HAZARDS TO HUMANS & DOMESTIC ANIMALS

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep emissions from spraying or blowing to a minimum. Always wear properly fitted respirators which meet the performance standards of NIOSH. If using compressed air equipment, follow the regulations for personal protective equipment (PPE) and respiratory protection. USER SAFETY RECOMMENDATIONS

Do not apply this product in a manner that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

FIRST AID

In case of contact with skin, wash thoroughly with soap and water. If on clothing, change into clean clothing. Do not reuse clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse clothing or other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Wash at least 25°F (5°C) cooler than the normal wash water temperature. Place the garments in a trash bag for disposal until dry, then wash in the normal wash water temperature. Then wash them in the normal wash water temperature. Pressure washing or spraying with water can cause injury, such as burns, to the skin or eyes. Do not use this product when rain is expected in the treated area, such as plants, soil, or water, in containers, underpinnings, gravel, planter boxes and chemical-resistant trainer for untreated areas.

CHEMINOVA ACEPHATE 75SP is an insecticide for control of pests on selected agricultural crops and in certain non-crop areas. The active ingredient in CHEMINOVA ACEPHATE 75SP is acephate, a water-soluble insecticide readily absorbed by plant roots and foliage to give systemic control of feeding insects. Insect pests are generally controlled more effectively by CHEMINOVA ACEPHATE 75SP through ingestion than by contact.

PREPARATION OF SPRAY SOLUTION

Each bag contains unopened water soluble packets of CHEMINOVA ACEPHATE 75SP. Do not mix the packets with wet glues or after the packet(s) become wet or damaged. CHEMINOVA ACEPHATE 75SP is a water-soluble insecticide readily absorbed by plant roots and foliage to give systemic control of feeding insects. Insect pests are generally controlled more effectively by CHEMINOVA ACEPHATE 75SP through ingestion than by contact.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR INSECT CONTROL, CROP INJURY, AND/OR ILLEGAL RESIDUES.

Use of acephate may have adverse effects on beneficial insects.CHEMINOVA ACEPHATE 75SP conforms to the regulations of the United States Department of Agriculture, Agricultural Research Service, for tolerances for residues of acephate in the environment.

GENERAL USE PRECAUTIONS

Always read and follow all label directions when using any pesticide alone or in tank mix combinations. Observe all restrictions and precautions which appear on all product labels. The most restrictive labeling applies when using a tank mix.

RESISTANCE-MANAGEMENT

Cotton pest control programs, especially those for control of Diamondback Moth populations, should employ a properly designed resistance management strategy. An resistance management strategy is designed to delay the development of resistance in pest populations to the active ingredient(s) in the cotton insecticide(s) being used. A properly designed resistance management strategy will include, as a minimum, the use of at least two insecticides with different modes of action, rotation of different classes of insecticides, and liberal use of non-chemical control methods. Consult your state’s insecticide resistance management strategy and service for detailed information.
General Use Precautions
- Do not apply more than 1-1/3 lbs./A (1 lb. ai) per season
- Do not apply more than 6 lbs. ai/A per season.
- Do not allow livestock to graze on treated areas.

Pesticide Compatibility
-坦克混合物中的有机磷酸酯和合成拟除虫菊酯应按照州/地区抗性管理程序的指导使用。
- Do not apply more than 6 lbs. ai/A per season.
- Do not allow livestock to graze on treated areas.

General Use Precautions
- Always read and follow all label directions when using any pesticide alone or in tank mix combinations. Observe all restrictions and precautions which appear on all product labels. The most restrictive labeling applies when using a tank mix.

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### APPLICATION METHOD

**SOIL MOUND TREATMENT**

DRENCH METHOD:

Apply 1 gal. of mix to each mound area by sprinkling the mound until it is wet and treat a 4-foot diameter circle around the mound.

Repeat application as necessary to maintain control.

### USE PRECAUTION

*Not registered in CA for control of Citrus Blackfly and Harvester Ants.*

### NON-CROP AREAS

**FIELD BORDERS, FENCEROWS, ROADSIDES, DITCHBANKS, BORROW PITS**

- By Air: 1/2 gal./A of spray (minimum of 5 gal./A in CA)

**REMARKS**
- Use seed treatments as an adjuvant spray in combination with the general granular broadcast application.
## STORAGE AND DISPOSAL

**PROHIBITIONS**
Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

Open dumping is prohibited.

**PESTICIDE STORAGE**

- Keep pesticide in original container.
- Do not store near food or food preparation areas.
- Keep out of reach of children.

**PESTICIDE DISPOSAL**

- Waste resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL**

- Do not reuse the outer bag. Dispose of the outer bag in a sanitary landfill or by incineration or, if allowed by State and local authorities, by burning.

- If burned, stay out of smoke.
