PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

Causen moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling andlinkedin washing,lng, chewing, or using tobacco. Personal protective clothing and equipment may bead necessary before entering areas where this product is being used.

If in eyes:

FIRST AID

Hold up upper and lower lid gently and w'et with water for 15- 30 minutes. Wash off any exposed areas. If irritation persists, consult a medical doctor. Call a poison control center or doctor for treatment advice.

If on skin:

Rinse areas immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for treatment advice. If irritation persists, consult a medical doctor. Call a poison control center for further treatment advice. Call a doctor if the product is swallowed.

If swallowed:

Do not induce vomiting unless told to do so by a poison control center or doctor. Seek medical help immediately. Call a poison control center or doctor.

If inhaled:

Move person to fresh air. If inhaled, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

NOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-929-5364 for emergency medical treatment advice.

NOTE TO PHYSICIAN

Ingestion of this product or subsequent ventilation can result in aspiration of fatty hydrocarbon liquid, which can cause pneumonia. If aspiration occurs, probable mucosal damage may contribute to the use of gastric lavage.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category G on an EPA chemical resistance category selection chart.

Application and other handlers must wear long-sleeved shirt and long pants, chemical-resistant gloves such as barrier laminates or nitrile, 0.5-mm, asbestos or plastic, and protective eyewear.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product. Do not reuse. Follow manufacturer’s instructions for cleaning/laundrying PPE. If there are no such instructions, use detergent and hot water. Keep and wash PPE separate from other laundry.

USER SAFETY RECOMMENDATIONS

If there are no such instructions for cleaning/laundrying, use detergent and hot water. Keep and wash PPE separate from other laundry.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to one of the products that are not within the scope of the Worker Protection Standard for agricultural pesticides (FED. REG. PART 190). The WPS applies w'vent this product is used to produce agricultural plants on farms, forests, nurseries or greenhouses. Keep all unoccupied persons out of operating areas, or vicinity where there may be drift.

Do not enter treated areas without protective clothing until spray has dried.

ENVIRONMENTAL HAZARDS:

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply where runoff is likely to occur. Do not apply where runoff is likely to occur. Do not apply where runoff is likely to occur. Do not apply where runoff is likely to occur.

The use of this product may have a hazard to the federally designated estuarine-restricted areas of San Diego Bay and Wild Rice. Use of this product is prohibited in the following areas where the species are known to exist:

- San Diego Estuary
- Lower San Diego River
- Upper San Diego River
- Imperial County
- Imperial Bay

Wild Rice:

- Imperial County
- Imperial Valley
- San Diego County
- San Diego River
- Lower San Diego River

PHYSICAL OR CHEMICAL HAZARDS:

Do not use or store near heat or open flame.

DIRECTIONS FOR USE:

If it is a product of Federal law to use this product in a manner inconsistent with its labeling, READ ENTIRE LABEL, USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, contact the agency responsible for pesticide regulations.

AGRICULTURAL USE REQUIREMENTS:

Use this product only in accordance with its labeling and with the Worker Protection Standard at 29 CFR Part 190. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to decontamination and emergency assistance. The WPS contains specific provisions for farms and greenhouses and nursery and greenhouse operations. The regulations also contain provisions for industries and non-governmental organizations. The regulations also contain provisions for industries and non-governmental organizations.

The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI). Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI). Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI). Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI).

PEPP required for early entry to treated areas that is permitted under the Worker Protection Standard and that involved contact with anything that has been treated, such as plants, soil or water, in covered or unclosed over short-sleeved shirt and short pants, chemical-resistant gloves such as barrier laminates or nitrile, 0.5-mm, asbestos or plastic, and protective eyewear.

LIMITED WARRANTY

Valeientes makes no warranty, expressed or implied, including but not limited to, limited liability, the use of this product in any manner set forth on the label. Valeientes assumes all risk associated with the use of this product in any manner set forth on the label, and subject to the Risks of Using This Product as described above. Valeientes makes no warranties, expressed or implied, including but not limited to, limited liability, the use of this product in any manner set forth on the label. Valeientes assumes all risk associated with the use of this product in any manner set forth on the label, and subject to the Risks of Using This Product as described above.

TANK MIXES

NOTICE: Tank mixing or use of this product with any other product which is not specifically and adequately labeled by the label shall be the sole risk of the user, applicator and/or application advisor.

Read and follow the entire label of each product that is used in the tank mix with this product.

**RECOMMENDATIONS FOR ANNUAL GRASSES**

- **Apply only to actively growing grasses at recommended seed heights.**
- **Apply when the first grass seed is at a mixed grass seed population reaches the recommended growth stage for treatment.**
- **Use the lower rate under heavy grass pressure and/or when grasses are at a maximum height.**
- **Do not exceed the maximum rate per application rate listed in Table 1.**

**Recommendations for Perennial Grasses (All Crops)**

- Apply only in actively growing grasses and recommended weed heights.
- Apply when the first grass weed species in a mixed grass weed population reaches the recommended growth stage for treatment.
- Use the high rate under heavy grass pressure and/or when grasses are at maximum height.
- Do not exceed the maximum per application rate listed in Table 1, CROP SPECIFIC USE DIRECTIONS, RESTRICTIONS AND LIMITATIONS FOR SELECT MAX.

**Annual Bluegrass Control with Select Max All Crops**

- Apply under favorable soil moisture and humidity, which exists within a few days after rain or within 7 days after irrigation. Grass needs to be actively growing at time of application.
- Apply at weed stage indicated on the label, as reduced control can be expected with more mature annual bluegrass.
- Use the high rate under heavy grass pressure and when annual bluegrass is more mature.

**General Information**

The labels for each of the herbicides recommended for tank mixing with Select Max are unique to the characteristics of those products and contain restrictions and limitations that may be more restrictive than the Select Max label in certain considerations. These concerns may include, but are not limited to:

1. Geographic restrictions - all products are not registered for use in all states and rates may vary from one region of the labeled use area to another.
2. Crop rotation restrictions.
3. Applicator certification requirements.
4. Worker safety rules (e.g., protective clothing, respirator, eye protection).
5. The type or use characteristics (e.g., pH, ODN).
6. Maximum length or number of applications per season.
7. Minimum time interval for sequential applications.
8. Application timing (e.g., pre-harvest interval).
9. Do not exceed the total seasonal rate.

**The Most Restrictive Labeling of Any Product Used in a Tank Mix Must Be Followed**

**Tank Mix Application of Select Max and Broadspeed Herbicides for Control of Grasses and Broadleaf Weeds**

- Apply only to actively growing grass and broadleaf weeds as recommended.
- Apply when the first grass or broadleaf weed species in a mixed population reaches the recommended height or growth stage for treatment.
- Use the high rate under heavy grass pressure and when grasses are at maximum height.
- Do not tank mix Select Max when broadleaf weeds are tall and dense enough to prevent proper grass coverage.

**Notes:**
- Select Max must be applied before the sale of cotton. All products must be applied within 10 days of each other.
- Do not apply Select Max tank mix during or after the bud stage or before the full bloom stage.
- For use only on Liberty Link Canola.
- See Stinger label for weeds controlled.

**INFORMATION ON ANTAGONISM**
Tank mixes of Select Max with all other labeled herbicides have shown some reduction in control over certain grass species which would have otherwise been controlled when Select Max is applied alone. Activity of the postemergence broadcast herbicide in the tank mix is not affected.

| PRODUCT | APPLICATION RATES/acre* | ADJUVANT RECOMMENDATIONS | ANNUAL GROUNDS | ALMOND | AIR
|---------|-------------------------|---------------------------|----------------|--------|-------
| Select Max | 5 to 10 fl oz | L | Cercospor 1% | AMS at 3.5 tsp/100 gal | AMS at 17 fl oz/100 gal
| Basagran | 5 to 10 fl oz | L | Cercospor 1% | AMS at 3.5 tsp/100 gal | AMS at 17 fl oz/100 gal
| Select Max + DMSO @ | 5 to 10 fl oz | L | Cercospor 1% | AMS at 3.5 tsp/100 gal | AMS at 17 fl oz/100 gal
| Select Max + DMSO @ | 5 to 10 fl oz | L | Cercospor 1% | AMS at 3.5 tsp/100 gal | AMS at 17 fl oz/100 gal

*Broadleaf weed control may be reduced when grass populations are tall or dense enough to intercept the spray pattern and prevent them from receiving complete coverage. Tank mixing is not recommended in these situations.

**Do not spray as part of a tank mix when applying Select Max for grass suppression.**

**Note:** Broadleaf weed control may be reduced when grass populations are tall or dense enough to interrupt the spray pattern and prevent them from receiving complete coverage. Tank mixing is not recommended in these situations.

1. If grass growth occurs or an additional flush of new grass emerges, make a second application of Select Max alone (without a tank mix herbicide), according to the appropriate site and rate recommendations.
2. Annual grasses and some control with those tank mixes are those...

- Refer to Select Max® and fungicide label for rates and weeds and diseases controlled.
- If grass regrowth occurs, or an additional flush of new grass emerges, make a second application of Select Max® alone (without show me fungicide) according to the appropriate size and rate recommendations.
- Certain insects may cause temporary phytophony symptoms on alfalfa and mint foliage. Refer to the insecticide label for further information.

It is suggested that prior to applying any of these insecticide/herbicide tank mixes, some small areas of the field should be treated first for observations for crop injury to be made prior to treating the whole field. The Select Max® rate should be 5 to 10% less for annual grass control in baby mint, minimum of 12 fl oz for annual grass control in established mint and 12 to 20 fl oz for perennial grass control.

FALLOW LAND

DIRECTIONS FOR USE
Select Max® may be used to control annual and perennial grasses in land that has been left fallow the previous year and other non-producing agricultural areas. Apply Select Max® at 12 to 18 fl oz per acre for annual grasses and 18 to 20 fl oz per acre for perennial grasses. When both grass and broadleaved weeds are the target pest, Select Max® may be tank mixed with 2.4-D or Banvax® SF for broad-spectrum control. When both annuals and perennial grasses occur in the control field, use a minimum of 16 fl oz Select Max® rate.

GENERAL INFORMATION

- Use a minimum spray volume of 5 gallons per acre for aerial applications and 15 gallons per acre for ground applications. Apply only to actively growing grasses when the 12 inch grass reaches the recommended weed height or second flush of grass emergence. Recommendations for Annual and Perennial Grass sections of this label.

- Annual grasses that emerge after the Select Max® application will not be controlled, and a second application may be necessary. The control of perennial grasses may require more than 1 application in non-irrigated areas.

- Do not apply to grasses that have baled, formed seedheads or exceed recommended growth stage.

- Do not use fixed rate nozzles.

- Do not apply to draught-stressed grasses.

- Do not apply more than once per year to the same area.

- Refer to Select Max® label for weed height and species control. Refer Banvax® SF and 2.4-D labels for crop restrictions, use rates and weeds controlled.

Directions for use for Micro-Rate Applications to Sugar Beet

Multiple micro-rate applications of Select Max® tank mixes with reduced rates of Betanax or Betanax and methylated soap oil may be applied by air or ground equipment to sugar beet control early growing annual grasses listed above. All use precautions and restrictions on the Betanax and Betanax master labels must be followed.
Table 16. SELECT MAX FOR THE CONTROL/AND/OR SUPPRESSION OF TALL FESCUE IN NATIVE PHASE VAR. WARM-SEASON GRASS RESTORATION PROJECTS

<table>
<thead>
<tr>
<th>PRODUCT</th>
<th>GRASS WEEDS CONTROLLED/ SUPPRESSED</th>

<tbody>
<tr>
<td>Select Max</td>
<td>Tall Fescue (Festuca arundinacea)</td>
<td>2.5 to 5 qt/acre</td>
<td>Tall Fescue</td>
<td>Pre-emergence</td>
</tr>
</tbody>
</table>

Adjustment: Select Max must be applied with non-ionic surfactant at 0.25% v/v, plus a spray-grade ammonium sulfate at 2.5 to 4 lbs/acre. Recommended Mixing Order: Thoroughly mix spray-grade ammonium sulfate in water, add Select Max, then add non-ionic surfactant.

SPECIAL APPLICATION INSTRUCTIONS/PRECAUTIONS

Burn or mow fields at least 3 weeks prior to application to remove excess crop residue. Apply in the spring, at 40 to 60% tall fescue green-up, prior to emergence of warm-season grasses. Do not mow areas for 2 weeks after the Select Max application.

Apply in a minimum of 15 to 20 gal of water per acre at a spray pressure of 40 to 60 psi on actively growing turf. When using fan tips or hollow cone nozzles. Do not use flat fan nozzles.

Apply only to fields that have warm-season grasses established for 2 years. Application of Select Max to emerged warm-season grasses may cause injury. Do not apply to warm-season grasses grown for seed.

Do not mow treated fields or feed treated forage and hay to livestock.

NOTE: Select Max applications are most effective when applied when average nighttime temperatures are consistently greater than or equal to 65 degrees Fahrenheit.

Table 17. SELECT MAX FOR THE SUPPRESSION OF TALL FESCUE SEED-HEADS IN NON-PRODUCING AGRICULTURAL AREAS

<table>
<thead>
<tr>
<th>PRODUCT</th>
<th>PRODUCT RATE</th>
<th>SUPPRESSION APPLICATION TIMING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Select Max</td>
<td>3 to 4 qt/acre</td>
<td>Tall Fescue Seed-Heads (Festuca arundinacea) 75 to 90% Tall Fescue pre-emergence in the spring or 3 weeks prior to dormancy in the fall.</td>
</tr>
</tbody>
</table>

Recommended Mixing Order: Thoroughly mix spray-grade ammonium sulfate in water, add Select Max, then add crop oil concentrate. Use crop oil concentrate at a rate with full applications.

SPECIAL APPLICATION INSTRUCTIONS/PRECAUTIONS

- Apply at 50 to 60% tall fescue green-up.
- Use the higher Select Max rate if less than fescue green matter is present.
- Do not apply to areas for 2 weeks after the Select Max application.
- Apply in a minimum of 10 to 20 gal of water per acre at a spray pressure of 40 to 60 psi at the nozzle. Apply using fan tips or hollow cone nozzles. Do not use flat fan nozzles.
- 2,4-D, water, 2,4-DP, or 2,4-DP plus a non-ionic surfactant may be added to Select Max for broadleaf control (see 2,4-D label for rates).
- Do not mow treated fields or feed treated forage and hay to livestock.

IMPORTANT

Plant tolerance to Select Max at labeled rates has been found to be acceptable for the indicated genera and species listed below. Due to variability among species, crop growth stage, environmental conditions, and application technique, it is recommended that the user determine if the herbicide can be used safely on a new plant prior to widespread application. Neither the seller nor the manufacturer of Select Max have investigated the safety factor to plants not listed on the label.

NON-BEARING FRUIT CROPS

Select Max should not be applied to non-bearing fruit or nut crops which are grown for root stock.

Crop injury to non-bearing fruit and nut crops can occur if Select Max is improperly applied. Select Max should not be applied directly over the top of these plant types. Instead spray should be directed in the base of the plant where woody weeds are growing near the ground.

Non-bearing fruit and nut crops are plants which will not bear fruit or nuts for at least one year following Select Max application.

COMMON NAME | ACETIC CLIMATE NAME
---|---
Aples | Malus spp.
Berries | Vaccinium spp.
Cherries, Sweet | Prunus avium
Clima Fruits | Pyrus spp.
Grapes | Vitis spp.
Olives | Olea spp.
Peaches | Prunus persica
Pears | Pyrus communis
Plums | Prunus spp.
Shrub Fruits | Prunus spp.
Strawberries | Fragaria spp.
Trees | Prunus triloba
Almonds | Corylus avellana
Pecans | Carya illinoinensis
Pistachios | Pistacia vera
Walnuts | Juglans spp.

NON-CROP OR NON-PLANTED AREAS

The following areas are considered non-crop or non-planted areas: Rights-of-Way including railroads, highways, roads, dividers, medians, pipelines, public utility lines, purifying stations, transformer stations and substations. Around airports, electric utilities, commercial buildings, manufacturing plants, storage yards, rail yards, fence lines, parkways, and post-harvest cemeteries.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Upon dumping is prohibited.

PESTICIDE STORAGE

Keep pesticide in original container. Do not put concentrate or dilute into food or drink containers.

Do not store diluted spray.

Emergency Response: For help with spill, leak, fire or exposure/nosing this material, call di right or 1-800-407-6099.

PESTICIDE DISPOSAL

Wastewater resulting from the use of this product may be dispersed on or at an approved waste disposal facility.

CONTAINER DISPOSAL

Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recirc. Shake for 10 seconds. Pour recirc into application equipment or a mix tank and store rinsewater for later use or disposal. Crash for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then, drain for recirculating, if available or permitted and dispose of it as allowed by state and local authorities, by burning. If burned, step out of smoke.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS
CAUTION
Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Harmful if swallowed.

FIRST AID
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If on skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If swallowed: Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-882-0099 for emergency medical treatment information.

NOTE TO PHYSICIAN
Ingestion of this product or subsequent vomiting can result in aspiration of light hydrocarbon liquid, which can cause pneumonia. If ingested, possible mucosal damage may contraindicate the use of gastric lavage.

PERSONAL PROTECTIVE EQUIPMENT (PPE):
Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for category G on an EPA chemical resistance category selection chart.

Applicators and other handlers must wear: long-sleeved shirt and long pants, chemical-resistant gloves such as Barrier Lamine or Viton A Nitrile gloves plus socks and protective eyewear.

USER SAFETY RECOMMENDATIONS

If no such instructions for washability exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENVIRONMENTAL HAZARDS:
Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply where runoff is likely to occur. Do not apply where weather conditions favor drift from areas treated. Do not contaminate water when disposing of equipment or rinsate.

The use of this product may pose a hazard to the federally designated endangered species of Solaro Grass and Wild Rice. Use of this product is prohibited in the following areas where the species are known to exist: Solaon Grass: Solaon County, California: the vernal lakes area bounded by the Union Pacific Railroad and Hastings Road to the north, Highway 113 to the east, Highway 12 to the south and Travis Air Force Base to the west. Wild Rice: Hays County, Texas.

PHYSICAL OR CHEMICAL HAZARDS:
Do not use or store near heat or open flame.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 190. Refer to supplemental labeling under "Agricultural Use Requirements" in the Directions for Use sections for information about this standard.

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 190). Refer to supplemental labeling under "Non-Agricultural Use Requirements" in the Directions for Use sections for information about this standard.

For complete directions for use, disclaimer and storage and disposal see pamphlet.
