PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING
IRRITATES EYES AND RESPIRATORY TRACT. Harmful if absorbed through skin, eyes, or clothing. Wear protective clothing, such as gloves, long-sleeved cotton shirt, long pants, and hat. Use in a well-ventilated or outdoor area. Do not inhale fumes. Do not inhale vapor or spray mist while spraying paint or sanding boat surface. Wear a mask or respirator jointly approved by The American National Standards Institute (ANSI) and the U.S. Environmental Protection Agency (EPA). Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS
This material is Toxic to Fish. Do not apply directly to water by spraying or dispersion or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill.

PHYSICAL OR CHEMICAL HAZARDS
Do not use or store near heat or open flame.

STORAGE AND DISPOSAL
Do not contaminate waste, food, feed by storage or disposal. Optimum storage is to be refrigerated.

PESTICIDE DISPOSAL
Paint particles that cannot be used according to these instructions must be disposed of according to federal, state, or local procedures under the Resources Conservation and Recovery Act.

CONTAINER DISPOSAL
Dispose of container by triple rinse with water or by burning and disposing of in a sanitary landfill or by other approved state and local procedures. If burned, allow to cool.

FIRST AID

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eye open and rinse slowly and gently with water for at least 15 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing eye. Call a poison control center or doctor.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Wash skin immediately with plenty of water for at least 15 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

HAVE THE PRODUCT Container or LABEL, WITH YOU WHEN CALLING A POISON CONTROL CENTER OR DOCTOR, OR GOING FOR TREATMENT.

Harmful if swallowed. Contains oxidizers which can cause permanent brain and nervous system damage. Ingestion caused by deliberately consuming or inhaling the contents can be harmful or fatal.

NOTES: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING FOR COMMERCIAL OR MARINE USE ONLY

Mix thoroughly prior to use. Make sure no pigment remains on the bottom or sides of the can.

Apply at the rate of approximately 400 square feet per gallon / 200 sq ft per liter.

Apply by brush, roller or spray.

Restain Time: 4 hours minimum

Dry to Service: 8 hours minimum after last coat of anti-fouulant.

Application Temperature: 50°F-110°F

Reduction: Any reduction must be compatible with existing environmental and application conditions.

Notes: First coat of Seaguard Copper Bottom Anti-Fouling paint must be applied to final coat of epoxy primer while the epoxy primer is still wet, usually within 5-6 hours.

Surface Preparation: All surfaces referenced below must be free of all soil contaminants and moisture prior to application of primer or antifoulant.

Previously Painted Surface with Vinyl Anti-Foulant: Clean surface thoroughly by hosing down and/or scrubbing with an abrasive pad using fresh water to remove all marine growth and surface contamination. Remove all loose, flaking paint and feather the edges by sanding. For best results, sand existing anti fouling paint film with 100 to 120 grit abrasive and wipe clean. Apply 2 coats of Seaguard Copper Bottom Anti-Fouling Paint.

Steel: Remove all oil and grease from surface by Solvent Cleaning per SPC(S)5. Minimum surface preparation is Near White Metal Blasting Cleaning per SPC(S)5. Scrub clean all surfaces using a sharp angular abrasive to optimum surface profile (2-6 mils). Remove all wall spatter and ground all sharp edges by grinding to a minimum of 1/8" radius. Apply 1 coat of Tg-210 Copper Coal Tar Epoxy at 8-11 mils dry film per coat. Apply 2 coats of Seaguard Copper Bottom Anti-Fouling Paint.

Wood: Apply first coat of Seaguard Copper Bottom Anti-Fouling reduced 30% with Reducer B3044 thinner. Apply 1/2 additional coats of Seaguard Copper Bottom Anti-Fouling Paint.

Fiberglass: Remove all dirt, oil, grime, and mold release agents. Be sure to change wiping rag frequently. Sand surface with 60 grit abrasive. Apply appropriate fiberglass primer. Apply 2 coats of Seaguard Copper Bottom Anti-Fouling Paint.

If dry, it is effective in preventing marine growth such as barnacles, barnacles, etc. Can be used in fresh, brackish, or salt waters.

Shelf Life: 24 months

Refer to product data page for additional information on surface preparation, application, environmental conditions, product use, and limitations.

Nonphotocatalytically reactive.

WARNING! KEEP OUT OF REACH OF CHILDREN. CONSUMABLE, VAPOR HAZARDOUS, HABITUAL EYES, NOSE AND RESPIRATORY TRACT.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS

WARNING
IRRITATES EYES AND RESPIRATORY TRACT. Harmful if absorbed through skin, eyes or clothing. Wear protective clothing, such as gloves, long-sleeved cotton shirt, long pants and hat. If skin is irritated or inflamed, do not take internally. Do not breathe vapor or spray mist. Wear appropriate form of face protection and clothing. See instructions for proper cleanup and disposal of spills.

ENVIRONMENTAL HAZARDS
This material is toxic to fish. Do not apply directly to water by discharging of equipment or disposal of wastes. To avoid chemical and biological degradation during paint removal to enter water. Dispose of paint cans in an approved landfill.

PHYSICAL OR CHEMICAL HAZARDS
Do not use or store near heat or open flame.

STORAGE AND DISPOSAL
Do not contaminate water, food, feed, oronica by excess or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL
Paint products cannot be used according to label instructions must be disposed of according to federal, state, or local procedures under the National Containment and Recovery Act.

CONTAINER DISPOSAL
Dispose of container by triple rinse and recycling or burning and disposing in a sanitary landfill or by other approved State and local procedures. It burned in the open.

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

FOR COMMERCIAL OR MARINE USE ONLY

• Mix thoroughly prior to use. Make sure no pigment remains on the bottom or sides of the can.
• Apply at the rate of approximately 400 square feet per gallon / 2.043 mls dry per square yard.
• Apply by brush, roller or squeegee.
• Recoat time: 24 hours minimum
• Dry to Service: 8 hours minimum after last coat of anti-foulant.
• Application Temperature: 50°F-110°F
• Reduction: Any reduction must be compatible with existing environment and application conditions.

Note: First coat of SeaGuard Copper Bottom Anti-Fouling must be applied to fail coat of epoxy primer while the epoxy primer is still tacky, usually within 3 hours.
• Surface Preparation: All surfaces referenced below must be free of all surface contaminants and moisture prior to application of primer or anti-foulant.

Previously Painted Surfaces with Vinyl Anti-Foulant: Clean surface thoroughly by hydroblasting and/or brushing with an abrasive pad using fresh water to remove all marine growth and surface contamination. Remove all dust, flashing paint and then the edges by sanding. For best results, sand existing anti-fouling paint film with 120 to 150 grit abrasive and wipe clean. Apply 2 coats of SeaGuard Copper Bottom Anti-Fouling Paint.

Steel: Remove all oil and grease from surface by Solvent Cleaning per SPS 30. Minimum Surface Preparation is Near White Metal; Blast Cleaning per SPC 31. Blast clean all surfaces using a sharp angular abrasive for optimum surface preparation (31/2 mls). Remove all weld surface and ground all sharp edges to a minimum of 1/4" radius. Apply 1 coat of Tellurian Topcoat for epoxy 16 mls per coat. Apply 2 coats of SeaGuard Copper Bottom Anti-Fouling Paint.

Wood: Apply first coat of SeaGuard Copper Bottom Anti-Fouling reduced 20% with reducer and sieve. Apply 2 additional coats of SeaGuard Copper Bottom Anti-Fouling Paint.

Fiberglass: Remove all dirt, oil, grease and mold release agents. Be sure to change wiping rag frequently. Sand surface with 60 grit abrasive. Apply appropriate fiberglass primer. Apply 2 coats of SeaGuard Copper Bottom Anti-Fouling Paint.

• This product is effective in preventing marine growth such as barnacles, mussels, etc. Can be used in fresh, brackish, or salt waters.
• Shelf Life: 24 months.
• Refer to product data page for additional information on surface preparation, application, environmental conditions, product use, and limitations.

Nonphotothermally reactive.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING
Irritates eyes and respiratory tract, parental if absorbed through skin, eyes or clothing. Wear protective clothing, such as gloves, long-sleeved clothing, long pants and eye protection or a mask. May be toxic if swallowed or inhaled. Do not eat, drink or smoke while using or handling. Avoid inhalation and contact with eyes and skin. Do not breathe spray or paint mist while spraying or painting boat. Wear a mask if respiration is necessary. Avoid contaminating clothing and overalls. Wash thoroughly with soap and water after handling.

ENVIRONMENTAL HAZARDS
Do not apply directly to water by sharing of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Disposal of paint wastes in an approved method.

STORAGE AND DISPOSAL
Do not contaminate water, foods, feed by storage or disposal. Clean containers is prohibited.

PESTICIDE DISPOSAL
Paint particulates that cannot be used according to label instructions must be disposed of according to federal, state or local regulations under the Resource Conservation and Recovery Act.

CONTAINER DISPOSAL
Dispose of container by multiple reuse or recycling or puncturing and disposing in a sanitary landfill or by other approved State and local procedures. If lime does not affect it, smoke.

FIRST AID
IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth for an unconscious person.
IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Remove skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

HAVE THE PRODUCT CONTAINER OR LABEL WITH YOU WHEN CALLING A POISON CONTROL CENTER OR DOCTOR, OR GOING FOR TREATMENT.

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

FOR COMMERCIAL OR MARINE USE ONLY

Mix thoroughly prior to use. Make sure all pigments remain on the bottom or sides of the can.

Apply at the rate of approximately 400 square feet per gallon / 20-25 lbs dry per coat.

Apply by brush, roller or spray.

Recoat Time: 4 hours minimum

Dry To Service: 8 hours minimum after last coat of anti-foulant.

Application Temperature: 50°-110°F

Reduction: Any reduction must be compatible with existing environmental and application conditions.

Notes: First coat of SeaGuard Copper Bottom Anti-Fouling paint must be applied to final coat of epoxy primer while the epoxy primer is still tacky, usually within 3-6 hours.

Surface Preparation: All surfaces referenced below must be free of all surface contaminants and moisture prior to application of primer or anti-foulant.

Previously Painted Surface with Vinyl Anti-Foulant: Clean surface thoroughly by hydrazinizing and/or sandblasting with an abrasive pad using fresh water to remove all marine growth and surface contamination. Remove all loose, flaking paint and feather the edges by sanding. For best results, sand existing anti-fouling paint film with 100 to 120 grit abrasive and wash clean. Apply 2 coats of SeaGuard Copper Bottom Anti-Fouling Paint.

Steel: Remove all oil and grease from surface by solvent cleaning per SSPC-1. Minimum surface preparation is near White Metal St Class Clipping per SSPC-10. Black clean all surfaces using a sharp angular abrasive for optimum surface profile (0.3 mil). Remove all welds, spatters and ground all sharp edges by grinding to a minimum 1/4" radius. Apply 1 coat of SeaGuard Cool Tan epoxy 4-10-16 mil dry per coat. Apply 2 coats of SeaGuard Copper Bottom Anti-Fouling Paint.

Wood: Apply 1st coat of SeaGuard Copper Bottom Anti-Fouling reduced 30% with Better-Kick In solution. Apply 1-2 additional coats of SeaGuard Copper Bottom Anti-Fouling Paint.

Fiberglass: Remove all dirt, oil, grease, and mold release agents. Be sure to change whipping bag frequently. Sand surface with 60 grit abrasive. Apply appropriate fiberglass primer. Apply 2 coats of SeaGuard Copper Bottom Anti-Fouling Paint.

This product is effective in preventing marine growth such as barnacles, mussels, etc. Can be used in fresh, brackish, or salt waters.

Shell life: 24 months

Refer to product data page for additional information on surface preparation, application, environmental conditions, product uses, and limitations.

Non-photochemically reactive
