PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes severe eye damage and skin irritation. Do not get in eyes, on skin, or clothing. Harmful if swallowed or inhaled. Avoid breathing dust. Wear protective eyewear (goggles, face shield or safety glasses). Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse. When prolonged or frequently repeated contact could occur, use chemically resistant gloves and full body clothing.

PHYSICAL AND CHEMICAL HAZARDS
Oxidizing agent. Contact with combustible materials may cause fire.

ENVIRONMENTAL HAZARDS
When applying PAK™27 to water bodies, avoid solid particles from falling on nearby ground where birds and feed may be present. Undissolved particles of sodium carbonate peroxyhydrate may be corrosive to beaks of birds.

DIRECTONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR CONTROL OF BLUE - GREEN ALGAE IN LAKES, PONDS, DRINKING WATER RESERVOIRS AND AQUACULTURE
- Apply 3.0 to 16.9 pounds per acre - foot (0.0 to 51.9 pounds/million gallons) of water (equivalent to 0.3 to 1.7 ppm hydrogen peroxide) by broadcasting or use of a mechanical spreader.

Note: Algae control is more easily achieved if treated soon after growth starts. Larger amounts of product may be needed to treat heavier blooms. As little as 2.5 pounds per acre - foot could be used for algaeatic treatment.

Precaution: Decaying algae can deplete dissolved oxygen which can lead to fish kill, if excessive. Apply with 8 to 10 hours of daylight remaining. Do not reapply within 48 hours. If treating a large lake or heavy bloom, treat 1/3 to 1/2 of the area and wait 2 to 3 days before treating remainder of water. Consult with the State agency with primary responsibility for regulating pesticides before applying to public waters to determine if a permit is needed.

PAK™27 Algaecide

ACTIVE INGREDIENT:
Sodium Carbonate Peroxyhydrate ........... 85 %
OTHER INGREDIENTS ....................... 15 %
Total: ........................................... 100.0%

KEEP OUT OF REACH OF CHILDREN
DANGER: Corrosive

FIRST AID
If in eyes - Hold eye open and rinse slowly for 15 - 20 minutes.
- Remove contact lenses, if present, after the first five minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If inhaled - Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth - to - mouth.
- Call a poison control center or doctor for treatment advice.

If on skin - Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 - 20 minutes.
- Call a poison control center or doctor for treatment advice.

If swallowed - Call a poison control center or doctor immediately for treatment advice.
- Have person drink plenty of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

In Emergency: Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

For emergency, call CHEMTREC® (800) 424-9300

NOTE TO PHYSICIAN: Probable mucousal damage may contraindicate the use of gastric lavage.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR CONTROL OF BLUE-GREEN ALGAE IN LAKES, PONDS, AND RESERVOIRS
- Apply 3.0 - 16.9 pounds per acre-foot (9.0 - 51.9 pounds/million gallons) of water (equivalent to 0.3 - 1.7 ppm hydrogen peroxide) by broadcasting or use of a mechanical spreader to dose the solid product over the surface of the water. In bodies of water where aerators are available, the material may be dosed at the edges while the aerator runs to allow for adequate mixing. Additionally, the material may be dosed in the turbulence created by the aerator to facilitate rapid mixing.

Note: Blue-green algae control is more easily achieved if treated soon after growth starts. Larger amounts of product may be needed to treat heavier blooms. As little as 2.5 pounds per acre-foot could be used for algaecidal treatment.

Precaution: Decaying algae can deplete dissolved oxygen which can lead to fish kill, if excessive. Apply with 8 to 10 hours of daylight remaining. Do not reapply within 48 hours. If treating a large lake or heavy bloom, treat 1/3 to 1/2 of the area and wait 2 to 3 days before treating remainder of water.

STORAGE AND DISPOSAL
DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE AND DISPOSAL

STORAGE
Store in original, closed container in a dry location away from heat and out of direct sunlight. Keep away from combustible material. Do not return unused product to container.

PESTICIDE DISPOSAL
Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide spray mixture, or rinsate, is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL
Completely empty sack into application equipment. Then dispose of empty sack in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
