PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS: CAUTION: Harmful if swallowed. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.
PHYSICAL OR CHEMICAL HAZARDS: Do not mix with other chemicals.
ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

DIRECTIONS FOR USE:
It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with preapplication statements and directions.

SWIMMING POOL ALGAECIDE AND ALGAE PREVENTATIVE
This non-foaming algicide is used to prevent and control swimming pool algae. Ideal for pools with attached spas. Can be applied in pools with chlorinating or brominating sanitizing systems.

POOLS containing heavy growth of algae should be treated prior to using this product. For pools having light algae growth, pour the entire dose of 24-36 fluid ounces of this product per 10,000 gallons of water directly into pool. Remove settled algae debris by skimming. For treatment of a freshly cleaned and filled pool, use the initial dose of 13-24 fluid ounces of this product per 10,000 gallons of water directly into pool. Additions of 4-9 fluid ounces of this product per 10,000 gallons of water should be made every 7-10 days after initial treatment for maintenance. Wait at least 15 minutes after application before entering pool.

ALGECIDE AND ALGAECIDE PREVENTATIVE FOR SPAS AND HOT TUBS
This non-foaming algicide is used to control the growth of algae in spas, whirlpools, and hot tubs.
Spas containing heavy growth of algae should be treated prior to using this product. Spas, whirlpools, or hot tubs having just visible algae growth should use an initial dose of 2-4 fluid ounces of this product per 1,000 gallons of water. To treat a freshly cleaned and filled spa, use the initial dose of 1-2 fluid ounces of this product per 1,000 gallons of water. Subsequent additions of 0.3-0.8 fluid ounces of this product per 1,000 gallons of water should be made every 5-7 days after initial treatment for maintenance. Wait at least 15 minutes after application before entering spa.

WINTER ALGAE PREVENTATIVE FOR SWIMMING POOLS
This product should be used as directed to prevent growth of algae during the off-season winter months when pools are not in use. This non-foaming algicide preventative works to prevent algae growth when the pool is not being used due to cold winter temperatures.
For pools which have been properly treated during the swimming season and are free of visible algae, add 13-21 fluid ounces of this product per 10,000 gallons of water. At the end of the swimming pool season pool has some visible algae growth, add 25-37 fluid ounces per 10,000 gallons. It is necessary that uniform distribution in this product throughout the pool to be made for maximum effectiveness. If pool is not covered, it may be necessary to reapply the treatment one or more times during the off season.
This product is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. This product can be used in pools and spas treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not use this product with concentrated or liquid chlorine products.

NOTE: Buyer assumes all responsibility for safety and use in accordance with directions.

STORAGE AND DISPOSAL:
Do not contaminate water sources. Store in original container.
STORAGE: Keep container closed when not in use. Leaking or damaged containers should be placed in plastic bag and discarded in trash. Keep out of reach of children and flamed away from food.
DISPOSAL: If empty, return to retailer. Do not reuse or refill this container. Offer for recycling if available.
If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
