A UNIQUE BROMOXYNIL PLUS MCPA FORMULATION FOR CONTROL OF CERTAIN
BROADLEAF WEEDS IN SMALL GRAINS (WHEAT, BARLEY, OATS AND RYE), CONSERVATION
RESERVE PROGRAM (CRP) AREAS, GRASSES GROWN FOR SEED PRODUCTION AND FLAX

ACTIVE INGREDIENT:
Octoxynol, octyloxynol or ethoxyoxynol (3,5-dibromo-4-hydroxybenzoxonitrile). .......................... 31.7%*
Isoxocal ester of 2-methyl-chloropropionic acid** .............................................................. 34.0%**
INERT INGREDIENTS: .................................................................................................................. 34.3%
TOTAL .................................................................................................................................... 100.0%
* Bromoxynil octanoate equivalent to 21.8% of bromoxynil or not less than 2.0 pounds of bromoxynil per gallon.
** Equivalent to 21.6% 2-methyl-chloropropionic acid or not less than 2.0 pounds MCPA acid per gallon.
Patent No. 6,232,272

WARNING – AVISO
Si usted no entiende la etiqueta, busque a alguien para que se le explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)

For Chemical Spill, Leak, Fire, or Exposure, Call CHEMTREC (800) 424-9300.
For Medical Emergencies Only, Call 877-325-1840
Product of United Kingdom

FIRST AID
IF SWALLOWED:
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

IF INHALED:
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
• Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency medical treatment information.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Harmful if swallowed or absorbed through skin or inhaled. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category F on an EPA chemical-resistance category selection chart.

Applicators and other handlers must wear: coveralls over a long-sleeved shirt and long pants, chemical-resistant gloves such as barrier laminate, butyl rubber, nitrile rubber, or viton gloves, a chemical-resistant apron when cleaning equipment, protective eyewear, chemical-resistant headgear for overhead exposure, and chemical-resistant footwear plus socks. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washable, use detergent and hot water. Keep and wash PPE separately from other laundry.

If you will handle a total of 60 gallons or more of this product per day, you must use a mechanical transfer system for all mixing and loading operations. If this product is packaged in a 30-gallon drum, you must use a mechanical transfer system which terminates in a drip-free hard coupling which may be used only with a spray or mix tank which has been fitted with a compatible coupling. If you do not presently own or have access to a mechanical transfer system with this type of coupling, contact your dealer for information on how to obtain such a system or to modify your present system. When using a mechanical transfer system, do not remove or disconnect the pump or probe from the container until the container has been emptied and rinsed. The pump or probe system must be used to rinse the empty container and to transfer the rinsate directly to the mixing or spray tank.

Application from a tractor with a completely enclosed cab or aerial application is required whenever this product is applied to 360 or more acres in a day. The closed systems and enclosed cab must be used in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agriculturalists [40 CFR 170.240(b)(4-6)]. The handler PPE requirements may be reduced or modified as specified in the WPS.

To reduce exposure to residues, wash the spray rig, tractor, and all other equipment used to handle or apply this product with water daily or before using the equipment for any other purpose.

APPLICATION BY CHEMIGATION must be done by fixed pipe, overhead sprinkler systems or hand moved pipe. If hand moved pipe is used for chemigation, the pipe must not be handled in any way until 24 hours after chemigation has been completed and residues have been flushed from the system. When applying by chemigation, no person may enter the application site unless in an enclosed vehicle.

DURING AERIAL APPLICATIONS, human flaggers are prohibited unless in enclosed vehicles. Aerial application is prohibited within 500 feet of residential areas (e.g., homes, schools, hospitals, shopping areas, etc.).

USER SAFETY RECOMMENDATIONS

Users should:
• Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
• Remove clothing immediately if pesticide gets inside.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to wildlife and fish. Use with care when applying to areas frequented by wildlife or adjacent to any body of water. Do not apply when weather conditions favor drift to target areas. Do not contaminate water when disposing of equipment washwater. Do not apply directly to water, or to areas where surface water is present or to interstitial areas below the mean high water mark.

PHYSICAL AND CHEMICAL HAZARDS

Do not use or store near heat or open flame.

WARNING

WildCard® XTRA Herbicide contains low volatile isopropyl ester of MCPA. At high air or ground surface temperatures, vapors from this product may cause injury to susceptible plants. This fact should be considered when applying WildCard® XTRA.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label before using this product.

Do not apply this product in a way that will contaminate the area during application. For any required precautionary statements, use this product only in accordance with its label instructions. It contains requirements for the protection of agriculture, cultural activities, and wildlife. It contains requirements for specific instructions and exceptions pertaining to restricted-entry intervals. The requirements in this Standard do not override the requirements of the pesticide label. Do not enter or allow worker entry into treated areas until such time as the product is no longer hazardous to wildlife, agriculturalists, and others exposed to the treated area.

STORAGE

STORAGE: Do not contaminate water, food, or above 125°F. If allowed to freeze, remix before use.

PESTICIDE DISPOSAL: Wastes resulting from the use of this pesticide must be disposed of in an environmentally safe manner. Container may be considered a hazardous waste and should be disposed of according to applicable Federal, State, and local regulations.

RETURNABLE - REFILLABLE CONTAINERS: by Helena Agri-Products or a registered establishment. The container must only be used for the intended purpose. Prior to refilling, inspect the container for fractures, holes, or cracks. Do not refill or transport. If the container is not being refilled, it must be returned to the manufacturer or a registered establishment.

WildCard® XTRA is formulated as an emulsifiable concentrate containing 3.33% Wt/Wt of MCPA. WildCard® XTRA is a selective postemergent herbicide for use on a variety of grasses and broadleaf weeds. It is effective on the majority of weeds but may be limited in its use on some crops. WildCard® XTRA is nonselective on certain crops, including corn, soybeans, and cotton. When using WildCard® XTRA, it is important to follow all precautions and instructions on the label to ensure safe and effective use.

MIXING, LOAD

2.5 Gallon Containers

It is strongly recommended that special care be taken during application to avoid possible drip or splash.
AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is coveralls over a long-sleeved shirt and long pants, chemical-resistant gloves such as nitrile, vinyl or barrier laminate, chemical-resistant footwear plus socks, chemical-resistant headgear for overhead exposure and protective eyewear.

STORAGE AND DISPOSAL

STORAGE: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited. Store at temperatures above 32°F if allowed to freeze, remix before using.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

RETURNABLE – REFILLABLE CONTAINERS: This material may be repackaged in 15 or 30 gallon returnable-refillable containers by Helena or a registered establishment under contract to Helena. After use, return the container to the point of purchase or designated locations. This container must only be refilled with WildCard® XTRA. DO NOT REUSE THE CONTAINER FOR ANY OTHER PURPOSE. Prior to returning, inspect thoroughly for damage such as cracks, punctures, abrasions and damaged or worn out threads on closure devices. Do not refill or transport damaged or leaking containers. Check for leaks after refilling and before transportation. If the container is not being refilled, return it to the point of purchase.

GENERAL INFORMATION

WildCard® XTRA is formulated as an emulsifiable concentrate containing the equivalent of 2 lbs. per gallon of bromoxynil and 2 pounds per gallon of MCPA.

WildCard® XTRA is a selective postemergence herbicide for control of important broadleaf weeds infesting small grains (wheat, barley, oats, rye), conservation reserve program areas, and grass grown for seed. Optimum weed control is obtained when WildCard® XTRA is applied to actively growing weed seedlings. WildCard® XTRA is primarily a contact herbicide, therefore thorough coverage of the weed seedlings is essential for optimum control.

WildCard® XTRA has little residual activity. Therefore subsequent flushes of weeds will not be controlled by the initial treatment. Generally crops that form a good canopy will help shade subsequent weed flushes. However, certain crops or short-stem varieties, for example Yucca Raja wheat, may not develop the crop canopy fast enough to shade the subsequent flushes of weeds.

Occasional transient leaf burn may occur. The temporary leaf burn is similar to that seen with liquid fertilizer. Because the activity of WildCard® XTRA is mainly contact, recovery of the crop is generally rapid with no lasting effect. Frequency and amount of leaf burn may be greater when crops are stressed by abrasive winds, cool to cold evening temperatures or mechanical injury, such as that caused by hail, sheet or insect feeding. To reduce the potential for temporary leaf burn, applications should be made to dry foliage in the recommended spray volumes per acre when weather conditions are not extreme.

MIXING, LOADING AND HANDLING INSTRUCTIONS

2.5 Gallon Containers

It is strongly recommended that special care be taken in mixing and loading this product. Hands should be placed on the container in such a way as to avoid possible drip or splash.

30 Gallon and Bulk Containers

If you will handle a total of 60 gallons or more loading operations. If this product is picked up by a loader and then transferred to another tank, such as when you do not presently own or have access to a water source on your property, or connect the pump or probe from the source must be used to fill the empty container. WildCard® XTRA ALONE: Fill the spray tank to WildCard® XTRA. Add water to the spray tank during application.

TANK MIXTURES: WildCard® XTRA can be applied to approved crops. Refer to the specific crop’s label for mixing and application. In addition, fill the sprayer tank with water thoroughly mixed with water to add the second level. If tankmixing with other product types, use in water thoroughly before adding another liquid in water. Maintain sufficient agitation while mixing or running without agitation for short periods of time. If tank mixing with products other than those factory spray preparation. To test for compatability, add all ingredients in the same manner as the mixture for spraying. Indications of incompatibility safety and weed control, follow all caution statements.

SPRAYABLE LIQUID

WildCard® XTRA can be applied in combination with other sprays. Always predetermine the use of the product together with the use of the other sprayer. Leaf burn may occur when WildCard® XTRA. Always predetermine the spray sequence and mixtures with WildCard® XTRA sensitivity to WildCard® XTRA.

WildCard® XTRA can be used to control ground application. Use a standard herbicide boom sprayer that is no finer than 50 mesh nozzle tips and select a sprayer volume and delivery system and thorough coverage use of flat fan nozzle types and lower spray pressures that ensures optimum control. Raindrop® nozzles be reduced. In general, a spray volume of 10 to 20 gallons of water at a minimum spray pressure of 50 psi as compared to a maximum ground speed of 5 mph is adequate results in poor spray coverage. Ground rnp application using less

As soon as possible, wash immediately to any body of water, xing of equipment washwater, the mean high water mark.

Dryrentals, vapors from thi

before using this product.
35040 Wildcard Xtra LP 5/22/08 12:28 PM Page 1 (3,1)

ough drift. Only protected handlers shall be present. It is the responsibility of the handler to ensure that the container is not transferred to a non-protected handler. The handler must be identified at the time of transfer.

CFR part 173. This standard container is designed to contain, handle, and transport hazardous materials safely. It is equipped with protective equipment (PPE), and is recognized by the Worker Protection Standards (WPS) as a chemical-resistant headgear for use in these conditions.

2 hours. This is a general guideline for the preparation of the pesticide mixture. The actual time required may vary depending on the specific conditions and equipment used.

AERIAL APPLICATION
- Use only drift and wind conditions that are suitable for aerial application.
- Apply Wildcard Xtra to corn and soybean fields at recommended rates to achieve effective weed control. The application should be made when the crop is in the early to mid-stretch stage.

SPECIFIC REQUIREMENTS FOR API
- The pesticide must be applied in a manner that minimizes drift and runoff.
- The pesticide must be compatible with the agricultural equipment used.
- The application area must be free from obstacles that could affect the spray pattern.

APPLICATION PROCEDURES
- Use a standard boom spray or a self-propelled sprayer designed for aerial application.
- Use the recommended application rate of 2 gallons per acre (gpa) per acre for corn and 3 gallons per acre (gpa) per acre for soybean fields.
- The application should be made when the crop is in the early to mid-stretch stage.
- The application should be made when the wind speed is below 10 mph.
- The application should be made when the temperature is between 60°F and 80°F.

CROP INJURY
- The application of Wildcard Xtra should not cause injury to non-target crops.
- The application of Wildcard Xtra should not cause injury to non-target plants.
- The application of Wildcard Xtra should not cause injury to non-target animals.

Allow sufficient time for the pesticide to be absorbed into the foliage of the target crop. Do not apply in conditions that favor drift and runoff. The application should be made when the crop is in the early to mid-stretch stage.
AERIAL APPLICATION

Use off-axis discs, cones and nozzle types and arrangements that will provide for optimum spray distribution and maximum coverage. In general, minimum spray volume of 5 GPA and a maximum pressure of 40 psi are recommended. A minimum spray volume of 3 gallons per acre may be used if crop canopy and weed density allow adequate spray coverage. Aerial applications using less than 5 gallons of spray volume per acre may result in reduced weed control.

Do not apply during inversion conditions, when winds are gusty or when other conditions favor poor spray coverage and/or target spray movement.

SPRINKLER IRRIGATION APPLICATION

WildCard® XTRA Herbicide can be applied through sprinkler irrigation systems to small grains and grasses grown for seed.

Apply WildCard® XTRA Herbicide through sprinkler systems including center pivot, lateral move, side (wheel) roll, solid set or hand move irrigation systems only. If hand moved pipe is used for cherrigation, the pipe must not be moved in any way until 24 hours after cherrigation has been completed and residues have been flushed from the system. When applying by cherrigation, no person may enter the application site unless in an enclosed vehicle. Do not apply this product through any other type of irrigation system.

SPECIFIC REQUIREMENTS FOR APPLICATION THROUGH AUTOMATED SPRINKLER IRRIGATION SYSTEM

1. The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.

2. The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

3. The pesticide injection pipeline also must contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.

4. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.

5. The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.

6. Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

7. Do not apply when wind speed favors drift beyond the area intended for treatment.

8. Agitation is recommended in the pesticide supply tank when applying the WildCard® XTRA Herbicide.

9. WildCard® XTRA Herbicide should be applied continuously for the duration of the water application with center pivot and continuous lateral move systems. Application of WildCard® XTRA Herbicide should be made during the last 30-45 minutes of the irrigation set with other overhead sprinkler systems.

10. For best performance, set the sprinkler system to deliver approximately 0.5 inch or less of water per acre.

11. Remove scale, pesticide residues and other foreign material from the supply tank and entire injector system. Flush with clean water.

12. If WildCard® XTRA Herbicide is diluted in the supply tank, fill the tank with half of the water amount desired, add the WildCard® XTRA and then add remaining water amount with agitation. Always dilute with at least 4 parts water to 1 part WildCard® XTRA.

13. Start the sprinklers and then inject WildCard® XTRA Herbicide into the irrigation line. WildCard® XTRA should be injected with a positive displacement pump into the main line at least 8 feet ahead of a right angle turn to insure adequate mixing. Refer to the WildCard® XTRA Herbicide label for detailed information on application rates and timings.

CHEMICATION USER PRECAUTIONS

Application of more than 0.5 inch/acre of irrigation water may result in decreased product performance on certain soils.

Do not apply when conditions favor drift when system connections or fittings leak, or when nozzles do not provide uniform distribution.

Allow sufficient time for pesticide to be flushed through all the lines and nozzles before turning off irrigation water.

Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from non-uniform distribution of treated water.
be helpful in obtaining uniform weed control, and nozzles should be used to obtain uniform local extension service.

- spray distribution and maximum coverage recommended. A minimum spray volume is the maximum coverage in x/y coverage. Aerial applications using less water spray coverage and/or off-tary volume per acre and not applying when

- all grains and grasses grown for seed.

- rail move, slide (wheel) roll, roll solid set or hand roll not be handled in any way until 24 hours

- When applying by chemigation, no person through any other type of irrigation system.

**ILLUSTRATION SYSTEM**

- insure appropriate location on the inlet check valve to prevent the flow of fluid back to the control manifold valve located on the intake rail being withdrawn from the supply tank

- the pesticide injection pump when the water will stop the water pump motor when the system is closed.

- pump (e.g., diaphragm pump) effectively able of being fitted with a system interlock.

RD XTRA Herbicide,

- water application with center pivot and center pivot manure in the last 20-45 minutes of the manure application.

- less water per acre, not entire injector system. Flush with clean water the amount desired, add the WildCard XTRA to the manure injection pump, turn on the pump a 1 part WildCard XTRA to 1 part Wild

- line. WildCard XTRA should be injected as recommended. Refer to the nozzle specification and settings.

**INS
t**

- ct performance on certain soils.

- when nozzles do not provide uniform distribution of treated water.

Do not connect an irrigation system used for pesticide application to a public water system.

If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.

A person knowledgeable of the chemigation system and responsible for its operations, or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need arise.

**GENERAL HERBICIDE LIST**

Postemergence application of WildCard XTRA Herbicide will control the following weeds when sprayed in the seeding stage. Maximum weed stage of growth is listed under WildCard XTRA RECOMMENDATIONS.

PRODUCT   RATE    CROP
WILDGARD® 0.9 pint/A Apply to flax 2 to 6 inches in height.  
XTRA     Do not apply WILDGARD® XTRA to  
         flax during or after the bud stage.  
         Apply to MOST SUSCEPTIBLE weeds  
         that do not exceed the 4-leaf stage,  
         2 inches in height or 1 inch in diameter,  
         whichever comes first.

RESTRICTIONS AND PRECAUTIONS: Flax (Linum usitatissimum only)
• Do not apply if temperatures are expected to exceed 85°F at or 3 days following application or crop injury may occur.
• Unacceptable crop injury may occur following WILDGARD® XTRA application to flax grown on high organic, peat type soils.
• Application under high humidity conditions can injure flax.
• Unless otherwise instructed, do not apply WILDGARD® XTRA to flax with crop oil concentrate, surfactants or nitrogen solutions.
• Do not use on ornamental flax.

CONDITIONS OF SALE – LIMITED WARRANTY  
AND LIMITATIONS OF LIABILITY AND REMEDIES

Read the Conditions of Sale – Warranty and Limitations of Liability and Remedies before using this product. If the terms are not acceptable, return the product, unopened, and the full purchase price will be refunded.

The directions on this label are believed to be reliable and should be followed carefully. Insufficient control of pests and/or injury to the crop to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Helena Chemical Company (the "Company") or seller. In addition, failure to follow label directions may cause injury to crops, animals, man or the environment.

The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the directions for use subject to the factors noted above which are beyond the control of the Company. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law.

The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Helena Chemical Company’s election, one of the following:
1. Refund of the purchase price paid by buyer or user for product bought, or
2. Replacement of the product used.

To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.

**FIRST AID**

**IF SWALLOWED:**
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

**IF ON SKIN OR CLOTHING:**
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

**IF IN EYES:**
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

**IF INHALED:**
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

---

**HOT LINE NUMBER**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency medical treatment information.
