SPECTRUS* NX1102
SLIME CONTROL AGENT

Lot Number: 38756-95
Material ID: 6007616
Net Weight: 60.00 lb

Packaging Date: 05/20/2011
Made in USA
Wash:

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

ACTIVE INGREDIENT:
2,2-Dibromo-3-nitropropanol... 20.0%
INERT INGREDIENTS:
80.0%
TOTAL:
100.0%

*Inert ingredients include solubilizing and dispersing agents.

CONTENTS:
LIQUID
POUNDS PER GALLON: 10.6 (60°F)

EPA REGISTRATION NUMBER: 3876-95
EPA ESTABLISHMENT NUMBER: 3876-01-001

KEEP OUT OF REACH OF CHILDREN

DANGER

USER SAFETY REQUIREMENTS

Users must wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. User must remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. User must remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.

PESTICIDE STORAGE: Keep container tightly closed. Store in a cool, dry well-ventilated place. Do not store at elevated temperatures.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Program, the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill container. Triple rinse container (or equivalent) promptly after emptying. Offering for reconditioning if appropriate. Triple rinse as follows: Empty remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over into its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times.

CONTAINER DISPOSAL: Refillable container. Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.
SPECTRUS* NX1102
SLIME CONTROL AGENT

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

RECYCLING COOLING WATER SYSTEMS: This product aids in the control of bacterial, fungal and algal slime in evaporative condensers, heat exchange water systems, commercial and industrial cooling towers, influent systems such as flow-through filters and lagoons, industrial water scrubbing systems and brewery pasteurizers. NOTE: Add this product separately to the system. DO NOT mix it with other additives in order to avoid decomposition of this product and feeding and duration of the treatment will depend upon the severity of contamination. Optimum performance with this product is attained by continuous or intermittent treatment. If "shock" treatment is used, blowdown must be before treatment is begun.

FOR CONTROL OF BACTERIA
INTERMITTENT OR SLUG METHOD - INITIAL DOSE: When the system is noticeably fouled, add this product at the rate of 0.05 to 0.1 lb. (8 to 12 ppm) per 1000 gallons of water in the system. Repeat until control is achieved.
SUBSEQUENT DOSE: When microbial control is evident, add this product at the rate of 0.025 to 0.01 lb. (3 to 12 ppm) per 1000 gallons of water in the system every 4 days as needed to maintain control.

FOR THE CONTROL OF FUNGI AND ALGAE
INTERMITTENT OR SLUG METHOD - INITIAL DOSE: When the system is noticeably fouled, add this product at the rate of 0.05 to 0.1 lb. (8 to 12 ppm) per 1000 gallons of water in the system. Repeat until control is achieved.
SUBSEQUENT DOSE: When microbial control is evident, add this product at the rate of 0.025 to 0.01 lb. (3 to 12 ppm) per 1000 gallons of water in the system. Repeat until control is achieved.

METAL-WORKING CUTTING FLUIDS CONTAINING WATER: This product is effective in metal working fluid concentrates which have been diluted in water at ratios of 1:100 to 1:4. For controlling (or inhibiting) the initial or slug dosage: When metal is noticeably fouled, add this product at the rate of 0.05 to 0.1 lb. (8 to 12 ppm) per 1000 gallons of water in the system. Repeat every 4 days as needed to maintain control.

SUBSEQUENT DOSE: When microbial control is evident, add this product at the rate of 0.025 to 0.01 lb. (3 to 12 ppm) per 1000 gallons of water in the system. Repeat every 4 days as needed to maintain control.

AIR WASHERS: For use only in indirect air washer systems that maintain effective mist eliminating components. This product controls slime forming bacteria and fungi in industrial air washer systems. Add this product at the rate of 0.016 to 0.1 lb. (1.6 to 12 ppm) per 1000 gallons of water in the system. Repeat every 4 days as needed to control contamination. BADLY FOULED SYSTEMS must be cleaned before treatment is begun.

CONTINUOUS FEED METHOD - INITIAL DOSE: When the system is noticeably fouled, add this product at the rate of 0.025 to 0.1 lb. (3 to 12 ppm) per 1000 gallons of water in the system. Repeat every 4 days as needed to control contamination. BADLY FOULED SYSTEMS must be cleaned before treatment is begun.

CONTINUOUS FEED METHOD - INITIAL DOSE: When the system is noticeably fouled, add this product at the rate of 0.016 to 0.1 lb. (1.6 to 12 ppm) per 1000 gallons of water in the system. Repeat every 4 days as needed to control contamination. BADLY FOULED SYSTEMS must be cleaned before treatment is begun.

NON-POSSIBLE REVERSE OSMOSIS SYSTEMS: For controlling bacteria, fungi and algae slime in non-potable REVERSE OSMOSIS systems and peripheral equipment, add this product to the system inlet water or specified by the manufacturer for this product. Add this product at the rate of 0.01 to 0.1 lb. (1 to 12 ppm) per 1000 gallons of feed water. During use of this product both permeate and reject water must be cleaned before treatment is begun.

FOR THE CONTROL OF BACTERIA - INITIAL DOSE: When the system is noticeably fouled, add this product at the rate of 0.05 to 0.1 lb. (8 to 12 ppm) per 1000 gallons of feed water. Minimum treatment intervals must be 15 minutes. Repeat until control is achieved as specified by guidelines recommended by the membrane manufacturer. SUBSEQUENT DOSE: When microbial control is achieved, add this product at the rate of 0.025 to 0.1 lb. (3 to 12 ppm) per 1000 gallons of feed water as needed to maintain control or as specified by guidelines recommended by the membrane manufacturer.

FOR THE CONTROL OF FUNGI AND ALGAE - INITIAL DOSE: When the system is noticeably fouled, add this product at the rate of 0.5 to 1.0 lb. (8 to 12 ppm) per 1000 gallons of feed water. Minimum treatment intervals must be 15 minutes. Repeat until control is achieved as specified by the guidelines recommended by the membrane manufacturer. SUBSEQUENT DOSE: When microbial control is achieved, add this product at the rate of 0.3 to 1.0 lb. (36 to 120 ppm) per 1000 gallons of feed water as needed to maintain control or as specified by the guidelines recommended by the membrane manufacturer.
