Net Contents: 9.2 ounces (260g)

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS: This product may be used only to deter bears which are approaching or appear likely to attack humans.

Do not seek out encounters with bears or intentionally provoke them. This product may not be effective in all situations or prevent all injuries. Do not spray this product on hosts, other objects, or on clothing. Such use has no deterrent affect on bears. Keep safety clip in place except when spraying with or using the product. Do not eat or allow to be eaten any food or feed materials which may have become contaminated with the product. Use with caution. Contents will cause pain and temporary impairment to eyes, nose, mouth and lungs. Individuals who suffer from asthma or emphysema may have a more severe reaction.

This product has a range of up to 30 feet (9 meters).
The container porvides sumply in approximately 4 seconds (235g container) 5.4 seconds (260g container).

APPLICATION DIRECTIONS: Special procedure must be followed to arm the container, apply the product, and dispose the safety clip to the container. Before placing the product into bear country, read the directions and familiarize yourself with these procedures. If you tarter this container, do it with your back to the wire in an area away from people and bears. Do not test Peppe Power® in an area where you plan to camp, hunt, fish, or travel. Do not test for more than half a second. After testing, clean nozzle and cap with soap and water to remove residue. If you have not used this product before, you should obtain a UDAP training can and practice with it until you can perform, quickly and accurately, the activities described in the column below.

10 ART AND APPLS: Place Houston through loop in hand with thumb on exit of safety clip (Fig. 1). With thumb roll safely and straight back. This will expose the trigger. When trigger lever is released and a 1 second burst of spray (Fig. 2). This should be done as the attacking bear is charging toward you and is almost 40 feet away (23 seconds from reaching you). The wind that can or can not greatly affect the accuracy of the initial burst of spray. In some cases, you may have to wait until the bear is close to your before spraying. If the bear makes it through the initial burst of spray, continue spraying, staring for the face. Shield your eyes and face if you must face the wind.

TO DISARM: Replace safety clip as illustrated (Fig. 3).
