RESTRICTED USE PESTICIDE
Due to Avian and Aquatic Toxicity
For retail sale to and use by Certified Applicators or persons under their direct supervision and only for those used covered by the Certified Applicator’s Certification.

FIFRA 24(c) REGISTRATION
EPA SLN No. WA-040034

REGISTRATION FOR SPECIAL LOCAL NEED
FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

Diazinon AG500
EPA Reg. No. 66222-9

DIRECTIONS FOR USE

• It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
• This labeling must be in the possession of the user at the time of application.
• Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

RESTRICTIONS / PRECAUTIONS

• Make a maximum of one soil application per growing season.
• Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 3 days.
• This product may be applied through irrigation systems. Refer to the EPA registered label for Diazinon AG500 for chemigation directions.
• Aerial application of Diazinon AG500 to potatoes is prohibited.
• Foliar application of Diazinon AG500 to potatoes is prohibited.
• Do not use on commercially grown potatoes which will be hand-harvested.
• Do not apply this product to potatoes grown in greenhouses.
• Severe bee kills have resulted from insecticides that were applied to potatoes, but drifted onto blooming seed crops. Do not allow this product to drift onto blooming seed crops.
• This pesticide is highly toxic to birds, fish, and other wildlife. Diazinon should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Endangered Species Program web site at http://agr.wa.gov/PestFert/NatResources/EndangSpecies.aspx, or contact the Washington Department of Fish and Wildlife, National Marine Fisheries Service (NOAA Fisheries) or US Fish and Wildlife Service for information on listed threatened or endangered species. Consult the federal label for additional restrictions and precautions to protect aquatic organisms.
• To protect endangered aquatic organisms, use one of the following options: (1) Apply only when there is sustained wind away from fish-bearing waters, or (2) Leave an untreated buffer (25 feet for ground applications, 50 feet for chemigation applications) between treated area and fish-bearing waters.
• Certain uses of diazinon may be restricted by a U.S. District Court final order. You may refer to the WSDA Endangered Species Program web site at http://agr.wa.gov/PestFert/natresources/Buffers.aspx for information regarding pesticides that are impacted by the final order.
CHEMIGATION

This product may be applied through irrigation systems. Refer to the EPA registered label for chemigation directions.

WSDA CHEMIGATION GUIDANCE:

- Application off-site is prohibited. The chemigation application must be continuously observed whenever sensitive areas as defined in WAC 16-202-1002(44) (including but not limited to schools, parks, dwellings, occupied buildings or structures, public roadways, and waters of the state) are at risk of being exposed to drift, runoff, or overspray. In order to minimize the potential for application off-site, WSDA recommends that the product be only applied through low pressure irrigation systems (defined as 2 to 35 pounds/square inch) with a nozzle release height no higher than 3 feet above the target crop, and that end guns be disabled throughout the application.

- An inspection port or a direct access point is required, and it must be positioned immediately upstream of the irrigation mainline check valve and be of sufficient size to allow visual and manual inspection of the check valve and low pressure drain. The inspection port or access point must have a minimum diameter of four inches, if feasible (WAC 16-202-1012[1]).

- The chemigation application tank cannot be placed within 20 feet of the wellhead or other sensitive areas. Mixing or loading activities cannot occur within 20 feet of the wellhead or other sensitive areas (WAC 16-202-1008[1]).

- WSDA Chemigation Rules (WAC 16-202-1001 through WAC 16-202-1024), and information on USEPA Authorized Alternative Chemigation Safety Equipment, Distribution Uniformity and other chemigation topics are available on the WSDA website (http://agr.wa.gov/PestFert/ChemFert/default.aspx).

WSDA CONTAINER DISPOSAL GUIDANCE

- Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at http://agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

This label for Diazinon AG500 expires and must not be distributed or used in accordance with this registration after December 31, 2011.
