENDS ANY OTHER EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE EXPRESSLY DISCLAIMED. This limited warranty does not extend to the use of the product inconsistent with label instructions, warnings or cautions, or to use of the product under abnormal conditions such as drought, excessive rainfall, hurricanes, etc. Those factors are beyond the control of the manufacturer or the seller. Any damage arising from a breach of the manufacturer’s warranty shall be limited to direct damages only and shall not include indirect or consequential damages such as loss of profits or values, except as otherwise provided by law.
