PRECAUTIONARY STATEMENTS

CAUTION

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators and other handlers must wear: Long-sleeved shirt and long pants, shoes plus socks.

USER SAFETY REQUIREMENTS
Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(c)-(d)], the handler PPE requirements may be reduced or modified as specified in the WPS.

USER SAFETY RECOMMENDATIONS
Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

ENVIRONMENTAL HAZARDS
For terrestrial use: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsates.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval (REI). The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 hours unless wearing appropriate PPE. PPE and work clothing required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil or water, is:
- Coveralls
- Waterproof gloves
- Shoes plus socks.

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides [40 CFR Part 170]. The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Keep unprotected persons out of treated areas until sprays have dried.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or Tribe, consult the agency responsible for pesticide regulations.

GENERAL CHEMIGATION INSTRUCTIONS
Apply this product only through sprinkler including center pivot, lateral move, side (wheel) roll, travel, big gun, solid set or hand-move irrigation systems. Do not apply this product through any other type of irrigation system. Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from non-uniform distribution of treated water.

If you have questions about calibration, you should contact experts.
Do not connect an irrigation system (including green the pesticide label prescribed safety devices for public safety). A person knowledgeable of the chemigation system shall shut the system down and make necessary adjustments.

CHEMIGATION SYSTEMS
Public water system means a system for the provision of at least 15 service connections or regularly serves an area. Chemigation systems connected to public water systems or functional equivalent in the water supply line of water from the public water system should be discharge physical break (air gap) between the outlet and inside diameter of the fill pipe. The pesticide injection pipeline must contain a 1/4 inch toward the injection pump.

The pesticide injection line pipeline must contain a 1/2 inch injection pump and connected to the system interlock system is either automatically or manually shut down. The system must contain functional interlocking core stops, or in cases where there is no water pump, a adversely affected.

Systems must use a metering pump, such as a posit constructed of materials that are compatible with the system. Do not apply when wind speed favors drift beyond the system. The pesticide supply tank should be agitated through the end of the water application. KickStand® PGR should be applied at the end of 1 plant or crop but not to exceed 12 fluid ounces of Ki

SPRING
The system must contain a functional check valve, to prevent water source contamination from the pesticides injection pipeline must contain a 1 inch toward the injection pump.

The pesticide injection line pipeline must contain a 1/2 inch injection pump and connected to the system interlock system is either automatically or manually shut down. The system must contain functional interlocking core stops. The irrigation line or water pump must include a 1/2 inch pressure decreases to a point where pesticide distribution system must use a metering pump, such as a posit constructed of materials that are compatible with the system. Do not apply when wind speed favors drift beyond the system. The pesticide supply tank should be agitated through the end of the water application. KickStand® PGR should be applied at the end of 1 plant or crop but not to exceed 11 fluid ounces of Ki

IMPORTANT: Read the entire "Directions For 1 product. If terms are not acceptable, return the product. “
CHEMIGATION SYSTEMS CONNECTED TO PUBLIC WATER SYSTEMS

Public water system means a system for the provision to the public of piped water for human consumption, if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days out of the year. Chemigation systems connected to public water systems must contain a functional, reduced-pressure zone, backflow preventer (RPZ) or the functional equivalent in the water supply line upstream from the point of pesticide introduction. As an option to the RPZ, the water from the public water system should be discharged into a reservoir tank prior to pesticide introduction. There shall be a complete physical break (air gap) between the outlet and the fill pipe in the top or overflow rim of the reservoir tank of at least twice the inside diameter of the fill pipe.

The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

The pesticide injection pipeline must contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.

The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the pump motor stops, or in cases where there is no water pump, when the water pressure decreases to the point where pesticide distribution is adversely affected.

Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with the pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed favors drift beyond the area intended for treatment.

The pesticide supply tank shall be agitated throughout the application of KickStand® PGR. KickStand® PGR should be applied at the end of the water application.

KickStand® PGR should be applied at the end of the irrigation period in a sufficient amount of water to allow proper coverage of plant or crop but not to exceed 11 fluid ounces of KickStand® PGR per acre per application.

SPRINKLER CHEMIGATION

The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.

The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being withdrawn from the supply tank when the irrigation system is either automatically or manually shut down.

The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.

The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to a point where pesticide distribution is adversely affected.

System must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.

Do not apply when wind speed favors drift beyond the area intended for treatment.

The pesticide supply tank shall be agitated throughout the application of KickStand® PGR. KickStand® PGR should be applied at the end of the water application.

KickStand® PGR should be applied at the end of the irrigation period in a sufficient amount of water to allow proper coverage of plant or crop but not to exceed 11 fluid ounces of KickStand® PGR per acre per application.

IMPORTANT: Read the entire “Directions For Use” and the “Warranty and Disclaimer Statement” before using this product. If terms are not acceptable, return the unopened product container at once.

KickStand® PGR, containing Axicel® F fertilizers. KickStand® PGR is effective, compatible with liquid fertilizer and antisiphon protection.

KickStand® PGR is compatible with applications that contain pesticides. Always in the event of pesticide mixing, if this product is to be tank mixed with compatibility, use a small container as the anticipated use. If any indication do not use this mixture for spraying.

1. Water
2. Fertilizer

APPLICATOR

For in-furrow, banded, side-dressed applications in conjunction with or following the PGR is incorporated, injected, or applied.

APPLICATOR

KickStand® PGR may be directly impregnated with label rates per acre when indefinite shelf life.

Mix 6–10 fl. oz. with each 100 gallons

GENE

Row or Band and Injection Application Broadcast Applications: Use KickStand® PGR, containing Axicel® F fertilizers. KickStand® PGR is effective, compatible with liquid fertilizer and antisiphon protection.

The following is a broad listing of crops crop group, as classified under 40 CFR 158. Each group is given after the group an exhaustive list of those crops within For application rates for any given crop.

BRASSICA (COLE) LEAFY VARIETIES

Collards, Kale, Kohlrabi, Mustard Green

CUCURBITS: (Cantaloupe, Casaba & Pumpkins, Summer Squash, Watermelon

LEAFY VEGETABLES (EXCEPT BRUSSELS SPROUTS)

BEANS, TUBER AND BULB VEGETABLES

Leek, Onion, Parsley, Parsnip, Potato

FRUITING VEGETABLES: (Bell Peppers, Tomato, Tomatoe)

LEGUMES: (Beans including Lupinus Beans, Lentils, Peas, Soybeans.)
GENERAL INFORMATION

KickStand® PGR, containing Asset Formulation Technology, is a plant growth regulator designed for use with pesticides and/or fertilizers. KickStand® PGR is effective in increasing the rate of growth and development of plant systems. KickStand® PGR is compatible with liquid fertilizer and anhydrous ammonia.

SPRAY MIX COMPATIBILITY

KickStand® PGR is compatible with a wide range of fertilizer and pesticide products. Good agitation must be maintained for those applications that contain pesticides. Always check compatibility prior to mixing and apply any pesticide spray mix as soon as possible. In the event of pesticide mixing problems, the addition of a compatibility agent is recommended.

If this product is to be tank mixed with fertilizers or with other pesticides, compatibility should be tested prior to mixing. To test for compatibility, use a small container and mix a small amount (0.5 to 1 quart) of spray, combining all ingredients in the same ration as the anticipated use. If any indications of physical incompatibility develop, such as separation, sedimentation, gel formation, etc., do not use this mixture for spraying. Indications of incompatibility usually will appear within 5 to 15 minutes after mixing.

MIXING SEQUENCE

APPLICATIONS WITH SOIL-APPLIED FERTILIZER

For in-furrow, banded, side-dressed and broadcast applications through conventional equipment, apply KickStand® PGR in conjunction with and/or following the application of pesticides and/or fertilizers. Best results are obtained when KickStand® PGR is incorporated, injected, or applied in a zone or band in the soil at a minimum depth of two (2) to four (4) inches.

APPLICATIONS WITH DRY GRANULAR FERTILIZERS

KickStand® PGR may be directly precipitated on dry granular fertilizers. Apply sufficient KickStand® PGR to provide the recommended label rates per acre when treated fertilizer is applied. Dry granular fertilizers treated with KickStand® PGR have an indefinite shelf life.

TRANSPLANT SOLUTIONS

Mix 6-10 fl oz. with each 100 gallons of transplant solution.

GENERAL DOSAGE RECOMMENDATIONS

Row or Band and Injection Applications: Use KickStand® PGR at the rate of five (5) to six (6) fluid ounces per acre. Broadcast Applications: Use KickStand® PGR at the rate of ten (10) to eleven (11) fluid ounces per acre.

RECOMMENDED CROPS

The following is a broad listing of crops on which KickStand® PGR is recommended for use. All commodities within an established crop group, as classified under 40 CFR § 190.41, are considered to be appropriate for this product. A brief listing of crops within each grouping is given after the group name as an example of those crops represented. The examples given are not meant to be an exhaustive list of those crops within any grouping, and should not be construed as such.

For application rates for any given crop, use at the general dosage recommendation, unless otherwise indicated.

VEGETABLES

BRAVSSICA (COLE) LEAFY VARIETIES: (Broccoli, Brussels Sprouts, Cabbage, Chinese Cabbage, Cauliflower, Chinese Mustard, Collards, Kale, Kohlrabi, Mustard Greens, Rave Greens)

CUCURBITS: (Cantaloupe, Casaba Melons, Cucumbers, Gherkins, Gourds, Honeydew Melons, Mango Melons, Musk melons, Pumpkins, Summer Squash, Watermelons, Winter Squash)

LEAFY VEGETABLES (EXCEPT BRAVSSICA): (Celery, Cress, Endive, Fennel, Lettuce, Orach, Spinach, Swiss Chard)

ROOT, TUBER AND BULB VEGETABLES: (Artichokes, Burdock, Carrots, Cassava, Chicory, Garlic, Ginger, Ginseng, Horseradish, Leek, Onion, Parsley, Parsnip, Potato, Radish, Rutabaga, Saffron, Shallot, Sweet Potato, Turnips, Yams)

FRUITING VEGETABLES: (Ball Peppers, Chile Peppers, Cooking Peppers, Eggplant, Ground Chay, Papinos, Pimientos, Sweet Peppers, Tomatillo, Tomatoes)

LEGUMES: (Beans including Lupinus spp., Phaseolus spp., and Vigna spp., Broadbeans, Chickpeas, Guar, Jackbean, Lablab Beans, Lentils, Peas, Soybeans)
FIELD CROPS

CEREAL GRAINS: (Barley, Buckwheat, Corn, Millet, Oats, Popcorn, Rice, Rye, Sorghum [milo], Wheat, Wild Rice).

WHEAT: Winter Wheat – Apply 6 fluid ounces prior to or at planting followed by 6–11 fluid ounces applied pre-greenup and up to anthesis growth stage 5. Spring Wheat – Apply 6–11 fluid ounces prior to or at planting. If needed, apply an additional 6–11 fluid ounces at anthesis growth stage 5.

RICE: Apply 6–11 fluid ounces per acre at the 3-leaf to tillering stage of plant growth.

COTTON: Apply 5–6 fluid ounces per acre in the seed furrow at planting or side-dressed shortly after planting.

FORAGE: Alfalfa, Clover, Grasses, Timothy, Vetch.

TREE CROPS

CITRUS: (Cassimond, Grapefruits, Kumquats, Lemons, Limes, Oranges, Tangelos, Tangerines).

NUTS: (Almonds, Beech Nut, Brazil Nut, Butternut, Cashew, Chestnut, Chinquapin, Filbert, Hickory Nut, Macadamia Nut, Pecan, Walnuts).

POME FRUIT: (Apple, Crabapple, Mayhaw, Pear, Quince).

STONE FRUIT: (Apricots, Cherries [Sweet and Sour], Nectarines, Peaches, Plums, Prunes).

SMALL FRUITS AND BERRIES

(Blackberries, Blueberries, Boysenberries, Cranberries, currants, Dewberries, Elderberries, Gooseberries, Grapes, Huckleberries, Olallieberries, Raspberries, Strawberries, Youngberries).

HERBS

MISCELLANEOUS COMMODITIES (NOT LISTED ELSEWHERE ON THIS LABEL): (Avocado, Hops, Kiwi Fruit, Grapes, Bananas, Figs, Peanuts, Pineapple, Mango, Onions, Mushrooms, Papaya, Persimmon).

ORNAMENTALS

(Flowers, shrubs, trees, deciduous nursery stocks [trees, shrubs, and flowers] and greenhouse crops and other ornamentals): Apply 5–8 fluid oz. in 100 gallons of water as a drench solution for soil and media, or apply 10 oz. in 100 gallons of water as a directed spray. The applied spray solution should be incorporated into the root zone by irrigation or rainfall.

SOD FARMS

Apply 6–11 fluid ounces per acre with fertilizer and irrigate to incorporate into the soil profile. Apply 4–8 times per season.

TURF

(Greens, Tees, Fairways, and Lawns): Apply 10 oz. in 100 gallons of water per acre and incorporate into the root zone by irrigation.

SEED TREATMENT APPLICATION

Use KickStand® PGR as a seed treatment that aids in the enhancing germination and early season root development. The application of 1/4 to 3/8 oz. per 100 lbs of seed is recommended for the following crops:

<table>
<thead>
<tr>
<th>Crop</th>
<th>Peanuts</th>
<th>Soybeans</th>
<th>Cotton</th>
<th>Rice</th>
<th>Sugar Beets</th>
<th>Dry Beans</th>
<th>Sorghum</th>
<th>Wheat</th>
</tr>
</thead>
</table>

 POTATO SEED PIECES

Use 1/3 to 1/2 lb. of KickStand® PGR per 100 lbs. of cut seed pieces. Seed pieces should be treated immediately after cutting and apply the material in sufficient water to ensure that they are covered thoroughly.

KickStand® PGR can be mixed with other seed treatments and carriers to ensure that uniform coverage is obtained.

HOPPER BOX APPLICATION

Partially fill the hopper box with a portion of the seed to be treated. Apply the appropriate amount of KickStand® PGR in sufficient water or other carriers directly on the seed surface. Mix with a stick or a codex until all seeds are coated. Repeat the procedure until hopper box is full. DO NOT USE TREATED SEED FOR FOOD, FEED OR OIL PURPOSES.

Treat only those seeds that are needed for immediate use and planting. Do not store excess treated seed beyond the planting time.

STORAGE

Do not contaminate water, food or feed by storage an

PESTICIDE STORAGE: Protect from freezing. Store in

PESTICIDE DISPOSAL: Wastes resulting from the use of this product is

CONTAINER DISPOSAL: Non-refillable container

Non-Refillable (<5 gallons): Triple rinse as follows: fill the container 1/4 full with water. Replace and tighten the cap, complete revolution, for 20 seconds. Stand the cap over onto its other end and tip it back and forth several times for later use or disposal. Repeat this procedure until it is dry. Drain for 10 seconds after the flow begins to drip. Hold container later for use or disposal. Insert pressure rinse nozzle in cap. Drain for 10 seconds after the flow begins to drip. Refillable Container (250 gallon & bulk): Rinse the whole purpose. Clearing the container before final disposal is

WARRANTY ANI

Read the Conditions of Sale – Warranty and Limitation on the back of this label. The warranty on this product is limited to the cost of the product if defective or not conforming to the contract and may be subject to a factor not met in the contract and may be subject to the factors noted.

The exclusive remedy against the Company for any cause at Helena Chemical Company's election, one of the following:

1. Refund the purchase price paid by buyer or user for the product used.
2. Replacement of the product used.

The use of this product shall in no event be interpreted as an indication of its suitability for a particular purpose. The final decision shall be the responsibility of the retailer.

© Copyright Helena Holding Company, 2019.

KickStand® is a registered trademark of Helena Holding Company, Inc. This product was manufactured by HELENA CHEMICAL DATED with this exclusive process.
STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE: Protect from freezing. Store out of direct sunlight.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Non-refillable containers (1, 2.5, 30 & 55 gallons): Do not reuse or refill this container. Offer for recycling, if available. Triple rinse or pressure rinse container (or equivalent) promptly after emptying.

Non-Refillable (<5 gallons): Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinse into equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

Non-Refillable (<5 gallons): Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times.

Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use for disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

Refillable Container (250 gallon & bulk): Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

WARRANTY AND DISCLAIMER STATEMENT

Read the Conditions of Sale—Warranty and Limitations of Liability and Remedies before using this product. If the terms are not acceptable, return the product, unopened, and the full purchase price will be refunded.

The directions on this label are believed to be reliable and should be followed carefully. Insufficient control of pests and/or injury to the crop to which the product is applied may result from the occurrence of extraordinary or unusual weather conditions or the failure to follow the label directions or good application practices, all of which are beyond the control of Helena Chemical Company (the "Company") or seller. In addition, failure to follow label directions may cause injury to crops, animals, man or the environment. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the directions for use subject to the factors noted above which are beyond the control of the Company. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including any implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law.

The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Helena Chemical Company’s election, one of the following:

1. Refund of the purchase price paid by buyer or user for product bought, or
2. Replacement of the product used

To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.
