Tri-Ad 86

Spreader-Acidifier

Principal Functioning Agents:
- Alkylphenol ethoxylate, phosphoric acid, isopropyl alcohol, dimethyl siloxane...86%
- Constituents ineffective as spray adjuvants..........................14%
- Total..................................................................................100%

DANGER PELIGRO
KEEP OUT OF REACH OF CHILDREN

Precautionary Statements
Corrosive. Causes irreversible eye damage and skin burns. Harmful if swallowed, inhaled, or absorbed through the skin. Wear protective eyewear (goggles or face shield) and chemical resistant gloves. Do not get in eyes, on skin, or on clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or smoking tobacco. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment
Wear protective eyewear (goggles or face shield), chemical-resistant gloves, coveralls worn over long-sleeved shirt and long pants, and chemical-resistant footwear plus socks.

STATEMENT OF PRACTICAL TREATMENT
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for advice.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin thoroughly with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison center or doctor. Do not give anything by mouth to an unconscious person.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

GENERAL INFORMATION
Tri-Ad 86 is exempt from crop tolerance for use as an adjuvant on growing crops. Tri-Ad 86 is a general purpose spreader-acidifier for use on most plants to improve the effectiveness of crop protection products, PGR's, or foliar nutrients by providing more uniform leaf coverage without excess run-off of spray on leaf surface. Under most conditions 15 fluid ounces per 100 gallons of water will reduce the pH from 7.2-7.4 to 5.8-6.2 depending upon buffering capacity of water or other spray materials. Not for aquatic use.

DIRECTIONS FOR USE
Always add Tri-Ad 86 to the spray tank first. The pesticide label requirements supercede the Tri-Ad 86 suggested rates. Some pesticides may require higher rates of Tri-Ad 86 for optimum performance. However, do not add this product at a rate which exceeds 5% of the finished spray volume. Follow pesticide label directions when this occurs.

Field and Row Crops: Apply 8 ounces to 32 ounces per 100 gallons of water. The rate varies based upon required pH, gallons per acre, and application method. A typical rate is 16 ounces per 100 gallons of water. Always add Tri-Ad 86 to spray tank first.

Herbicides (contact and systemic), desiccants, defoliants: Apply 1 pint to 4 quarts per 100 gallons of spray solution. Under normal conditions apply 1-2 pints per 100 gallons of water with desiccants and defoliants. Under normal conditions apply 2 quarts per 100 gallons of water of Tri-Ad 86 with systemic and contact herbicides. Exception: 2, 4-D and 2, 4-D type fuming products apply no more than 1-2 pints per 100 gallons of water. Excessive buffering will precipitate the pesticide. Always add Tri-Ad 86 to spray tank first.

WARRANTY: In as much as the use of this material is subject to conditions beyond their control, neither Genesis Agri Products Inc, nor any other seller hereof warrants, expressed or implied, the use thereof, or the results of such use, whether or not used in accordance with directions. Neither of the foregoing will or shall be responsible for the results of any use of this material.
