PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals
DANGER: Corrosive: causes irreversible eye damage. Harmful if swallowed, inhaled or absorbed through skin. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Wear goggles or face shield. Thoroughly wash with soap and water after handling. Remove contaminated clothing and wash separately before reuse.

FIRST AID
Have the product container or label with you when calling a poison control center or doctor or going for treatment. If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. If Swallowed: Immediately call a poison control center or doctor for treatment advice. Have person drink large amounts of water if able to swallow. Avoid alcohol. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. If on Skin or Clothing: Take off contaminated clothing. Immediately rinse skin with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice. Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

Physical or Chemical Hazards
Use only clean, dry utensils. Mix only into water. Contamination with moisture, dirt, organic matter or other chemicals (including pool chemicals) or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. Avoid any contact with flaring or burning materials such as a lighted cigarette. Do not use this product in any chlorinating device that has been used with any inorganic or un stabilized chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal. Storage: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsewater is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your state pesticide or environmental control agency, or the hazardous waste representative at the nearest EPA Regional Office for guidance. Container Disposal: Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. Thoroughly rinse empty container with water to dissolve all material before discarding in trash or recycling.

EPA Reg. No. 65570-2 EPA Est. 65570-WI-001 900 Green Valley Rd., Beaver Dam, WI 53916 Activon 1-800-841-0410 www.activon.com
To control the growth of bacteria to a minimal level, follow these simple steps:

1. Control air and water temperatures to prevent bacterial growth. Air temperature should be maintained below 21°C (70°F) and water temperature should be maintained below 45°C (113°F).
2. Chemical sanitizers should be used to control bacterial growth. Sanitizers are used to control bacterial growth by inactivating, killing, or dispersing the bacteria. Sanitizers can be used in conjunction with other methods to control bacterial growth.
3. Sanitizers can be used in the following ways:
   - Spray the solution on the surface or into the area to be sanitized.
   - Use the solution to clean the area.
   - Use the solution to clean the area and then rinse with water.
4. Sanitizers are available in various forms, including liquid, gel, and powder. The type of sanitizer used will depend on the surface to be sanitized and the desired level of sanitation.

**Sanitizer Use Guidelines**

- Use in areas where food is handled or prepared.
- Use in areas where food is stored or processed.
- Use in areas where food is served.
- Use in areas where food is transported.

**Sanitizer Selection**

- Choose a sanitizer that is effective against the bacteria present in the area.
- Choose a sanitizer that is safe for the surfaces to be sanitized.
- Choose a sanitizer that is compatible with the equipment and materials used in the area.

**Sanitizer Handling**

- Store sanitizer in a cool, dry place.
- Use sanitizer according to the manufacturer’s instructions.
- Use sanitizer in a well-ventilated area.
- Use sanitizer according to the manufacturer’s instructions.

**Sanitizer Disposal**

- Dispose of sanitizer in a designated area.
- Dispose of sanitizer according to local regulations.

**Sanitizer Labeling**

- Keep sanitizer labels for at least 3 years.
- Use sanitizer according to the manufacturer’s instructions.

**Sanitizer Tracking**

- Keep a record of the date the sanitizer was used.
- Keep a record of the area that was sanitized.
- Keep a record of the results of the sanitation.

**Sanitizer Training**

- Provide training for all personnel who will be using sanitizer.
- Ensure that personnel are aware of the importance of sanitation.
- Ensure that personnel are trained in the proper use of sanitizer.

**Sanitizer Compliance**

- Ensure that all personnel are compliant with the sanitation guidelines.
- Ensure that all personnel are aware of the consequences of non-compliance.
- Ensure that all personnel are compliant with the sanitation guidelines.
