- Disposal: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Environmental Hazards:

This product is for use in Home and Garden areas. ELIMINATOR Snail & Slug Bait II is so easy to use. This product requires no mixing, spraying or special applications. Just scatter lightly on the soil surface in infested areas. Apply heavier if infestation is severe. If slugs and snails are invading from adjacent properties, a pencil-slim line the entire length of the infested area will form a barrier resulting in excellent control. This bait is extremely attractive to slugs and snails and actually lures them from their hiding places and kills them. Reapply bait every two weeks – more often during heavy infestations or in areas heavily watered. All likely places should be treated as these pests migrate. They favor damp places around vegetable plants, flower gardens, rockeries, hedges, compost heaps, dichondra lawns, ivy patches, and other garden cover where they can remain sheltered by day. For best results; be sure area to be baited is damp. In very dry weather, water well before baiting. Use approximately one pound per 2,000 square feet.

ELIMINATOR Snail & Slug Bait II can be used to protect the following fruit and vegetable plants. Apply only to the soil surface. Do not apply to the foliage or edible parts of the plant. Use ELIMINATOR Snail & Slug Bait II to protect asparagus, beans, cabbage, carrots, celery, cucumbers, lettuce, melons, onions, peas, peppers, potatoes, radishes, squash, tomatoes, turnips, apples, avocados, blackberries, cherries, citrus, grapes, peaches, plums, and strawberries.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
