# Oasis 146 Multi-Quat Sanitizer

## Directions for Use:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Apply Oasis 146 Multi-Quat Sanitizer with a cloth, mop or mechanical spray device. When applied with a mechanical spray device, surface must be sprayed until thoroughly wetted. For sprayer applications, use a coarse spray device. Spray 8-8 inches from surface; rub with brush, sponge or cloth. Do not spray paint. Fresh solution should be prepared daily or when the use solution becomes visibly dirty.

- **Nose-Food Contact Surface Sanitizing**: Add 0.34 oz. of Oasis 146 Multi-Quat Sanitizer per 1 gallon of water (200 ppm active quat) to sanitize hard, non-porous food contact surfaces. For applications, use a coarse spray device. Spray 8-8 inches from surface. Do not spray paint. Treated surfaces must remain wet for 60 seconds. Wipe dry with a sponge, mop, or cloth to air dry.

- **Oasis 146 Multi-Quat Sanitizer**: Can be used to sanitize hard, non-porous food contact surfaces such as tables, counters, utensils and food processing equipment.

- **Oasis 146 Multi-Quat Sanitizer**: Is an effective sanitizer against E. coli O157:H7, Salmonella, Staphylococcus aureus, Campylobacter jejuni, Escherichia coli O157:H7, Klebsiella pneumoniae, Listeria monocytogenes, Serratia marcescens, Salmonella enterica, Enterobacter sakazakii and Escherichia coli on food contact surfaces when used at 0.33 oz./gal (200 ppm active quat).

To Sanitize Food Contact Surfaces, Food Processing Equipment and Other Hard Surfaces in Food Processing Locations, Dairies, or Restaurants:

- **Use Oasis 146 Multi-Quat Sanitizer**: to sanitize pre-cleaned hard non-porous surfaces of food processing equipment, dairy equipment, food utensils, clothes, silveware, glasses, skillets, countertops, refrigerated storage areas and display equipment and other hard non-porous surfaces in federally inspected meat and poultry plants or restaurants. Prior to application, remove gross food particles and oil by a pre-spray or pre-scrub when necessary. Pre-spray. Then thoroughly wash or flush objects with a good detergent or compatible cleaner followed by a potable water rinse before application of the sanitizing solution. Apply a use-solution of 1 oz. to 2.57 oz. per 1 gallon of Oasis 146 Multi-Quat Sanitizer per 4 gallons of 400 ppm hard water (150 - 400 ppm active quat) or 1.25 oz. to 2.57 oz. per 1 gallon of Oasis 146 Multi-Quat Sanitizer per 2 gallons of 300 ppm hard water (200 - 300 ppm active quat). Expose all surfaces to the sanitizing solution for a period of time for a period of time. Allow equipment to drain thoroughly and air dry.

In dairy processing facilities and restaurants in Wisconsin, clean equipment with a good detergent and follow with a potable water rinse; then rinse equipment with a sanitizing solution of 1.25 oz. to 2.57 oz. of Oasis 146 Multi-Quat Sanitizer per 4 gallons of 300 ppm hard water (200 - 400 ppm active quat).

**Restaurant and Bar Rinse - Sanitizing Eating and Drinking Utensils**

1. Scrape and pre-flush utensils to remove excess oil.
2. Wash with good detergent or compatible cleaner (see your Ecolab representative for a recommendation).
3. Rinse with potable water.
4. Apply Oasis 146 Multi-Quat Sanitizer in a solution of 0.32 oz./gal (200 ppm active quat) to Oasis 146 Multi-Quat Sanitizer 1 gallon of 500 ppm water (200-400 ppm active quat). Rinse all utensils for at least 1 minute. Use 2 minutes exposure time if required by governing sanitary code.
5. Drain and air dry.

---

## First Aid

**If In Eyes**: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

**Call a Poison Control Center or Doctor** if you are not sure what to do.

**DANGER**

See side panel for Precautionary Statements and First Aid.
Oasis 146 Multi-Quat Sanitizer

DIRECTIONS FOR USE (Continued)

NOTE: A clean potable water rinse following sanitization is not permitted under Section HFS 196.13 of the Wisconsin Administrative Code.

Sanitizing - Non-Porous Glazed Hardware: To prevent cross contamination into animal areas and the packaging and storage areas of food plants, dip, soak or spray pre-washed (plastic, latex or other synthetic rubber) glazed hands so that there is enough sanitizing solution to cover the glazed area. For spray applications, use a coarse spray device and spray the glazed surfaces until thoroughly wetted. Do not breathe spray. Do not let sanitizing solution come in contact with exposed skin. Make up the sanitizing solution by adding 1 to 2.07 ounces of product per 4 gallons of water (or equivalent use dilution). Dip, soak or spray in solution and allow glazed hands to remain wet for at least 60 seconds. Change the sanitizing solution at least daily or when solution appears dirty.

NOTE: FOR MECHANICAL OPERATIONS: A prepared use solution may be reused for sanitizing, but may be reused for other purposes such as cleaning.

FOR MANUAL OPERATIONS: Prepare a fresh sanitizing solution as soon as it becomes diluted or spoiled.

GENERAL DISINFECTION: VIRUCIDAL* / FUNGICIDAL DIRECTIONS: At 1.0 oz. per gallon of water, this product is an effective general disinfectant that can be used to disinfect floors, walls, finished woodwork, sinks, garbage cans, toilet bowls, refrigerators, kitchen surfaces, and other hard, non-porous surfaces. For heavily soiled areas, pre-cleaning is required. Apply disinfecting solution to surfaces by brushing, mopping, or hand spray, or by using a contact cleaner to thoroughly wet surfaces. Allow surfaces to remain wet for at least 10 minutes. Remove solution with a clean mop, cloth, or wet vacuum pickup or allow to air dry. Prepare fresh solution at least daily or when use becomes visibly dirty. Any food contact surfaces that have been disinfected must be thoroughly rinsed with potable water. Do not use this product as a disinfectant on glass, dishes or utensils.

Before use in federally inspected meat and poultry food processing plants and dairies, feed products and packaging materials must be removed from the room or carefully protected.

Non-Acid Toilet Bowl Disinfectant/Cleaner Directions: Remove gross faeces prior to disinfection.

From Concentrate: Add 1/4 oz. to the bowl and mix. Brush over exposed surfaces and under the rim, allow to stand for 10 minutes and flush.

From Use Solution: Empty toilet bowl or urinal and apply 1 oz. per gallon use-solution to exposed surfaces and under the rim with a cloth, mop, sponge or mechanical spray. Brush or swab thoroughly. Let stand for 10 minutes and flush.

For Heavy Duty Use: Empty toilet bowl or urinal and apply 4 oz. per gallon use-solution to exposed surfaces including under the rim with a cloth, mop, sponge or sprayer. Brush or swab thoroughly. Let stand for 10 minutes and flush.

Disinfecting Disinfectant/Directions: This product disinfects garbage storage areas, garbage cans, toilet bowls and any other hard non-porous surfaces in color causing areas. Mix 1/4 oz. per gallon of water and apply solution to surfaces. Thoroughly wet surfaces, allow to air dry.

Cleaning and Disinfection: For general cleaning and disinfection, use 0.4 oz. per 4 gallons of water. Apply use solution with a cloth, mop, sponge, sprayer or by immersion to thoroughly wet the surfaces. Treated surfaces must remain wet for 10 minutes. Wipe to allow to air dry. For heavily soiled surfaces, preclean first. Prepare a fresh solution for each use or more often if solution becomes visibly diluted, cloudy or soiled.

For Heavy Duty Cleaning: When greater cleaning is desired, use 1 oz. of Oasis 146 Multi-Quat Sanitizer per 4/5 gallons water. Heavily soiled areas may require repeated cleaning.

DO NOT MIX WITH ANYTHING BUT WATER
