APICIDE®

PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals
CAUTION
Harmful if swallowed. Harmful if absorbed through the skin. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to aquatic invertebrates. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsates. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area.

FIRST AID
This product is an N-methyl carbamate and is a cholinesterase inhibitor.

In Swallowed: • Call poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.
• Do not give anything by mouth to a unconscious person.

In Eyes: • Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If on Skin or Clothing: • Take off contaminated clothing.
• Wash hands thoroughly with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a poison control center or doctor or going for treatment.
You may also contact 1-800-434-1102 or 1-800-898-7778 for emergency medical treatment information.

NOTE TO PHYSICIAN AND VETERINARIANS: The active ingredient is an N-methyl carbamate insecticide which is a cholinesterase inhibitor. Specific antidote consists of atropine. Naloxone and other sedatives should not be used. Drugs like 2-PAM (pyridostigmine-2-allylthiohydantoin) are not recommended.

Notice: Manufacturer warns that this product conforms to the chemical description on the label and is rationally fit for the specific purposes referred to in the instructions for use, subject to the inherent risks referred to above. To the extent consistent with applicable law, manufacturer makes no other express or implied warranty of fitness or merchantability, or any other express or implied warranty. To the extent consistent with applicable law, in no case shall manufacturer be liable for consequential, special, or indirect damages resulting from the use, handling, or application of this product. To the extent consistent with applicable law, buyer assumes all risks of use, storage or handling of this material and is in strict accordance with directions and cautions stated on the label.

SHAKE CONTAINER TO LOOSEN DUST BEFORE USING.

KILLS
BEES • WASPS
YELLOW JACKETS
HORNETS
CARPENTER BEES

USE ONLY IN AREAS WHERE THERE IS LITTLE OR NO FLOW OF AIR THAT COULD DISTURB THE DOCK. DO NOT APPLY THIS PRODUCT IN A WAY THAT WILL CONTACT ANY PERSON OR PETS, DIRECTLY OR THROUGH DRIFT. KEEPS CHILDREN AND PETS OUT OF THE AREA DURING APPLICATION. DO NOT ALLOW PEOPLE OR PETS TO ENTER THE TREATED AREA UNTIL DUSTS HAVE SETTLED.

STORAGE AND DISPOSAL
Storage: Store product in original container and place in a locked storage area.
Disposal: If Empty: Do not reuse empty container. Place in trash or offer for recycling if available. If Partially Filled: Call your local solid waste agency or 1-800-CLEANUP (2) for disposal instructions. Never place unused product down any indoor or outdoor drain.

HOMY BEES: Honey bees are beneficial insects and must not be indiscriminately killed. Application must only be done when there is no immediate threat to four and their pets. Consider contacting an experienced beekeeper to determine if a swarm or nest of honey bees can be peaceful and relocated. Locate the nest near or within an area where the bees are likely to be disturbed by opening or closing windows or doors.

CARPENTER BEES: Apply Apicide directly into the entry to the cavity. Do not plug up with stones. Allow the bees to pass through the entrance where they will contact the dust and distribute it to the galleries. Wait until all activity ceases or until autumn before sealing the holes. To avoid blocking the air passage, do not use wood putty, plaster patch, or other impermeable material. Allow 72 hours for Apicide to completely kill the colony. Once the bees are killed, the cavity will look in which they have been roosting should be spread and the mite removed. If the infested honey bee may escape through the walls and attract other pests. This product may not be used indoors.
