MERIT® 2F
INSECTICIDE

For foliar and systemic insect control in turfgrass (including sod farms), landscape ornamentals, fruit and nut trees and interior plantscapes.

ACTIVE INGREDIENT:
*Imidacloprid, 1-[(6-Chloro-3-pyridinyl)methyl]-N-nitro-2-imidazolidinimin............21.4%
OTHER INGREDIENTS:............................... 78.6%
.................................................. 100.0%

*Contains 2 pounds of imidacloprid per gallon.
SHAKE WELL BEFORE USING.
EPA Reg. No. 432-1312   EPA Est. No. 432-TX-1

STOP - Read the label before use.
Keep out of reach of children.

CAUTION

Para el Usuario: Si usted no lee o entiende inglés, no use este producto hasta que le hayan explicado completamente las instrucciones que figuran en la etiqueta.

(TO THE USER: If you cannot read or understand English, do not use this product until the label has been fully explained to you.)

For MEDICAL AND TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577
For PRODUCT USE Information Call 1-800-331-2867

## First Aid

| If swallowed | • Call a poison control center or doctor immediately for treatment advice.  
| • Have person sip a glass of water if able to swallow.  
| • Do not induce vomiting unless told to do so by a poison control center or doctor.  
| • Do not give anything by mouth to an unconscious person. |
| If on skin or clothing | • Take off contaminated clothing.  
| • Rinse skin immediately with plenty of water for 15 to 20 minutes.  
| • Call a poison control center or doctor for treatment advice. |
| If in eyes | • Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.  
| • Call a poison control center or doctor for treatment advice. |

In case of emergency call toll free the Bayer Environmental Science Emergency Response Telephone No. 800-334-7577.

Have a product container or label with you when calling a poison control center or doctor, or going for treatment.

Note To Physician: No specific antidote is available. Treat the patient symptomatically.

## Precautionary Statements

### Hazards to Humans and Domestic Animals

**CAUTION**

Harmful if swallowed or absorbed through skin. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling. Keep children or pets off treated area until spray is dry.

**Personal Protective Equipment (PPE):**

- WPS USES: Applicators and other handlers who handle this product for any use covered by the Worker Protection Standard (40 CFR part 170) — in general, agricultural plant uses e.g., use in sod farms, must wear:
  - Long-sleeved shirt and long pants
  - Chemical resistant gloves made of any waterproof material such as barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, natural rubber, polyethylene, polyvinylchloride (PVC) or viton. If you want more options, follow the instructions for category A on an FDA chemical-resistance category selection chart.
  - Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining personal protective equipment, PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

**Non-WPS USES:** Applicators and other handlers who handle this product for any use NOT covered by the Worker Protection Standard (40 CFR part 170) — in general, only agricultural plant uses are covered by the WPS, must wear:

- Shirt and pants
- Gloves
- Shoes plus socks

### Engineering Controls Statements:

- When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-8)], the handler PPE requirements may be reduced or modified as specified in the WPS.

## User Safety Recommendations

**User should:**

- Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.
- Remove and wash contaminated clothing before reuse.

### Environmental Hazards

This product is highly toxic to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area. This chemical demonstrates the properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Do not formulate this product into other end-use products.

### Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

**MERIT® 2F Insecticide can be used as directed on turfgrasses and ornamentals in sites such as home lawns, business and office complexes, shopping complexes, multi-family residential complexes, golf courses, airports, cemeteries, parks, playgrounds, athletic fields and sod farms.**

**MERIT 2F Insecticide can be used by soil application as directed on trees, shrubs, flowers and groundcovers in sites: industrial and commercial buildings and residential areas, and municipal, city, state, national, and private wooded and forested areas.**

**Resistance:**

Some insects are known to develop resistance to insecticides after repeated use. As with any insecticide, the use of this product should conform to resistance management strategies established for the use area.

**MERIT 2F Insecticide contains a Group 4A insecticide. Insect biotypes with acquired or inherent resistance to Group 4A insecticides may eventually dominate the insect population if Group 4A insecticides are used repeatedly as the predominant method of control for targeted species.**
AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, ranches, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, antidote, and emergency assistance. It also contains specific instructions and exceptions concerning to the statements on the label about pre- and post-application protective equipment (PPE) and material-entry interval. The requirements in this box only apply to users of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. Exception: If the product is applied by drenching, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated. PPE required for entry to entry to treated areas that is permitted under the Worker Protection Standard; and that involves contact with anything that has been treated, such as plants, soil, or water in:

- Chemical-resistant gloves made of any waterproof material such as barrier laminates, butyl rubber, chlorinated rubber, neoprene rubbers, nitrile rubber, or vinyl. If you want micro-ovex, follow the instructions for Category A on an EPA, chemical-resistant category selection chart.
- Shower and pants soaked.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to users of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170), the WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Keep children and pets off treated area until dry.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, and feed. Store in original container and out of the reach of children, preferably in a locked storage area.

Handle and open container in a manner as to prevent spillage. If the container is leaking, invert to prevent leakage. If container is leaking or material spilled for any reason or cause, carefully clean up spilled material to prevent further hazards. Refer to Procautionary Statement on label for hazards associated with the handling of this material. Do not walk through spilled material. Absorb spilled material with adsorbing type compound and dispose of in an approved waste disposal area.

Pesticide Disposal: Washes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Triple rinse container by equivalent volume before emptying.

Three time as follows: (1) Empty remaining contents into application equipment or a mix tank and stir for 10 minutes after the flow begins to drip, fill the container 1/2 full with water and remix. Shake for 10 seconds. Pour mixture into:

STORAGE AND DISPOSAL (continued)

application equipment or a mix tank or storm drain for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat the procedure two more times. Offer for recycling. If available, or reconditioning, or purchase and dispose of in a sanitary landfill or by incineration, or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

APPLICATION TO TURFGRASS

MERIT 2F Fertilizer can be used for the control of non-cultivating pests of turfgrass, such as: Northern and Southern masked chafers, Cutworm, Spotted cutworm, Armyworm, and the fall armyworm, Landscape Spiders, European Chinch Bugs, Thrips, Flea Beetles, and Red Spotted Cutworm. Merit is also effective at controlling the following species of Thrips: Western, Thrips, Thrips, and Thrips. Merit is not effective against the following species of Thrips: Thrips, Thrips, Thrips, and Thrips. Merit 2F Fertilizer can also be used for suppression of chinch bugs and stitch bugs.

The active ingredient in MERIT 2F Fertilizer has sufficient residual activity so that applications can be made preceding the egg laying activity of the target pests. High levels of control can be achieved when applications are made preceding or during the egg laying period. The need for an application can be assessed by examining the soil surface of the treated area, identifying the presence of eggs, larvae, or adults of the target pests. The decision to treat should be made on the basis of the presence of active material (adjuvants) in the treated area.

When applications are watered down or fogged with water. Adequate application of the active ingredient cannot be achieved when these conditions exist. The treated turf area must be in such a condition that the feed or irrigation will penetrate vertically in the soil profile. Applications do not exceed a total of 1.5 pts (0.4 lb of active ingredient) per acre per year.

APPLICATION EQUIPMENT FOR USE ON TURFGRASS:

Adequate MEIR 2F Fertilizer is in sufficient volume to provide adequate distribution in the treated area. The use of accurately calibrated equipment properly used for the application of turfgrass insecticides is required. Use equipment which will result in adequate application of the active ingredient and ensure that equipment is working properly.

APPLICATION TO ORNAMENTALS

MERIT 2F Fertilizer is for use on ornamentals in commercial and residential landscapes and interior plantings, MERIT 2F Fertilizer is in a systemic product and will be translocated upward into the plant system from root uptake. To assure optimum effectiveness, the product must be applied where the growing portion of the target plant can absorb the active ingredient. The addition of a nitrogen-containing fertilizer, where optional, into the solution may enhance the uptake of the active ingredient. Application can be made by hilar application or application of applications, including soil injection, drenches, and broadcast sprays. Fertilizer applications for other systemic systems should not come into contact with adjacent pests.

When making factorial applications to plants with waxly stomata, systemic activity will be obtained until the active ingredient is translocated throughout the plant. In some cases, the translocation would take 50 days or longer. For this reason, make application prior to anticipated pest infestation to achieve optimum levels of control.

For outdoor ornamentals, broadcast applications are expected to exceed a total of 1.5 pts (0.4 lb of active ingredient) per acre per year. In most cases, applications are expected to exceed a total of 1.5 pts (0.4 lb of active ingredient) per acre per year.

Ant Management Program

Do not MEIR 2F off to control ants, scale insects, whiteflies, and other sucking pests on ornamentals to limit the herbicide availability as a food source for ant populations. MERIT 2F applications can be from be supplemented with residual granules.
### CROP
- Trees
- Shrubs
- Evergreens
- Flowers
- Foliage plants
- Groundcovers
- Interior plantscapes

### PEST
- Adelgids (including hemlock woolly adelgid)
- Aphis
- Leaf-feeding beetles (Japanese beetle, emerald ash borer and vine weevil adults)
- Leaf-feeding bugs (including lace bugs, leaf bugs, and plant bugs)

### DOSAGE
- **DOSAGE MERIT 2F**
- 1.5 fl oz (45mL) per 100 gal of water

### Foliar Applications:
High pest populations and reapply on an as needed basis.

### Broadcast Applications:
Mix required amount of product in sufficient water to uniformly and accurately cover the area being treated. Do not use less than 2 gallons of water per 1,000 sq. ft. For optimum control, irrigate thoroughly to incorporate MERIT 2F Insecticide into the upper soil profile. Refer to use directions specific for FLOWERS and GROUND COVERS concerning additional use directions.

### TREES, SHRUBS, FLOWERS and GROUNDCOVERS

### Soil Injection:
- **GRID SYSTEM**: Holes should be spaced on 2.5 foot centers, in a grid pattern, extending to the drip line of the tree. CIRCLE SYSTEM: Apply in holes evenly spaced in circles, (use more than one circle depending upon the size of the tree) beneath the drip line of the tree extending in from that line. BASAL SYSTEM: Space injection holes evenly around the base of the tree trunk no more than 6 to 12 inches out from the base. Mix required dosage in sufficient water to inject an equal amount of solution in each hole. Maintain a low pressure and use sufficient solution for distribution of the liquid into the treatment zone. For optimum control, keep the treated area moist for 7 to 10 days. Do not use less than 4 holes per tree.

**No Soil Injection Applications Allowed in Nassau or Suffolk Counties of New York.**

### Soil Drench:
Uniformly apply the dosage in no less than 10 gallons of water per 1000 square feet as a drench around the base of the tree, directed to the root zone. Remove plastic or any other barrier that will stop solution from reaching the root zone.

### For Control of Specified Borers:
Application to trees already heavily infested may not prevent the eventual loss of the trees due to existing pest damage and tree stress.

### FLOWERS AND GROUNDCOVERS
<table>
<thead>
<tr>
<th>DOSAGE</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.46 to 0.6 fl oz (14 to 17 mL) per 1000 sq ft</td>
</tr>
</tbody>
</table>

Apply as a broadcast treatment and incorporate into the soil before planting or apply after plants are established. If application is made to established plants, optimum control will be attained if area is irrigated thoroughly after application.
Apply specified dosage as a foliar spray using 200 gallons of water per acre. Do not apply more than a total of 6.0 ounces of MERIT 2F Insecticide per acre per year. Allow at least 14 days between applications. Applications may be applied up to and including day of harvest.

**RESTRICTIONS**

Do not graze treated areas or use clippings from treated areas for feed or forage. Avoid runoff or puddling of irrigation water following application. Keep children and pets off treated area until dry. Avoid application of MERIT 2F Insecticide to areas which are water logged or saturated, which will not allow penetration into the root zone of the plant. Do not apply more than 1.6 pt (0.4 lb of active ingredient) per acre per year.

Treated areas may be replanted with any crop specified on an imidacloprid label, or with any crop for which a tolerance exists for the active ingredient.

For crops not listed on an imidacloprid label, or for crops for which no tolerances for the active ingredient have been established, observe a 12-month plant-back interval.

**IMPORTANT: READ BEFORE USE**

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of liability before using this product.

If terms are not acceptable, return the unopened product container at once. By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

**CONDITIONS:** The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Bayer CropScience LP. All such risks shall be assumed by the user or buyer.

**DISCLAIMER OF WARRANTIES:** TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BAYER CROPSCIENCE LP MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR OTHERWISE, THAT EXTEND BEYOND THE STATEMENTS MADE ON THIS LABEL. No agent of Bayer CropScience is authorized to make any warranties beyond those contained herein or to modify the warranties contained herein. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BAYER CROPSCIENCE LP DISCLAIMS ANY LIABILITY whatsoever for special, incidental or consequential damages, resulting from the use or handling of this product.

**LIMITATIONS OF LIABILITY:** TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER FOR ANY AND ALL LOSSES, INJURIES OR DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, WHETHER IN CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY OR OTHERWISE, SHALL NOT EXCEED THE PURCHASE PRICE PAID, OR AT BAYER CROPSCIENCE LP’S ELECTION, THE REPLACEMENT OF PRODUCT. ---

**CROP** | **PEST** | **RATE PER APPLICATION**
---|---|---
Pome Fruits | Aphids (except wooly apple aphid) | 1.5 fl oz (45 mL) per 100 gal
Apple | Leafhoppers (including glassy-winged sharpshooter) | 6.0 fl oz/A
Crabapple (oriental) | Mealybugs* | San Jose scale*
Locust | Pecan* | Yellow pecan aphid
Quince | Pecan spittlebug | 1.5 fl oz (45 mL) per 100 gal
Mayhaw | Pecan leaf phylloxera | 6.0 fl oz/A

Apply stated dosage as a foliar spray as needed after petal-fall is complete. For control of wooly apple aphid, apply prior to leafrolling caused by the pest. For first generation leafminer control, make first application as soon as petal-fall is complete. Greatest leafminer control will result from the earliest possible application. For second and succeeding generations of leafminer, optimal control is obtained from applications made early in the adult flight against egg and early instar larvae. A second application may be required 10 days later if severe pressure continues or if generations are overlapping. A single application may result in suppression only. MERIT 2F will not control late stage larvae. For San Jose Scale, time applications to the crawler stage. Treat each generation. For late season (preharvest) control of leafhopper species, apply MERIT 2F while most leafhoppers are in the nymphal stage. For optimal control of mealybug, insure good spray coverage of the trunk and scaffolding limbs or other resting sites of the mealybug. Do not apply more than 6.0 fluid ounces per acre in a single application. Do not make more than 5 applications. Allow 10 or more days between applications. At least 7 days between last application and harvest. * Not for use in California for control on pears.

**CROP** | **PEST** | **RATE PER APPLICATION**
---|---|---
Grapes | Leafhoppers (including glassy-winged sharpshooter) | 1.5 fl oz. (45 mL) per 100 gal
Mealybugs | 3.0 fl oz./A

Make foliar applications as pests begin to build before populations become extreme. Two applications at a 10 to 14 day interval may be required to achieve control. Scout and retreat if needed. Thorough uniform coverage of foliage is necessary for optimal control. Addition of an organosilicone-based spray adjuvant at a rate not to exceed the adjuvant manufacturer’s recommended use rate may improve coverage. Do not apply more than a total of 16.0 fluid ounces of MERIT 2F per acre per year. Do not make more than 3 applications. Allow 10 or more days between applications.

1 The amount of MERIT 2F required per acre will depend on tree size and volume of foliage present. The rate per acre is based on a standard of 400 gallons of dilute spray solution per acre for large trees.

* Use on pecans not permitted in California unless directed by specific supplemental labeling.
**MERIT® 2F INSECTICIDE**

For foliar and systemic insect control in turfgrass (including sod farms), landscape ornamentals, fruit and nut trees and interior plantings.

**ACTIVE INGREDIENT:**
- Imidacloprid, 1-[8-Chloro-3-pyridyl]-methyl)-N-nitro-2-imidazolidinimine

**OTHER INGREDIENTS:**
- 21.4%
- 78.6%
- 100.0%

Contains 2 pounds of imidacloprid per gallon.

**SAFETY DATA SHEET**

**STOP - Read the label before use. Keep out of reach of children. CAUTION**

**PARA EL USUARIO:** Si usted no lee o entiende inglés, no use este producto hasta que le hayan explicado completamente las instrucciones que figuran en la etiqueta.

(TO THE USER: If you cannot read or understand English, do not use this product until the label has been fully explained to you.)

For MEDICAL AND TRANSPORTATION Emergencies Only Call 24 Hours A Day 1-800-334-7577

For PRODUCT USE Information Call 1-800-331-2867

**FIRST AID**

- **If swallowed:**
  - Call a poison control center or doctor immediately for treatment advice.
  - Have person sip a glass of water if able to swallow.
  - Do not induce vomiting unless told to do so by a poison control center or doctor.
  - Do not give anything by mouth to an unconscious person.

- **If on skin or clothing:**
  - Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

- **If in eyes:**
  - Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

In case of emergency call toll free the Bayer Environmental Science Emergency Response Telephone No. 800-334-7577. Have a product container or label with you when calling a poison control center or doctor or going for treatment.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**

Harmful if swallowed or absorbed through skin. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling. Keep children and pets off treated area until spray is dry.

**ENVIRONMENTAL HAZARDS**

This product is highly toxic to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

This product is highly toxic to bees exposed to direct treatment or residues on blossoming crops or weeds. Do not apply this product or allow it to drift to blossoming crops or weeds if bees are visiting the treatment area.

This chemical demonstrates the properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

Do not formulate this product into other end-use products.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**Pesticide Storage:** Store in a cool, dry place in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, and feed. Store in original container and out of the reach of children, preferably in a locked storage area. Handle and open container in a manner as to prevent spillage. If the container is leaking, invert to prevent leakage. If container is leaking or material spilled for any reason or cause, carefully damp up spilled material to prevent runoff. Refer to Precautionary Statements on label for hazards associated with the handling of this material. Do not walk through spilled material. Avoid spilled material with absorbing type compounds and dispose of as directed for pesticides above. In spill or leak incidents, keep unauthorized people away. You may contact the Bayer Environmental Science Emergency Response Team for decontamination procedures or any other assistance that may be necessary. The Bayer Environmental Science Emergency Response Telephone No. 1-800-334-7577 or contact Chemtura at 1-800-424-9300.

Refer to attached leaflet for complete Directions for Use, Precautionary Statements and Storage and Disposal instructions.
