Moles may be indicated by a network of subsurface runways in procedure for determining initial activity. Return 48 to 72 hours bait application, check for mole activity using the same procedure for determining initial activity. Return 48 to 72 hours later and retreat all active runs.

Mounds: 3. Dispose of product container and unused or spoiled product this label. Apply bait only in underground runways of moles. Children and pets.

Moles construct deeper tunnels that are not visible used habitually by moles for feeding.

Conylura cristata (star-nosed moles), Scalopus aquaticus (Virginia shrews).

SELECTION OF TREATMENT AREAS:

MOUNTS:

Underground runways or in subsurface feeding tunnels. This bait used only in underground runways of moles.

For any purpose other than to control moles. To help prevent used habitually by moles for feeding.

For deep tunnels, drop one worm through the probe to puncture a hole in the top of these tunnels. To locate deep tunnels, push a probe, such as a wooden dowel or a narrow rod to puncture a hole in the top of these tunnels. To locate deep tunnels, push a probe, such as a wooden dowel or a narrow rod to puncture a hole in the top of these tunnels.

CAUTION:

Harms to Humans and Domestic Animals

This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water.

Environmental Hazards

Prolonged or frequent repeat skin contact may cause allergic reactions in some individuals.

User Safety Requirements

Hazards to Humans and Domestic Animals

Do not get in eyes, on skin, or on clothing. Harmful if swallowed or absorbed through the skin. Do not get in eyes, on skin, or on clothing.

If an animal eats bait, call veterinarian or 1-877-854-2494 at once. Do not induce vomiting unless told to do so by the poison control center or doctor.

NOTE TO PHYSICIAN OR VETERINARIAN

Do not induce vomiting unless told to do so by the poison control center or doctor.

TREATMENT FOR PET POISONING

FIRST AID

IF ON SKIN:

• Wash immediately with soap and water.

IF SWALLOWED:

• Do not induce vomiting unless told to do so by the poison control center or doctor.

IF IN EYES:

• Flush eyes with large amounts of water for 15 minutes. If irritation persists, consult a physician.

INERT INGREDIENTS: . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . .  99.975%

If irritation persists, consult a physician.

To bait deep tunnels, drop one TALPIRID worm through the probe to puncture a hole in the top of these tunnels. To locate deep tunnels, push a probe, such as a wooden dowel or a narrow rod to puncture a hole in the top of these tunnels.

To bait deep tunnels, drop one TALPIRID worm through the probe to puncture a hole in the top of these tunnels.

WASTES RESULTING FROM THE USE OF THIS PRODUCT MAY BE PLACED IN TRASH OR DELIVERED TO AN APPROVED WASTE DISPOSAL FACILITY.

PESTICIDE STORAGE:

Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed.

PESTICIDE DISPOSAL:

Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

IF ON SKIN:

• Wash immediately with soap and water.

IF SWALLOWED:

• Do not induce vomiting unless told to do so by the poison control center or doctor.

IF IN EYES:

• Flush eyes with large amounts of water for 15 minutes. If irritation persists, consult a physician.

KILLS MOLES

12455-101_Talpirid_20130211_33.pdf

KILLS MOLES

MIMICS A MOLE’S NATURAL FOOD SOURCE™ READY TO USE

Scientifically designed and tested to mimic a mole’s natural food source.

Moles may consume a lethal dose in a single feeding, but it may take 2 or more days from the time of bait consumption for moles to die.

CONTAINS 20 WORM-SHAPED BAITS (20 INDIVIDUALLY SHAPED BAITS x 10)

Net Wt. 1.32 lb
the turf or by a series of conical mounds of earth pushed up from moles may be indicated by a network of subsurface runways in

Keep pets out of treated areas. Do NOT use this product above ground.

MOUNDS:

ESTABLISHING INITIAL ACTIVITY:

SUBSURFACE RUNWAYS:

formed when dirt is pushed to the surface when moles construct by a series of conical mounds (piles of dirt) 4 to 12 inches high used habitually by moles for feeding.

This bait must be applied underground in either main underground runways or in subsurface feeding tunnels. This bait is used to mimic a mole's natural food source. Scientifically designed and tested to mimic a mole's natural food source. Moles may consume a lethal dose of the bait. Do NOT use above ground.

TALPIRID has been specially designed to mimic the natural food sources of the mole. Scientifically designed and tested to mimic a mole's natural food source. Moles may consume a lethal dose of the bait. Do NOT use above ground. T ALPIRID has been specially designed to mimic the natural food sources of the mole.

DIRECTIONS FOR USE

1. Store product not in use in locations out of the reach of children and pets. Do not expose children to this product or use it for any purpose other than to control moles. To help prevent accidental poisoning, read this entire label and follow all use directions and use precautions.

2. Use your finger, small wooden dowel or a narrow rod to puncture a hole in the top of subsurface runways. Be careful not to crush runways. Mark opened runways and revisit them 48 to 72 hours later. Use BAITING ACTIVE RUNWAYS:

3. Open tunnels. Tunnels can be opened by using a pointed rod to break down the side of the tunnel. The mole will then emerge and can be run into a small jar or captured with a mole trap. Tunnels must be opened 5 to 10 feet apart and within 5 feet of each active tunnel system. Return 48 to 72 hours later and retreat all active tunnel systems. Use DIRECTIONS FOR USE:

4. Once tunnels are opened, place 100% bromethalin bait application directly into mole burrow systems. This bait must be used habitually by moles for feeding. Be sure the bait is not exposed. Drop one worm into the runway, using the rod to push any exposed bait completely into the runway. Use MAIN UNDERGROUND TUNNELS AND CONICAL MOUNS:

5. Use a small amount of dirt to cover the hole. Mark the hole and reinspect it 48 to 72 hours later. Use DIRECTIONS FOR USE:

6. Repeat the application every 5 to 10 feet of each active deep tunnel and within 5 feet of each active conical mound. Check for the effects of treatment 5 to 10 days after initial use. Use FURTHER ACTION:

7. Keep pets out of treated areas. Do NOT use this product above ground. Do NOT use this product in any manner inconsistent with its labeling. Use CAUTION:
RIDGES OF VEGETATION AND SOIL CAUSED BY MOLES FORAGING FOR FOOD. MOLES MAY BE INDICATED BY A NETWORK OF SUBSURFACE RUNWAYS IN THE TOP SOIL. OPENED TUNNELS AND RUNWAYS SHOULD BE MARKED AND VISITED 48 TO 72 HOURS LATER AND RETREAT ALL ACTIVE RUNWAYS.

DIRECTIONS FOR USE

1. Establish initial activity. Return 48 to 72 hours later and retreat all active runs.
2. Follow all application directions and USE RESTRICTIONS on this label. Apply bait only in underground runways and within 5 feet of each active deep tunnel.
3. Dispose of product container and unused or spoiled product as specified on label.

NOTE TO PHYSICIAN OR VETERINARIAN

If an animal eats bait, call veterinarian or 1-877-854-2494 at once.

VEGETABLES, FRUITS, NUTS, AND BREADS MAY BE TOXIC TO MOLES. USE VACUUM CLEANERS TO CLEAR VEGETATION FROM THE TUNNEL SYSTEM. SLEEPING PILL BAITS (SODIUM PENTOBARBITAL) OR PRODUCTS SUCH AS TALPIRID HAVE BEEN SPECIALLy DESIGNED AND TESTED TO KILL MOLES. BAIT MUST BE APPLIED DIRECTLY INTO MOLES' BURROW SYSTEMS. THIS BAIT MUST BE LEFT UNDISTURBED UNTIL CONSUMED OR UNTIL THE BAIT IS FULLY EATEN.

STORAGE AND DISPOSAL

This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and other predatory and scavenging mammals and birds. Do not contaminate water, food or feed by storage or disposal.

Harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and other predatory and scavenging mammals and birds. Do not contaminate water, food or feed by storage or disposal.

CAUTION:

This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be harmful if swallowed or absorbed through the skin. Keep away from children, domestic animals and other predatory and scavenging mammals and birds.

FIRST AID

If on skin: Wash with plenty of soap and water.

IF ON SKIN:

• Have person sip a glass of water if able to swallow.

• Do not induce vomiting unless told to do so by the poison control center.

• Call veterinarian or 1-877-854-2494 at once.

• If an animal eats bait, call veterinarian or 1-877-854-2494 at once.

• If available. Dispose of empty container by placing in trash, at an approved waste disposal facility or by returning to place of purchase or prompt removal from area. If you are using this product other than as indicated on the label, buyer assumes all responsibility for liability resulting from such use and/or handling.

WARRANTY:

If this product fails to meet the claims of the product, the buyer may return the product to the place of purchase for a refund of the purchase price. The manufacturer is not responsible for any damage to crops resulting from the use of this product other than as indicated on this label. Buyer assumes all responsibility for liability resulting from such use and/or handling of this material when such use and/or handling are contrary to label instructions.
