Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. Controls Dandelion, Clover, Knotweed, Henbit, Chickweed, Plantain, Spurge and many other broadleaf weeds.

ACTIVE INGREDIENTS:
- Dimethylamine salt of 2,4-dichlorophenoxyacetic acid ........................................... 30.56%
- Dimethylamine salt of (S)-(R)-2-(2-methyl-4-chlorophenoxy) propionic acid .................. 8.17%
- Dimethylamine salt of diquat: 3,6-dichloro-2-anisic acid .......................................... 2.77%

INERT INGREDIENTS ........................................................................................................... 58.50%

TOTAL .................................................................................................................................. 100.00%

THIS PRODUCT CONTAINS:
- 2.38 lbs. 2,4-dichlorophenoxyacetic acid equivalent per gallon or 25.38%
- 0.63 lb. (S)-(R)-2-(2-methyl-4-chlorophenoxy) propionic acid equivalent per gallon or 6.75%
- 0.31 lb. 3,6-dichloro-2-anisic acid equivalent per gallon or 3.35%
- Isotherm Specific by AQAC Methods.

KEEP OUT OF REACH OF CHILDREN
DANGER - PELIGRO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)
STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR ON CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor. You may also contact 1-800-424-9300 for emergency medical treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed. Harmful if absorbed through skin. Do not get into eyes, on skin, or on clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical resistant to this product are natural rubber. If you want more options, follow the instructions for category A on an EPA chemical resistance category selection chart.

All mixers, loaders, applicators and other handlers must wear:
- Protective eyewear.
- Long-sleeved shirt and long pants.
- Shoes and socks.
- Chemical-resistant gloves and
- Chemical-resistant apron when mixing or loading, cleaning up spills or equipment, or otherwise exposed to the concentrate.

See "Engineering Controls" for additional requirements.

ENGINEERING CONTROLS STATEMENTS

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR Part 190), the handler PPE requirements may be reduced if specified in the WPS.

USER SAFETY REQUIREMENTS

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent material that have been drenched or heavily contaminated with the product’s concentrate. Do not reuse them.

USER SAFETY RECOMMENDATIONS:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. If pesticide gets on skin, wash immediately with soap and water.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash waters or rinsate. This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULT

Use this product only in accordance with its labeling. This standard contains requirements for the protection of handlers of agricultural pesticides. It contains requirements for personal protection equipment, engineering controls, and other safety measures. This standard also contains specific instructions and exceptions to these requirements.

Do not enter or allow worker entry into treated areas. PPE required for entry to treated areas that is not specified in this statement is the responsibility of the handler. The requirement for Protection Standard.

Do not enter or allow worker entry into treated areas. PPE required for entry to treated areas that is not specified in this statement is the responsibility of the handler. The requirement for Protection Standard.

NON-AGRICULT

The requirements in this box apply to use of this agricultural pesticide (40 CFR Part 190). The WP is available in nurseries or greenhouses.

Reentry Statement: Do not enter or allow people

STORAGE

Do not contaminate water, food, or feed by storage.

PESTICIDE DISPOSAL: Store in original container.

PESTICIDE DISPOSAL: Pesticide waste is a hazardous waste and is subject to the requirements of the Resource Conservation and Recovery Act (RCRA). Pesticide waste must be collected, transported, treated, and disposed of in an environmentally sound manner. Pesticide waste must be treated, stored, and disposed of in an environmentally sound manner.

For Containerized Nonrefillable with ca CONTAINER HANDLING: Nonrefillable container, and dispose of in a sanitary landfill, or by incineration of smoke. Triple rinse or pressure rinse container or equivalent. Triple rinse as follows: Empty the remaining contents and then rinse. Fill the container 1/4 full with water or a mix tank or store rinsate for later use or disposal. Insert pressure ringer nozzle in the for 10 seconds after the flow begins to drip. Hold container upright.

For Containerized Nonrefillable with ca CONTAINER HANDLING: Nonrefillable container, and dispose of in a sanitary landfill, or by incineration of smoke. Triple rinse or pressure rinse container or equivalent. Triple rinse as follows: Empty the remaining contents. Replace and tighten closures. To container on its side for 10 seconds. Stand the container on its end and tip it back and forth several times. Empty the rinsate into Repeat this procedure two more times.
Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 48 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:
- Coveralls worn over short-sleeved shirt and short pants;
- Chemical-resistant footwear plus socks;
- Chemical-resistant gloves made of any water-proof material;
- Protective eyewear.

Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries or greenhouses.

Reentry Statement: Do not enter or allow people (or pets) to enter the treated area until sprays have dried.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL: Store in original container in a locked storage area inaccessible to children or pets. Keep from freezing.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

For Plastic Containers - Nonrefillable with capacities equal to or less than 5 gallons:

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

Triple rinse or pressure rinse container (or equivalent) promptly after emptying.

Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recirc. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

Pressure rinse as follows: Empty the remaining contents into application equipment or mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

For Plastic Containers - Nonrefillable with capacities greater than 5 gallons:

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

Triple rinse or pressure rinse container (or equivalent) promptly after emptying.

Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its end and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinseate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times.

(continued on next page)
STORAGE AND DISPOSAL (cont.)

Pressure rinse as follows: Empty the remaining contents into application equipment or a mix tank and continue to drain for 10 seconds after the flow begins to drip. Hold container upside down over application equipment or mix tank or collect rinsate for later use or disposal. Insert pressure rinsing nozzle in the side of the container, and rinse at about 40 PSI for at least 30 seconds. Drain for 10 seconds after the flow begins to drip.

For refillable Containers:
CONTAINER HANDLING: Refillable container. Refill this container with pesticide only. Do not reuse this container for any other purpose.
CONTAINER CLEANING: Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

To clean the container before final disposal, empty the remaining contents from the container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

SOD FARMS:
EndRun™ is intended for use on sod farms. EndRun™ provides selective broadleaf control in warm season and cool season turfgrass established for commercial sod production.

APPLICATION SCHEDULES FOR SOD FARMS:
Apply EndRun™ to broadleaf weeds that are actively growing. Follow-up applications may be required for dense infestations of perennial and biennial weeds. Do not apply this product to Floratam® St. Augustinegrass.

NEWWLY SEEDED AREAS:
The application of EndRun™ to grass seedings is recommended after the second mowing.

NEWWLY SODDED, SPRIGGED, OR PLUGGED AREAS:
The application of EndRun™ to newly sodded, sprigged, or plugged grasses should be delayed until 3 to 4 weeks after the sodding, spraying, or plugging operations. Also, applications to dormant bermudagrass, dormant zoysiagrass, and dormant bahiagrass are suggested.

APPLICATION RATES FOR SOD FARMS:
Dosage rates and spray volume recommendations of EndRun™ for use in commercial sod production are presented in Table 1. Generally, the lower application rates within the specified range will provide satisfactory control of sensitive weed species. The higher application rates within the specified range will be required for dense infestations of perennial weeds, for adverse/extreme environmental conditions, or for weeds beyond the appropriate growth stage.

ORNAMENT

EndRun™ is intended to be applied by lawn care operators in institutional, ornamental, and residential facilities providing a service to public or private institutions or facilities.

For Kentucky Bluegrass, Fescue spp., Perennial Apply 3.0 to 4.5 pints of EndRun™ per acre with 1 ounce of EndRun™ per 1,000 square feet with 1% mature weeds, apply 3.25 to 4.0 pints of EndRun™ application to control clover, a 4-pints-per-acre rate

For Closely Managed Bentgrasses:
Apply a maximum rate of 1.5 pints of EndRun™ per application rate would be 1.0 fluid ounce of EndRun™ per 1,000 square feet.

For St. Augustinegrass:
Appy 2.3 pints of EndRun™ per acre with spray volume would be 1.3 fluid ounces of EndRun™ in 5.0 gallons Do not spray St. Augustinegrass when stressed for Curb cuts vary in tolerance to this product. Do not as to avoid overdosing St. Augustinegrass or injury risks Refer to the chart below for additional application rates

APPLICATION METHODS

A. Kentucky Bluegrass, Fescue spp., Perennial Conventional Equipment:

- Professional Lawn Maintenance:
- Controlled Dropspot Applicators (CDA):

B. Closely Managed Bentgrass:

C. St. Augustinegrass

Note: Care should be taken to avoid overdosing b and in obtaining uniform coverage.
ORNAMENTAL LAWNS AND TURFGRASS:
WHERE TO USE:
EndRun™ is intended to be applied by lawn care operators and landscape personnel for use in ornamental lawns and turf established in institutional, ornamental, and residential/domestic sites. Institutional sites are defined as turf areas around properties or facilities providing a service to public or private organizations including, but not limited to, hospitals, nursing homes, schools, museums, libraries, sport facilities, golf courses, and office buildings. Ornamental sites include turfgrass established around residences, parks, streets, retail outlets, cemeteries, industrial and institutional buildings. Finally, residential/domestic sites are defined as areas associated with the household or home life including, but not limited to, apartment complexes, condominiums, and patient care areas of nursing homes, mental institutions, hospitals, or convalescent homes.

HOW MUCH TO USE:
For Kentucky Bluegrass, Fescue spp., Perennial Ryegrass, Bermudagrass and Zoysia grass:
Apply 3.0 to 4.0 pints of EndRun™ per acre with spray volumes ranging from 50 to 220 gallons per acre. Or apply 1.1 to 1.3 fluid ounces of EndRun™ per 1,000 square feet with spray volumes ranging from 0.5 to 5.0 gallons per 1,000 square feet of turf. For mature lawns, apply 3.2 to 4.0 pints of EndRun™ per acre. The best time to control clover is in the fall. When making a spring application to control clover, a 4-pints-per-acre rate is recommended.

For Closely Managed Bentgrass:
Apply a maximum rate of 1.8 pints of EndRun™ per acre with spray volumes greater than 145 gallons per acre. The equivalent application rate would be 1.0 fluid ounce of EndRun™ mixed with 5.0 gallons of water and applied to 1,500 square feet.

Note: Care should be taken to avoid overwatering bentgrass or injury may result. High spray volumes will provide uniform coverage.

For St. Augustinegrass:
Apply 2.3 pints of EndRun™ per acre with spray volumes ranging from 40 to 150 gallons per acre. The equivalent application rate would be 1.3 fluid ounces of EndRun™ in 5.0 gallons of water per 1,500 square feet.

Do not spray St. Augustinegrass when stressed from heat or drought. Slight turf yellowing should disappear after about one week. Cultivars vary in tolerance to this product. Do not apply this product to "Forstern" St. Augustinegrass. Note: Care should be taken to avoid overwatering St. Augustinegrass or injury may result. High spray volumes will provide uniform coverage.

Refer to the chart below for additional application instructions.

**USE PRECAUTIONS FOR ORNAMENTAL LAWNWS AND TURFGRASS:**

- Do not apply this product through any type of irrigation system.
- Delay mowing 1 to 2 days before and after the application of this product.
- Do not apply to ornamental plants.
- Do not apply immediately before rainfall or irrigation. Do not irrigate or water the turfgrass within 24 hours after application.
- Treated areas may be reentered 3 to 4 weeks after application.
- Do not spray on Certain grasses, dichondra, or on lawns on turf where desirable clovers are present.
- Do not spray on any ornamental plant.
- Do not broadcast apply where temperatures exceed 85°F; some injury may be expected with spot treatments when air temperatures exceed 85°F.
- After using this product, clean sprayer with soap or detergent and water, or an approved spray tank cleaner and rinse thoroughly before applying other pesticides. Failure to observe the above precautions may result in injury.
- Some hybrid Bermudagrass may be sensitive to this product. Contact your local Extension Service Weed Control Specialist.
- Do not apply to St. Augustinegrass during spring green-up which is the transition period between dormancy and active growth.
- Do not use this product on or near desirable plants, including contact of spray on exposed root systems or adventitious shoots within the drip line of desirable trees and shrubs, since injury may result.

**Limitations on broadcast treatments for ornamental plants:**

- Maximum application rate is 4.0 pints of product per 1000 sq. ft. per year with a minimum of 30 days between applications.
- Not for use on ornamental plantings with a minimum of 30 days between applications.

**Spraying Instructions:**

- A variety of factors including weather conditions, ground application can influence pesticide drift. The applicator should apply this product.

**Droplet Size:**

- When applying sprays that contain 2-A-D mixed with oil, use a medium or coarse spray (ASAE standard 572) or a nozzle with a high air capacity.

**Wind Speed:**

- Do not apply at wind speeds greater than 10 mph. Only highest risk areas may be applied to.

**Temperature Inversions:**

- If applying at wind speeds less than 3 mph, the application should be avoided in areas with possible atmospheric conditions.

**Susceptible Plants:**

- Do not apply under circumstances where spray drift may occur to non-target areas. Use caution in areas where the drift may fall on areas where sensitive plants may be located.

Other State and Local Requirements:

- Applicators must follow all state and local pesticide drift requirements. They must be observed.

**Equipment:**

- All ground equipment application of this product. For applications with a nozzle height greater than 4 feet above the target area, use of this product in certain portions of California. For relief of Washington Toxics Coalition, et al. v. EPA, C07-1100009-002.
Limitations on broadcast treatments for ornamental turfgrass and sod farms:
The maximum application rate is 4.0 pints of product per acre per application (1.16 lb. 2,4-D, 0.32 lb. MCP-P, and 0.11 lb. dicamba as per acre per application). For ornamental turfgrass, the maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. For sod farms, the maximum number of broadcast applications is limited to 2 per year with a minimum of 21 days between applications. The maximum seasonal rate is 8.0 pints of product per acre (2.38 lbs. 2,4-D, 0.63 lb. MCP-P, and 0.21 lb. dicamba as per acre).

Limitations on spot treatments to residential turfgrass:
Spot treatments are defined as a treatment area no greater than 1,000 sq. ft. per acre. The maximum application rate is 1.5 ft. oz. per 1,000 sq. ft. per application (0.32 lb. MCP-P acid equivalent per acre). The maximum number of spot treatments is limited to 2 per year with a minimum of 30 days between applications.

SPRAY DRIFT MANAGEMENT
A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, relative humidity) and method of ground application can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

Droplet Size
When applying sprays that contain 2,4-D mixed with other active ingredients that require a Medium or more fine spray, apply only a Medium or course spray (ASAE standard 572) or a volume mean diameter of 300 microns or greater for spinning atomizer nozzles.

Wind Speed
Do not apply at wind speeds greater than 10 mph. Only apply this product if the wind direction favors on-target deposition and there are no sensitive areas (including, but not limited to, bodies of water, known habitat for non-target species, non-target crops) within 250 feet downwind. If applying a Medium spray, leave one swath unsprayed at the downwind edge of the treated field.

Temperature Inversions
If applying at wind speeds less than 3 mph, the applicator must determine if a) conditions of temperature inversion exist, or b) stable atmospheric conditions exist at or below nozzle height. Do not make applications into areas of temperature inversions or stable atmospheric conditions.

Susceptible Plants
Do not apply under circumstances where spray drift may occur to food, forage, or other plantings that might be damaged or crops thereof rendered unfit for sale, use or consumption. Susceptible crops include, but are not limited to, cotton, okra, flowers, grapes (in growing stage), fruit trees (foliage), soybeans (vegetative stage), ornamentals, sunflowers, tomatoes, beans, and other vegetables, or tobacco. Small amounts of spray drift that might be visible may injure susceptible broadleaf plants.

Other State and Local Requirements
Applicants must follow all state and local pesticide drift requirements regarding application of 2,4-D herbicides. Where states have more stringent regulations, they must be observed.

Equipment
All ground application equipment must be properly maintained and calibrated using appropriate carriers or surrogate formulations. Do not apply with a nozzle height greater than 4 feet above the target site.

LIMITED WARRANTY AND DISCLAIMER

IMPORTANT: Read this LIMITED WARRANTY AND DISCLAIMER before buying this product. By opening and using this product, buyer and all users agree to accept the terms of this LIMITED WARRANTY AND DISCLAIMER in their entirety and without exception. If the terms are not acceptable, return this product unopened immediately to the point of purchase, and the purchase price will be refunded in full.

It is impossible to eliminate all risks inherently associated with use of this product. Damage to the treated article, ineffectiveness, or other unintended consequences can result from use of the product under abnormal conditions such as weather, presence of other materials, or the manner of use or application, etc. Such factors and conditions are beyond the control of the manufacturer and BY PURCHASING AND USING THIS PRODUCT THE BUYER AND ALL USERS OF THIS PRODUCT AGREE TO ACCEPT ALL SUCH RISKS. Buyer and all users further agree to assume all risks of loss or damage from the use of the product in any manner that is not expressly set forth in or that is inconsistent with label instructions, warnings and cautions.

The manufacturer warrants only that this product conforms to the chemical description given on the label, and that the product is reasonably suitable for the labeled use when applied according to the Directions for Use, subject to the inherent risks described below. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE MANUFACTURER NEITHER MAKES NOR INTENDS ANY OTHER EXPRESS OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH ARE EXPRESSLY DISCLAIMED.

The exclusive remedy of buyer and all users of this product, and the exclusive liability of the manufacturer, for any and all losses, damages, or injuries resulting from the use or handling of this product, whether or not based in contract, negligence, strict liability in tort or otherwise, shall be limited, at the manufacturer’s option, to replacement of or the repayment of the purchase price for the quantity of product with respect to which damages are claimed, to the extent consistent with applicable law. In no case shall the manufacturer be liable for incidental, consequential, or special damages resulting from the use or handling of this product. The manufacturer must be promptly notified in writing of any claims, whether based in contract, tort, negligence, strict liability, or otherwise, to be eligible to receive either remedy stated above.

The terms of this LIMITED WARRANTY AND DISCLAIMER cannot be varied by any written or oral statements or agreements at the point of sale or elsewhere. No employee or agent of the manufacturer or seller is authorized to vary or exceed the terms of this Limited Warranty and Disclaimer in any manner.

EndRun™ is a trademark of Helena Holding Company.

Use this product only in accordance with its label.

ACTIVE INGREDIENTS:
Dimethylamine salt of 2,4-dichlorophenoxyacetic acid
Dimethylamine salt of (±)-2,4-dichloro-5,6-dimethyl-2-cyclohexene-1-carboxylic acid

INSERT INGREDIENTS

TOTAL

This product contains:
2.38 lb. 2,4-dichlorophenoxyacetic acid, equivalent per gallon
0.63 lb. (±)-2,4-dichloro-5,6-dimethyl-2-cyclohexene-1-carboxylic acid, equivalent per gallon

KEEP OUT OF DANGE

Si usted no entiende la etiqueta, busque ayuda.

IF YOU DO NOT UNDERSTAND THE DANGER, STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL DANGER.

IF IN EYES:
Hold eye open and rinse slowly and gently with water for 15 minutes, or until irritation subsides. Call a poison control center or doctor for treatment advice.

IF SWALLOWED:
Call a poison control center or doctor immediately. Do not induce vomiting unless told to do so by the poison control center or doctor.

IF ON SKIN OR ON CLOTHING:
Take off contaminated clothing. Rinse skin thoroughly with water. Seek medical advice.

IF INHALED:
Remove person to fresh air. If person is not breathing, give artificial respiration. If possible, call a poison control center or doctor.

Have the product container or label with you when calling a poison control center or doctor.

NOTE TO PHYSICIAN: Prolonged exposure may cause dermal irritation. SEE INSIDE BOOKLET FOR MORE INFORMATION.

Controls Dandelion, Clover, Knotweed, Henbit, Chickweed, Plantain, Spurge and many other broadleaf weeds.

ACTIVE INGREDIENTS:
1. Dimethylamine salt of 2,4-dichlorophenoxyacetic acid 30.56%
2. Dimethylamine salt of (+)-2-(2-methyl-4-chlorophenoxy) propionic acid 8.17%
3. Diethylamine salt of dicamba: 3,6-dichloro-2-methoxy acid 2.77%

INERT INGREDIENTS

TOTAL: 100.00%

THE PRODUCT CONTAINS:
2.38 lbs. 2,4-dichlorophenoxyacetic acid equivalent per gallon or 25.38%
0.62 lbs. (+)-2-(2-methyl-4-chlorophenoxy) propionic acid equivalent per gallon or 6.75%
0.21 lbs. 3,6-dichloro-2-methoxy acid equivalent per gallon or 2.36%

Isomer Specific by AOAC Methods.

KEEP OUT OF REACH OF CHILDREN
DANGER – PELIGRO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

STAY READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a Poison Control center or doctor for treatment advice.

IF SWALLOWED: Call a Poison Control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Wash skin immediately with plenty of water for 15-20 minutes. Call a Poison Control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a Poison Control center or doctor for guidance. You may also contact 1-800-424-9500 for emergency medical treatment advice.
