For additional information on Insect Resistance Management:
• Visit the Insecticide Resistance Action Committee (IRAC) on the web at http://www.irac-online.org/.

The zone of protection is the area around and within the corn root where Force 3G Insecticide has activity against seed-, plant- and root-feeding applications may be made by (1) directing the granules into the planter shoe with the seed, or (2) placing the applicator tube directly behind the planter

At-Planting In-Furrow Treatment
For applications when activity of rootworm larvae is first observed. Make this application in-furrow within 30 days of planting in areas where highly erodible land is adjacent to aquatic bodies, the 25-foot buffer/levee area must be left as is or other natural vegetation.

Highly Erodible Land (HEL)
When used on erodible soils, best management practices for minimizing runoff must be employed. When applying to highly erodible land (HEL) draining to water bodies, consultation with the Natural Resources Conservation Service (NRCS) and/or other agricultural agencies will ensure that effective efforts to control and reduce the potential for adverse effects to aquatic organisms.

DO NOT
GRANULES MUST BE INCORPORATED INTO THE TOP ONE INCH OF SOIL USING TINES, PRESS WHEELS, CLOSING WHEELS OR OTHER SUITABLE EQUIPMENT.

grubs and wireworms. Place the granules in a 7-inch wide band across the open seed furrow between the furrow openers and the press wheels.

Apply Force 3G Insecticide at planting time for the control of corn rootworms, cutworms, seedcorn maggots, seedcorn beetles, lesser corn stalk borer, white

At-Planting Band Treatment
In-Furrow:
Place granules directly in the seed furrow behind the planter front of or behind the press wheel. A planter band placement of Force 3G Insecticide in the seed furrow behind the planter shoe helps protect the seed and the soil adjacent to it by killing seedcorn maggot larvae during their most active period. This practice is especially important in areas where highly erodible land is adjacent to aquatic bodies.

DO NOT
APPLICATION. USE FORCE 3G INSECTICIDE ONLY ONCE PER CROP.

other in-furrow treatment(s) were applied or emerged.

These colors: black, 123, 348, 393

DO NOT DISCARD THIS CONTAINER. Do not attempt to open or tamper with the container. Completely empty container into application equipment. All SMARTBOX containers must be returned to the manufacturer for proper disposal.

PYRITOXIN worst Only

For retail sale to and use only by Certified applicators, or persons under their direct supervision, and only for those uses Covered by the Certified applicator’s Certification.

For retail sale only by Certified Applicators, or persons under their direct supervision, and only for those uses Covered by the Certified Applicator’s Certification.

Restrict Use Pesticide Due to Toxicity to Fish and Aquatic Organisms

DUE TO TOXICITY TO FISH AND AQUATIC ORGANISMS FOR RETAIL SALE TO AND USE ONLY BY CERTIFIED APPLICATORS OR PERSONS UNDER THEIR DIRECT SUPERVISION AND ONLY FOR THOSE USES COVERED BY THE CERTIFIED APPLICATOR’S CERTIFICATION.
This pesticide is very highly toxic to freshwater and estuarine fish and invertebrates. Drift and runoff may be hazardous to aquatic organisms in neighboring streams. Do not apply directly to water or to areas where surface water is present, to irrigation areas below the highest water table. Do not contaminate water during application. The insecticide is very toxic to earthworms. Use this product an inch or more below the surface. This product may contaminate water when disposing of equipment wash water.

For Use to Control Insects on Field Corn, Popcorn, Seed Corn and Sweet Corn

Contains a Pyrethroid Insecticide (Tefluthrin)

CAUTION

Avoid contact with eyes, skin, or clothing

Wash thoroughly with soap and water after handling product.

FIRST AID

If swallowed:

Call a poison control center or doctor immediately for treatment advice

Rinse skin immediately with plenty of water for 15-20 minutes

Have per

If in eyes:

Hold eye open and rinse slowly and gently with water for 15-20 minutes

Do not induce vomiting unless told to do so by the poison control center or doctor

If on skin or clothing:

Take off contaminated clothing

Wash exposed areas once with soap and water

If inhaled:

Move person to fresh air

Do not induce vomiting unless told to do so by the poison control center or doctor

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth

If person is breathing but is unconscious, call a poison control center or doctor immediately for treatment advice

If in eyes:

Hold eye open and rinse slowly and gently with water for 15-20 minutes

If for medical advice, call: 1-888-462-6822

If for product information, call: 1-800-1075-5481

**KEEP OUT OF REACH OF CHILDREN**

**REVIEW SAFETY PRECAUTIONS**

Drift and runoff may be hazardous to aquatic organisms in neighboring areas

Drift and runoff may be hazardous to aquatic organisms in neighboring areas

Do not contaminate water when disposing of equipment wash water

CAUTION

This pesticide is very highly toxic to freshwater and estuarine fish and invertebrates

Environmental Hazards

Onset may occur immediately to 4 hours after exposure and may last 2-30 hours without apparent skin damage

Skin exposure may result in a transient sensation described as a tingling, itching, burning or prickly feeling

Relief from the skin sensation may be obtained by applying an oil-based cream

Wash exposed areas once with soap and water

CAUTION

Do not use if labeled net weight is less than 95% of net weight

**Net Weight 50 lbs.**
