FIRST AID

Have the product container or label with you when calling a Poison Control Center or doctor for treatment.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If by Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

SOLD BY:
Osmose, Inc.
980 Ellicott Street
Buffalo, NY 14209

This product is a concentrated biocide for use as a wood preservative. When used as directed, this product will protect treated wood products from the destructive attack of fungi, mold, mildew and both Reticulitermes and Termes species of termites. Treatment can be done by pressure. Wood articles that will be protected by these treatments will include millwork, construction timbers, decking, wood shingles, posts and other articles to be used in above ground applications.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCORRECT WITH ITS LABELING.

This product can be used in combination with other EPA registered organic and inorganic wood preservatives or it can be used alone.

DAC-QM and Copper Compounds:
Mix this product with water and either NW 100-C (EPA Reg. No. 3008-87), or NW 200-C (EPA Reg. No. 10465-33-3008). Refer to the product labels for NW 100-C and NW 200-C for precise mixing instructions. This product may only be used in combination with copper compounds in pressure treatment applications.

PRESSURE TREATMENT:
Place the wood article to be treated into the pressure cylinder and seal unit. Treat the wooden articles using the pressure treatment procedures consistent with the equipment being used and standard treatment practices. Treatment conditions should be such as to produce a 0.1 to 0.6 lbw. foot retention in the treated article. Such treated wood is to be used for above ground uses only.

Personal Protection Equipment for Pressure Treatment:
Applicators must wear gloves, which are chemical-resistant (such as nitrile or butyl) in all situations where dermal contact is expected (i.e. handling freshly treated wood and manually opening cylinder doors). Individuals who enter pressure treatment cylinders and other related equipment that are contaminated with the wood treatment solution (e.g., cylinders that are in operation or are not free of all treatment solution) must wear coveralls over a long sleeved shirt and long pants, socks, chemical-resistant footwear, and protective eyewear. Federal, State and local confined space entry procedures need to be taken.

Applicators must not eat, drink or use tobacco products during those parts of the applications process that may expose them to the wood treatment formulation (e.g., manually opening/dosing cylinder doors, moving trams out of cylinders, mixing chemicals, handling freshly treated wood.)

Wash thoroughly after skin contact and before eating, drinking, use of tobacco products or using restroom.

Protective clothing must be changed when it shows signs of contamination. Applicators must leave protective clothing and work shoes or boots and equipment at the plant. Worn out protective clothing and work shoes or boots must be left at the plant and disposed of in a manner approved for pesticide disposal and in accordance with State and Federal regulations.
