DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Apply Pennsan Quat 5 with a cloth, mop, or mechanical spray device. When applied with a mechanical spray device, surface must be sprayed until thoroughly wetted. For sprayer applications, use a coarse spray device. Spray 6-8 inches from surface. Do not breathe spray. Fresh solution must be used. Allow to air dry.

GENERAL DESCRIPTION/VISUAL* DIRECTIONS:

1 oz. per gallon of water (200 ppm active) is sanitizing solution to sanitize hard, non-porous non-food contact surfaces. For sprayer applications, use a coarse spray device. Spray 6-8 inches from surface. Do not breathe spray. Treated surfaces must remain wet for 60 seconds. Wipe dry with a dry paper towel, cloth, mop or cloth to allow air dry. Do not mix other ingredients with this product.

NON-Food Contact Surface Sanitizing:

Apply 0.34 oz. of Sleeve Quat solution of 200 ppm active to sanitize hard, non-porous non-food contact surfaces. Application use-solution with a cloth, mop or mechanical spray device. When applied with a mechanical spray device, surface must be sprayed until thoroughly wetted. Do not mix other ingredients with this product.

Entryway Sanitizing Systems:

To prevent cross contamination from area to area, set the system to deliver sanitizing solution for 150-400 ppm (1 oz. per gallon of water or equivalent use dilution) at all entrances to buildings, hallways, stairwells and other critical entryways. Use 1 oz. per gallon of water (150-400 ppm active quat) or equivalent use dilution to sanitize hard, non-porous non-food contact surfaces of equipment used to enter these areas. Do not mix other ingredients with this product.

Dishwashing Equipment: Scrub surfaces with a brush and detergent. Rinse surfaces with a solution of 1.36 – 1.4 oz. per gallon of water (200 – 400 ppm active quat equivalent dilutions). Detergent wash must be performed prior to the sanitizing solution being delivered. Do not mix other ingredients with this product.

Steam Dryer Sanitizing: To prevent cross contamination, from areas to area, set the dryers system to deliver sanitizing solution for 150-400 ppm (1 oz. per gallon of water or equivalent use dilution) at all entrances to buildings, hallways, stairwells and other critical entryways. Use 1 oz. per gallon of water (150-400 ppm active quat) or equivalent use dilution to sanitize hard, non-porous non-food contact surfaces of equipment used to enter these areas. Do not mix other ingredients with this product.

For Tick Control Systems: These tick control system tick control systems design to deliver sanitizing solution for 150-400 ppm (1 oz. per gallon of water or equivalent use dilution). Do not mix other ingredients with this product.

NOTE: To ensure complete sanitation, it is recommended that a residual level of 150 to 400 ppm active quat be maintained at all areas in contact with the treated surface for 60 minutes.

DO NOT MIX WITH ANYTHING BUT WATER
