PRECAUTIONARY STATEMENTS
ENVIRONMENTAL HAZARDS
This product is toxic to fish. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters. Do not apply when weather conditions favor drift from target areas.

STORAGE & DISPOSAL
Pesticide Storage: Store product in original container in a locked storage area. Use within 3 months after opening. Pesticide Disposal: If partially filled - Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain. Container Disposal: If empty - Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

NOTICE: To the extent consistent with applicable law, Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. To the extent consistent with applicable law, buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

In case of an emergency involving this product, call 1-800-265-0761.

Kills Ants Outside, So They Can’t Come Inside

Amdro Ant Block
HOME PERIMETER ANT BAIT

KEEP OUT OF REACH OF CHILDREN
CAUTION!/¡PRECAUCIÓN!

ACTIVE INGREDIENT:
Hydrononylon (CAS No. 67485-28-4) .98%
OTHER INGREDIENTS: .92%
TOTAL: 100.00%
(1.8 fl. oz. contains .14 oz. of active ingredient)
HOME PERIMETER TREATMENT

2.5 lbs. treats 1,800 linear ft. as a 1 ft. band around the outside perimeter.

Granules are carried directly into the mound by workers as food for the colony. When the queen is dead, the mound dies.

Kills Carpenter Ants, Texas Leafcutting Ants, Argentine Ants, and more as listed.

WHY THIS PRODUCT IS SO EFFECTIVE:
1. This product is highly attractive to many ant species. The granules are carried directly into the mound by workers as food for the colony.
2. Inside the mound, the bait is passed to the queen, as well as to other ants. By the end of one to four weeks, the queen and most of the insects in the mound will have eaten this product and died.
3. When the queen is dead, no new worker ants can be produced, so the mound dies.
4. Ants think that Amdro is food. They carry it into the colony and share it with other ants and the queen. When the queen dies, the colony dies.

GENERAL INFORMATION: This product is attractive to many ant species, and the delayed action of hydroquinone allows foraging ants to bring the bait back to the nest so that the entire colony, including the queen(s), is destroyed. You should see fewer ants within a week of treatment. Some species may require additional applications to achieve maximum control.

DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product by a method that will contaminate any person or pet, either directly or through drift. Keep people, pets, and pets' out of the application area. This product is not effective on crops. numéro: plancher haut, grains for sale or other commercial use, or for commercial seed production or for research purposes. Do not use this product on vegetables or other food crops. This product will retain its effectiveness for up to 3 months after the package has been opened.

OUTDOOR USE:
This product controls sweet ants, Argentine ants, harvester ants, carpenter ants, control ants, crazy ants, fire ants, ghost ants, harvester ants, odorous house ants, pavement ants, Pharaoh ants, thief ants, and the Texas leafcutting ants. This product is used on lawns, landscaped areas, ornamental gardens, horticultural areas, and other common areas. Recreational areas, as well as on grounds surrounding public houses (including pets and dogs, birds, and other animal husbandries. Avoid direct exposure of animals to the granules. Refer to the Use Rate Table for directions. Do not keep or feed trained birds or rodent feedings to livestock.
