Fungicide
A protectant fungicide for the control of powdery mildew in cherry, grapes, and hops.

Group 13 FUNGICIDE
Active Ingredient:
quinoxyfen: 5,7-dichloro-4-(p-fluorophenoxy) quinoline 22.58%
Other Ingredients 77.42%
Total 100.00%
Contains 2.08 lb of active ingredient per gallon.

Keep Out of Reach of Children
CAUTION

Agricultural Use Requirements
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. Refer to the label booklet under “Agricultural Use Requirements” in the Directions for Use section for information about this standard.

For additional Precautionary Statements, First Aid, Storage and Disposal and other use information see inside this label.
Notice: Read the entire label. Use only according to label directions. Before using this product, read Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies at end of label booklet. If terms are unacceptable, return at once unopened.

In case of emergency endangering health or the environment involving this product, call 1-800-992-5994.

Agricultural Chemical: Do not ship or store with food, feeds, drugs, or clothing.
EPA Reg. No. 62719-375
EPA Est. 464-EN-001
300-001812 / 03077431

Precautionary Statements
Hazard to Humans and Domestic Animals
CAUTION
Harmful if Swallowed • Harmful if Absorbed Through Skin
Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, and using the toilet.

Personal Protective Equipment (PPE)
Applicators and other handlers must wear:
• Long-sleeved shirt and long pants
• Chemical-resistant gloves
• Shoes plus socks

User Safety Requirements
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations
Users should:
• Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
• Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Engineering Controls
When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170.240 (b) (4-6)), the handler PPE requirements may be reduced or modified as specified in the WPS.

RR Donnelley
A protectant fungicide for the control of powdery mildew in cherry, grapes, and hops.

**Active Ingredient:**
quinoxyfen: 5,7-dichloro-4-(p-fluorophenoxy)quinoline 22.58%

**Other Ingredients:** 77.42%

**Total:** 100.00%

Contains 2.08 lb of active ingredient per gallon.

**Precautionary Statements**

**Hazards to Humans and Domestic Animals**

**CAUTION**

Harmful if Swallowed • Harmful if Absorbed Through Skin

Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, and using the toilet.

**Personal Protective Equipment (PPE)**

Applicators and other handlers must wear:
· Long-sleeved shirt and long pants
· Chemical-resistant gloves
· Shoes plus socks

**User Safety Requirements**

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

**User Safety Recommendations**

Users should:
· Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet
· Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
· Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

**Engineering Controls**

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR 170.240 [§ 4-6]), the handler PPE requirements may be reduced or modified as specified in the WPS.
Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

· Coveralls
· Chemical-resistant gloves made of any waterproof material
· Shoes plus socks

Environmental Hazards

This product is toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor runoff or drift from the target area. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

This product may contaminate water through drift of spray in wind. This product has a potential for runoff for several months or more after application. Poorly draining soils and soils with shallow watertables are more prone to produce runoff that contains this product. A level, well maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential for contamination of water from rainfall runoff. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours. Sound erosion control practices will reduce this products contribution to surface water contamination.

In counties east of the Rocky Mountains where the gray bat, Indiana bat, and the Ozark big-eared bat occur, do not apply this product one-half hour before dusk to one-half hour after dawn.

General Use Directions

Quintec is a protectant fungicide for the control of powdery mildew infections and must be applied on a protectant schedule (latency is the period between infection of plant tissues and the development of visible symptoms). Quintec is compatible with most commonly used insecticides, miticides and fungicides.

General Use Precautions and Restrictions

Do not graze or harvest forage from cover crops within areas treated with Quintec.

Do not apply this product on cherry, grapes, and hops. Aerial application is permitted on other crops for which this product is registered.

Chemigation: Do not apply this product through any type of irrigation system.

Read carefully and follow all applicable use directions, precautions, and limitations on the respective product labels used in mixtures.

Rotational Crop Restrictions

The following rotational crops may be planted at intervals defined below following the final application of Quintec.

Agricultural Use Requirements (Cont.)

greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. First Aid
If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-992-5994 for emergency medical treatment information.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
• Coversalls
• Chemical-resistant gloves made of any waterproof material
• Shoes plus socks

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Avoid freezing. Store in original container only. In case of leak or spill, use absorbent materials to contain liquids and dispose as waste.

Pesticide Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

Container Handling: Nonrefillable container. Do not reuse or refill this container.
Triple rinse or pressure rinse container (or equivalent) promptly after emptying. Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 psi for at least 30 seconds. Drain for 10 seconds after the flow begins to drip. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures allowed by state and local authorities.

Agricultural Use Requirements (Cont.)
Quintec® fungicide is a protectant fungicide for the control of powdery mildew diseases. Quintec does not control existing or latent powdery mildew infections and must be applied on a protectant schedule (latency is the period between infection of plant tissues and the development of visible symptoms). Quintec is compatible with most commonly used insecticides, miticides and fungicides.

General Use Precautions and Restrictions
• Do not graze or harvest forage from cover crops within areas treated with Quintec.
• Do not aerially apply this product on cherry, grapes, and hops. Aerial application is permitted on other crops for which this product is registered for use.
• Chemigation: Do not apply this product through any type of irrigation system.
• Read carefully and follow all applicable use directions, precautions, and limitations on the respective product labels used in mixtures.

Greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks

**Storage and Disposal**

Do not contaminate water, food, or feed by storage or disposal.

**Pesticide Storage:** Avoid freezing. Store in original container only. In case of leak or spill, use absorbent materials to contain liquids and dispose as waste.

**Pesticide Disposal:** Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

**Container Handling:** Nonrefillable container. Do not reuse or refill this container.

**Triple rinse or pressure rinse container (or equivalent) promptly after emptying.**

First application as follows: Empty the remaining contents into application equipment or a mix tank, and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank, and collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 psi for at least 30 seconds. Drain for 10 seconds after the flow begins to drip. Then flush for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures allowed by state and local authorities.

**General Use Directions**

Quintec® fungicide is a protectant fungicide for the control of powdery mildew infections and must be applied on a protectant schedule (latency is the period between infection of plant tissues and the development of visible symptoms). Quintec is compatible with most commonly used insecticides, miticides and fungicides.

**General Use Precautions and Restrictions**

- Do not graze or harvest forage from cover crops within areas treated with Quintec.
- Do not aerially apply this product on cherry, grapes, and hops. Aerial application is permitted on other crops for which this product is registered for use.
- Chemigation: Do not apply this product through any type of irrigation system.
- Read carefully and follow all applicable use directions, precautions, and limitations on the respective product labels used in mixtures.

**Rotational Crop Restrictions**

The following rotational crops may be planted at intervals defined below following the final application of Quintec.

<table>
<thead>
<tr>
<th>Crops</th>

**Environmental Hazards**

This product is toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor runoff or drift from the target area. Do not contaminate water when cleaning equipment or disposing of equipment washwaters. This product may contaminate water through drift of spray in wind. This product has a potential for runoff for several months or more after application. Poorly draining soils and soils with shallow watertables are more prone to produce runoff that contains this product. A level, well maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential for contamination of water from rainfall runoff. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours. Sound erosion control practices will reduce this product’s contribution to surface water contamination.

In counties east of the Rocky Mountains where the gray bat, Indiana bat, and the Ozark big-eared bat occur, do not apply this product one-half hour after dusk to one-half hour before dawn.

**Directions for Use**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.
practices are recommended:
To delay development of fungicide/bactericide resistance, the following
allowed) Apply no more than two consecutive sprays of Quintec before
is greater (see crop specific sections for the total number of applications
Quintec is in mode of action Group 13—The number
Cherry, Grapes, Hops:
Disease Resistance Management
Application Guidelines
Tank Mixing
Tank Mixing Precautions:
· Read carefully and follow all applicable use directions including
application rates, use precautions, and limitations on the respective
product labels.
· Do not exceed specified application rates or maximum use rates if
products with the same active ingredient are applied together
· For tank mix partners packaged in water soluble packaging, do not use
with products containing boron or mix in equipment previously used to
apply boron-containing mixtures unless the tank and spray equipment
have been adequately cleaned.
· Always perform a (jar) test to ensure compatibility of products used in
tank mixtures.
Tank Mix Compatibility Testing: A jar test is recommended prior to tank
mixing to ensure compatibility of Quintec and other pesticides. Use a clear
glass quart jar with lid and mix the tank mix ingredients in their relative
proportions. Invert the jar containing the mixture several times and observe
the mixture for approximately 1/2 hour. If the mixture ball-ups, forms flakes,
sludges, jels, oily films or layers, or other precipitates, it is not compatible
and the tank mix combination should not be used.
Rainfast Requirement: When applied alone, Quintec is rainfast 1 hour after
application.
Application Guidelines
Application Timing
Apply Quintec before visible symptoms of powdery mildew appear. Quintec
will not control latent or established infections of powdery mildew. If
powdery mildew infection is established, Quintec should be applied in
tank mix combination with a curative fungicide or following application of a
curative spray or, if multiple diseases are present, following application of a
broad-spectrum fungicide. Under low disease conditions (as per a predictive
modeling system), minimum label use rates per application can be used. For
optimum results, use maximum label rates and short application intervals for
severe or threatening disease conditions.

Application Method
Ground: Apply uniformly by ground application in a minimum spray volume
of 30 gallons per acre except as noted in the supplemental labeling. Disease
control may be reduced at low spray volumes if spray coverage is inadequate.
Avoid application under conditions when uniform spray coverage cannot be obtained or when excessive spray drift may occur.
Aerial: Do not aerially apply this product on cherry, grape, and hops.

*When applied as a dilute spray, maintain the per acre use rate.

Specific Use Restrictions:
Cherry
· Preharvest Interval: Do not apply within 7 days of harvest.
· Maximum Application Rate: Do not apply more than 7 fl oz of Quintec per acre per application or more than 35 fl oz of Quintec per acre per calendar year.
· Minimum Spray Interval: 7 days.
· Do not make more than five applications of Quintec per calendar year, nor more than two consecutive applications of Quintec before alternating to a fungicide that has a different mode of action and that is effective on local populations of the target powdery mildew pathogen.

Grape
· Preharvest Interval: Do not apply within 14 days of harvest.
· Maximum Application Rate: Do not apply more than 6.6 fl oz of Quintec per acre per application or more than 33 fl oz of Quintec per acre per calendar year.
· Minimum Spray Interval: 14 days for 3 to 4 fl oz per acre rate; 21 days for 5 to 6.6 fl oz per acre rate.
· Do not make more than five applications of Quintec per calendar year, nor more than two consecutive applications of Quintec before alternating to a fungicide that has a different mode of action and that is effective on local populations of the target powdery mildew pathogen.

Leafy vegetables including amaranth, esculentum, celery, celtuce, chervil, Chinese celery, Chinese spinach, com salt, dandelion, dock (sorrel), edible-leaved chrysanthemum, endive (escarole), Florence fennel (finochio), garden cress, garden purslane, galand chrysanthemum, head lettuce, leaf lettuce, leafy amaranth, New Zealand spinach, orach, parsley, radicchio (red chicory), rhubarb, spinach, fennel, Swiss chard, tampa, upland cress, vine spinach, winter cress, winter purslane, yellow rocket.

Root and tuber vegetables including arracacha, arrowroot, bitter cassava, black salsify, carrot, celeriac (celery root), chayote (root), chicory, Chinese artichoke, chufa, dasheen (taro), edible burdock, edible canna, garden beet, ginger, ginseng, horseradish, Jerusalem artichoke, keren, oriental radish (daikon), parsnip, potato, radish, rutabaga, safaty (oyster plant), skirret, Spanish salsify, sugar beet, sweet cassava, sweet potato, tanier, true, yam, turmeric, turnip, turnip-rooted chervil, turnip-rooted parsley, yam bean.

Disease Resistance Management
Cherry, Grapes, Hops: Quintec is in mode of action Group 13. The number of applications of Quintec per season must not exceed three applications or 50% of the total number of powdery mildew sprays per season, whichever is greater (see crop specific sections for the total number of applications allowed). Apply no more than two consecutive sprays of Quintec before alternating to a fungicide that has a different mode of action and that is effective on local populations of the target powdery mildew pathogen.

To delay development of fungicide/bactericide resistance, the following practices are recommended:
· Avoid the consecutive use of Quintec or other target site of action
Group 13 fungicides/bactericides that have a similar target site of action on the same pathogens.
· Use tank mixtures or premixes with fungicides/bactericides from different
target site of action groups as long as the involved products are all
registered for the same use and are both effective at the tank mix or
prepack rate on the pathogen(s) of concern.
· Base fungicide/bactericide use on a comprehensive Integrated Pest
Management (IPM) program.
· Monitor treated fungal/bacterial populations for loss of field efficacy.
· Contact your local extension specialist, certified crop advisors, and/or
manufacturer for fungicide/bactericide resistance management and/or IPM
recommendations for specific crops and resistant pathogens.
· For further information or to report suspected resistance, you may contact
your local Dow AgroSciences representative or by calling 800-258-3033.

Mixing Instructions
Fill the spray tank to at least one-half the required spray volume and start
agitation. Add (in order) dry flowable, wettable powder, and Quintec or other
flowable (aqueous suspension) products to the spray tank. Then add the
specified rate of each water-soluble concentrate and solution products. Allow time
for thorough mixing after adding each product. Finish filling spray tank and
maintain continuous agitation in the spray tank during mixing, filling and
spraying operations.

Oil Sprays
Oil sprays may be integrated as part of a powdery mildew management
program. Consult local university extension for specific information.

Use of Surfactants
Quintec contains sufficient surfactant to ensure mixability and plant
coverage. The use of additional surfactant is not required.

Application Method
Ground: Apply uniformly by ground application in a minimum spray volume
of 30 gallons per acre except as noted in the supplemental labeling. Disease
control may be reduced at low spray volumes if spray coverage is inadequate.
Avoid application under conditions when uniform spray coverage cannot be obtained or when excessive spray drift may occur.
Aerial: Do not aerially apply this product on cherry, grape, and hops.

practices are recommended:
To delay development of fungicide/bactericide resistance, the following
are recommended:
- Apply no more than two consecutive sprays of Quintec before
  alternating to a fungicide that has a different mode of action and that
  is effective on local populations of the target powdery mildew pathogen.
- Do not make more than five applications of Quintec per calendar year,
  nor more than 33 fl oz of Quintec per acre per application.
- Quintec contains sufficient surfactant to ensure mixability and plant
  coverage. The use of additional surfactant is not required.

Tank Mixing
Quintec may be applied in tank mix combination with labeled rates of other
pesticides, including fungicides, insecticides, or other chemicals used in
the culture of the labeled crop provided: (1) the tank mix product is labeled
for the timing and method of application for the intended use; and (2) tank
mixing with Quintes or other pesticides is not prohibited by the label of the
tank mix product.

Tank Mixing Precautions:
1. Read carefully and follow all applicable use directions including
   application rates, use precautions, and limitations on the respective
   product labels.
2. Do not exceed specified application rates or maximum use rates if
   products with the same active ingredient are applied together.
3. For tank mix partners packaged in water soluble packaging, do not use
   with products containing boron or mix in equipment previously used to
   apply boron-containing mixtures unless the tank and spray equipment
   have been adequately cleaned.
4. Always perform a (jar) test to ensure compatibility of products used in
   tank mixtures.

Tank Mix Compatibility Testing: A jar test is recommended prior to tank
mixing to ensure compatibility of Quintec and other pesticides. Use a clear
glass quart jar with lid and mix the tank mix ingredients in their relative
proportions. Invert the jar containing the mixture several times and observe
the mixture for approximately 1/2 hour. If the mixture bails-up, forms flakes,
sludges, jels, oily films or layers, or other precipitates, it is not compatible
and the tank mix combination should not be used.

Rainfast Requirement: When applied alone, Quintec is rainfast 1 hour after
application.

Application Guidelines
Application Timing
Apply Quintec before visible symptoms of powdery mildew appear. Quintec
will not control latent or established infections of powdery mildew. If
powdery mildew infection is established, Quintec should be applied in
tank mix combination with a curative fungicide or following application of a
curative spray or, if multiple diseases are present, following application of a
broad-spectrum fungicide. Under low disease conditions (as per a predictive
modeling system), minimum label use rates per application can be used. For
optimum results, use maximum label rates and short application intervals for
severe or threatening disease conditions.

Application Method
Ground: Apply uniformly by ground application in a minimum spray volume
of 30 gallons per acre except as noted in the supplemental labeling.
Disease control may be reduced at low spray volumes or if spray coverage
is inadequate. Avoid application under conditions when uniform spray
coverage cannot be obtained or when excessive spray drift may occur.

- **Minimum Spray Interval:** 7 days.
- **Do not make more than four applications of Quintec per calendar year, nor more than two consecutive applications of Quintec before alternating to a fungicide that has a different mode of action and that is effective on local populations of the target powdery mildew pathogen.

**Terms and Conditions of Use**

If terms of the following Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies are not acceptable, return unopened package at once to the seller for a full refund of purchase price paid. Otherwise, use by the buyer or any other user constitutes acceptance of the terms under Warranty Disclaimer, Inherent Risks of Use and Limitations of Remedies.

**Warranty Disclaimer**

Dow AgroSciences warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. Dow AgroSciences MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

**Inherent Risks of Use**

It is impossible to eliminate all risks associated with use of this product. Crop injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable temperatures, soil conditions, etc.), abnormal conditions (such as excessive rainfall, drought, tornados, hurricanes), presence of other materials, the manner of application, or other factors, all of which are beyond the control of Dow AgroSciences or the seller. All such risks shall be assumed by buyer.

**Limitation of Remedies**

To the extent permitted by law, the exclusive remedy for losses or damages resulting from this product (including claims based on contract, negligence, strict liability, or other legal theories), shall be limited to, at Dow AgroSciences’ election, one of the following:

1. Refund of purchase price paid by buyer or user for product bought, or
2. Replacement of amount of product used.

To the extent permitted by law, Dow AgroSciences shall not be liable for losses or damages resulting from handling or use of this product unless

Dow AgroSciences is promptly notified of such loss or damage in writing.

In no case shall Dow AgroSciences be liable for consequential or incidental damages or losses.

The terms of the Warranty Disclaimer, Inherent Risks of Use, and Limitation of Remedies cannot be varied by any written or verbal statements or agreements. No employee or sales agent of Dow AgroSciences or the seller is authorized to vary or exceed the terms of the Warranty Disclaimer or Limitation of Remedies in any manner.
