Aqua Balance®
SPF-3050
Chlorine Stabilizer for Outdoor Swimming Pools

ACTIVE INGREDIENT:
Cyanuric Acid .................. 98.0%

INERT INGREDIENTS: .................. 2.0%

TOTAL .................. 100.0%

KEEP OUT OF REACH OF CHILDREN
READ ENTIRE LABEL BEFORE USING
THIS PRODUCT.
FOR SWIMMING POOL USE ONLY

FOR EMERGENCY MEDICAL INFORMATION IN USA OR CANADA, CALL: 1-800-328-0026.
FOR EMERGENCY MEDICAL INFORMATION WORLDWIDE, CALL: 1-651-222-5352 (IN THE USA).

CAUTION: IRRITANT. If product comes in contact with eyes, flush with large amounts of water. Call a physician.

STORAGE AND DISPOSAL
Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding. Do not reuse empty container. Securely wrap original container in several layers of newspaper and discard in trash.

Aqua Balance SPF-3050
Net Weight: 5 lb/2.3 kg

DIRECTIONS FOR USE
Aqua Balance SPF-3050 reduces chlorine consumption in outdoor swimming pools. It will stabilize the chlorine residual for both liquid and dry chlorinating compounds. Aqua Balance SPF-3050 is packaged in five-pound mesh bags. Use the Solubilizer 3050 chemical feeder for dosing into the body of water. Adjust the pH of the pool water to 7.2 - 7.6.

Initial Dosing Procedure:
1. Determine the size of the body of water that will be treated.
2. Using the table below, determine the number of bags needed to bring the cyanuric acid level of the pool into the recommended range of 30-50 ppm. The maximum allowed cyanuric acid concentration is 50 ppm.

<table>
<thead>
<tr>
<th>Pool Size Gallons</th>
<th>Number of Bags</th>
</tr>
</thead>
<tbody>
<tr>
<td>10,000</td>
<td>1/2**</td>
</tr>
<tr>
<td>20,000</td>
<td>1</td>
</tr>
<tr>
<td>30,000</td>
<td>2</td>
</tr>
<tr>
<td>50,000</td>
<td>2</td>
</tr>
<tr>
<td>100,000</td>
<td>5*</td>
</tr>
<tr>
<td></td>
<td>30 ppm 40 ppm 50 ppm</td>
</tr>
</tbody>
</table>

3. Load the correct number of bags into the Solubilizer 3050 chemical feeder. The Solubilizer 3050 feeder can hold a maximum of 3 bags. If greater than 3 bags are needed, a return visit is required to add additional bags.

4. Open the metering valve on the Solubilizer 3050 chemical feeder to the wide-open position, 180 degrees. This will allow the fastest dosing. **If a partial bag is needed to bring the cyanuric acid level into the recommended range, the Solubilizer 3050 chemical feeder's delivery rate can be reduced by adjusting the metering valve for a lower flowrate.

5. Check the cyanuric acid level using a test kit designed for this purpose or have a pool service technician verify the cyanuric acid concentration. Once the recommended level is obtained, the Maintenance Dosing procedure should be followed.

Maintenance Dosing Procedure:
1. Fill the Solubilizer 3050 chemical feeder with 3 bags of product.
2. Each pool has unique properties. Check the cyanuric acid level at the same intervals the chlorine concentration is monitored. Adjust the metering valve to obtain adequate dosing of Aqua Balance SPF-3050 for each specific body of water. Have a pool service technician verify the cyanuric acid concentration using a test kit designed for this purpose. The maximum allowed cyanuric acid concentration is 50 ppm.
3. As the product is delivered, the Solubilizer 3050 chemical feeder should be kept filled with product.
