PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes skin burns and moderate eye irritation. Harmful if inhaled or swallowed. Do not get in eyes, on skin, or on clothing. Avoid breathing fumes, vapors or dust. When spraying and/or sanding boat surfaces, wear a NIOSH/MSHA certified mask or respirator. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Wear chemically-resistant gloves, chemical-resistant apron (or other protective clothing), non-permeable eyewear (goggles, face shield or safety glasses), and chemical-resistant footwear. Remove contaminated clothing and wash clothing before reuse. May pose an aspiration pneumonitis hazard.

FIRST AID

IF IN EYES: • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.

IF SWALLOWED: • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.

IF INHALED: • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING: • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15 - 20 minutes. • Call a poison control center or doctor for further treatment advice.

How the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also call 1-800-548-0242 for emergency medical treatment information.

PROOF OF USE

Probable mucosal damage may constitute the use of gastric lavage. This product contains petroleum distillates, VOMITING may cause aspiration pneumonitis.

ENVIRONMENTAL HAZARDS: This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of waste. Do not allow chips and dust generated during paint removal to enter water. Disposal of paint shreds in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans and other water bodies in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent into sewage system without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: Combustible. Do not store or use near heat or open flame. Use only with adequate ventilation during mixing, application and drying. Use absorbent clean-up material if spilled. For fires, blanket flames with foam, CO2 or dry chemical. Wear NIOSH/MSHA certified respiratory equipment.

STORAGE AND DISPOSAL

Do not contaminate water, food, or by disposal. PESTICIDE STORAGE: Keep away from heat and open flame. Store in a closed, properly labeled container in a cool, dry place. Keep container tightly closed and upright to prevent leakage. In case of spillage, absorb and dispose of in accordance with local and state authorities.

PESTICIDE SUSCEPTIBILITY: Pesticide wastes are acutely hazardous. Improper disposal of excessive pesticide, spray mixture, or residue is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Triple tight (i.e. 3 closures). Then offer for recycling or recondition, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

VOC: (as applied) 330 grams/liter. Maximum. Do not bring beyond your state's compliant limit.

NOTICE! THIS PRODUCT CONTAINS A CHEMICAL KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, BIRTH DEFECTS, OR OTHER REPRODUCTIVE HARM.

GENERAL DESCRIPTION: Pettit Marine Paint Wood Anti Fouling Paint is an antifouling protective coating resistant to slime, algae, barnacles and other marine fouling organisms. Copper, Tinophene combined with an organic algicide others unpenetrated control over all types of fouling in even the most severe fouling areas. For use in fresh, salt or blackwater on hulls and underwater parts below the waterline. This paint is intended for use on recreational and commercial vessels of any size.

It is a violation of Federal law to use this product in a manner inconsistent with the labeling.

PREPARATION OF SURFACE: The surface to be painted should be clean, dry and free of any contamination or foreign matter. Always prepare the surface to be painted by sanding and solvent cleaning before any paints or primers are applied. When sanding or antifouling paint use a dust mask to prevent the inhalation of sanding dust. Old, soft bottom paints must be completely removed before applying.

COVERAGE, APPLICATION AND TEMPERATURE: This product can be applied by brush, roller, or spray. All painting should be done between 8:30 a.m. and 4:00 p.m. in order to avoid the possibility of dew or condensation spoiling the application. The temperature range of application should be between 50 and 90°.

To allow adequate time for initial application and for recommended thickness to be achieved, the paint has been thinned for several moments. It is necessary to thoroughly mix the paint before using. It is possible that a thin coat of paint or a mechanical paint shaker. Before using, check the sides and bottom of the can to make sure that it has not been mixed in. If mixing is going to be done by two with a wood stick or an electric drill mixer, pour off half of the liquid from the top of the can into another can and then prime any residue in any separate paint, then rerate the two parts together thoroughly.

THINNING: Use Pettit 121 Brushing Thinner for thinning this product. If needed, slightly on warm or hot day. Pettit 121 Spraying Thinner can be used to thin this product for spraying and for cleaning equipment. Do not thin more than 10% (12 ounces per gallon) or inadequate paint film thickness will occur and premature erosion of the finish will be likely. Do not thin beyond your state's compliant limit.

DRY TIME: The minimum usable time is 4 hours. The minimum dry time between the first coat and last coat is 16 hours. Under adequate drying conditions, such as those encountered on an oil or coal deck, dry times are about 20 minutes by touch. To ensure that all the solvent is out of the paint film. This minimum time before finishing is 160 hours. MAINTENANCE OF ANTI FOUCLING PAINT: No antifouling paint can be effective under all conditions of exposure. Man-made pollution and natural occurrences can adversely affect antifouling paint performance. Extreme heat and cold water temperature, salt, dirt, oil, blackwater and even electronics can cause an antifouling paint. Therefore, it is strongly suggested that the bottom of the boat be checked regularly to make it is clean and that no growth is occurring. Lightly scrub the bottom with a brush to remove anything from the antifouling paint surface. Scrubbing is particularly important with boats that are idle for extended periods of time. This product is most effective when the boat is used periodically.

SYSTEMS

Mix paint thoroughly to ensure that particles are evenly dispersed throughout the can. All surfaces must be clean, dry and properly prepared prior to painting.

PREVIOUSLY PAINTED SURFACES: If the previous coating is in good condition, thoroughly sand with 80-grit sandpaper, then solvent clean with Pettit 120 Brushing Cleaner to remove residue. Apply two fresh coats of this product. If the previous coating is soft or in poor condition, remove to bare surface by sanding or by a paint and rust remover. Proceed with appropriate bare system as described below.

BARE FREIGHTERS: All bare-freighters, regardless of age, should be thoroughly cleaned several times with Pettit 95 Copper 1:10 Brushing Thinner. Sand thoroughly with 80-grit sandpaper to a dull, frothy finish and rinse the sand surface with 96 Freighter Detergent or 1:10 Brushing Thinner to remove sanding residue. Then apply two coats of this product following previous application instructions. Careful observation of the above instructions will help assure long-term adhesion of this and subsequent years antifouling paint. To eliminate the sanding operation, wash the Freighter three times using Pettit 95 Detergent only. Then apply one coat of Pettit 686 Sandless Primer. Read and follow carefully the application and topping instructions on the Sandless Primer label. Apply at least two coats of this product.

BARE WOOD: Sand exterior surface with 80-grit paper, wash clean with Pettit 120 Brushing Thinner. Apply a coat of this product thirded 25% with Pettit 120 Brushing Thinner. Allow an overnight dry, lightly sand and wipe clean. Add two finishing coats of this product.

NOTE: Do not run this product beyond your state's compliant limit.

BARE ALUMINUM: Avoid the surface to clean. Bright metal by sandblasting, sanding or wire-brushing. Blow off or vacu.

off sanding residue so that the surface is clean and dry, then immediately apply one coat of Pettit 464/454 Metal Primer or two coats of Pettit AlumaPrime (400/400) Aluminum Epoxy Primer. Let dry two hours and apply two coats of Pettit Primer 470/4701 Epoxy Primer allowing 3 to 18 hours drying between coats (at temperatures of 70°). After the second coat of Pettit Primer has been applied, wait 5 to 8 hours, no more, no less, and apply the first coat of Pettit Anti Fouling Paint.

BARE STEEL: Sandblast to clean. Bright metal and remove blasting residue with clean, dry compressed air or a clean brush. Immediately apply three coats of Pettit 470/4701 Pettit Primer Epoxy Primer followed by two fresh coats of this product. Read and follow carefully the instructions on the 470/4701 Pettit Primer Epoxy Primer label. If the surface to be painted will be prepared using hard tools such as wire wheels or sandblasting. Clean-off residual and immediately apply one coat of Pettit 686 Freighter Filler Primer. Let dry 1-2 hours and follow with two coats of Pettit 470/4701 Pettit Primer Epoxy Primer. Apply two finishing coats of this product. Read and follow carefully the instructions for application and topping on both primer labels. UNDERSHIELD METAL PARTS: Use Pettit 649 Underwater Metal Kit for surface preparation instructions and priming underwater metal running gear.

WARRANTY: We guarantee this material to comply with our published specifications. Since the use of this material is beyond our control, we disclaim responsibility for its handling, use, storage, the results obtained or any injury or damage of any nature resulting therefrom.
