**EVERCIDE® PERMETHRIN 10% EC 2784**

A long-lasting livestock and premise spray that provides quick knockdown, broad spectrum insecticidal effectiveness and excellent residual activity for up to 20 days.

- Kills Gypsy Moth Caterpillars, Japanese Beetles, Roaches, Ants, Fleas, Ticks, Lice, Bed Bugs, Horn Flies, House Flies, Mealworms, Darkling Beetles, Poultry Lice, Fowl Mites, and numerous other insects as listed.
- Protects Horses and Ponies from attacks of Horse Flies, Stable Flies, Face Flies, Deer Flies, Houseflies, Horn Flies, Mosquitoes, and Gnats.
- For use on dairy and beef cattle, sheep, goats, swine, horses, poultry and their premises.
- For use outdoors and in homes and non-food areas of commercial buildings, institutions, warehouses, theatres, office buildings, schools, motels, hotels, restaurants, food/feed processing establishments, hospitals, kennels, poultry houses, dairies, cattle barns, milking parlors, horse barns and swine houses.
- Not for Forestry Use or Commercial Nursery Use.
- Not for use on plants being grown for sale or other commercial use, or for commercial seed production or for research purposes.
- For Commercial/Agricultural Use and Mosquito Abatement District Officials.

**ACTIVE INGREDIENT:**

- Permethrin [*] (3-Phenoxyphenyl)methyl (+ or -)
- cis-trans-3-(2,2-dichloroethenyl)[2,2-
  dimethylcyclopropanecarboxylate] .................................................. 10.00%
- **OTHER INGREDIENTS** ................................................................. 90.00%
- 100.00%

*Cis-trans isomers ratio: Min. 35% (+ or -) cis and Max. 65% (+ or -) trans

**Contains Petroleum Distillates

Contains 0.75 lbs. of pyrethroid per gallon

**FIRST AID**

**IF SWALLOWED:**
- Immediately call poison control center or doctor.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.

**IF ON SKIN OR CLOTHING:**
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

**IF IN EYES:**
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

**NOTE TO PHYSICIAN:** Contains petroleum distillates—vomiting may cause aspiration pneumonia.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For information regarding medical emergencies or pesticide incidents, call 1-888-740-8712.

---

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**

Harmful if swallowed or absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS**

This pesticide is extremely toxic to fish. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rotating application equipment over the treated area will help avoid run off to water bodies or drainage systems. Drift and run off may be hazardous to aquatic organisms in water adjacent to treated areas. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treated area.

**PHYSICAL OR CHEMICAL HAZARDS**

**COMBUSTIBLE.** Do not use or store near heat or open flame. Do not apply this product around electrical equipment due to possibility of shock hazard.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL BEFORE EACH USE.

FOR PET USE – USE ONLY ON DOGS, HORSES AND PONIES.

For use on Dairy & Beef Cattle, Sheep Goats, Swine, Horses and Ponies, Poultry and their premises to control stable flies, deer flies, house flies, horse flies, mosquitoes, and gnats.

Keep container sealed when not in use. Protect from freezing. To prepare dilutions, add the required amount of concentrate to water and blend thoroughly.
Dilution rates on this label will yield the following ready-to-use product:

<table>
<thead>
<tr>

Dilution Rates:

- **Maintenance Use**: 1 part concentrate/400 parts water
- **Normal Infestations**: 1 part concentrate/200 parts water
- **Severe Infestations**: 1 part concentrate/100 parts water

The number following the dilution directions on this label refers to the ready-to-use Permethrin level.

For maximum effectiveness, a combination of localized application and space treatment is recommended. Remove pots and birds and cover fish aquariums before spraying.

**INDOOR USE AREAS**
Do not use in food areas of food-handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in areas where prepared foods are served such as dining rooms, but excludes areas where foods may be prepared or held. In the home, cover all food processing surfaces and utensils during treatment or thoroughly wash before use follow treatment. Cover or remove exposed food.

**NOT FOR USE IN FEDERALLY INSPECTED MEAT AND POULTRY PLANTS**
Non-Food/Feed Areas include (but are not limited to): garbage rooms, lavatories, floor drains, (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

**AS A SURFACE SPRAY TO CONTROL** Cockroaches, Waterbugs, Palmetto Bugs, Ants, Silverfish, Firebrats, Spiders, Crickets, Millipedes, Centipedes, Sowbugs, Pillbugs, Clover Mites, Cheese Mites, Granary Weevils, Rice Weevils, Confused Flour Beetles, Rust Red Flour Beetles, Saw-toothed Grain Beetles, Spider Beetles, Cigarette Beetles, Drug Store Beetles, Darkling Beetles, Mealworms, Grain Mites and Cadelles:

For initial clean-up of severe insect infestation, dilute at a rate of 1 part concentrate in 19 parts water (6.4 fluid ounces per gallon) (0.5%).

For normal infestations, dilute 1 part concentrate in 100 parts water (1.28 ounces per gallon) (8 teaspoonsfuls per gallon) (0.1%).

For maintenance, dilute 1 part concentrate in 200 parts water (0.64 ounce per gallon) (4 teaspoonsfuls per gallon) (0.05%).

Use a sprayer and adjust to deliver a coarse wet spray. Direct the spray into hiding places, cracks and crevices, under pallets, around containers of stored foods, around the base of machinery and behind shelves and drawers. Spray bookcases for Silverfish, Spray Ant trails, nests and points of entry.

**TREATMEN**
TO AID ** light cord
If surface application only is to be used, spray floors, walls and other surfaces, applying at a rate of 1 gallon to 750 square feet of surface.

**TO CONTROL Carpet Beetles:** Spray edges of carpeting and under carpeting and rugs. Make localized application to floor and baseboards. Spray directly into cracks, closets and onto infested areas of shelving.

**TO CONTROL Bedbugs:** Spray mattresses lightly, particularly around tufts and seams. Take beds apart and spray in all joints. Treat baseboards, moldings and floors. Allow all treated articles to thoroughly dry before use.

**TO CONTROL Fleas and Ticks (adult and larvae):** Thoroughly spray infested areas, pet beds, nesting quarters, nearby cracks and crevices, along and behind baseboards, moldings, window and door frames and localized areas of floor and floor coverings. Place fresh beddings in animals’ quarters following treatment.

**AS A SPACE SPRAY:**
For initial clean-up of severe insect infestation, dilute at a rate of 1 part concentrate in 19 parts water (6.4 fluid ounces per gallon) (0.5%).

For normal infestations, dilute 1 part concentrate in 100 parts water (1.28 ounces per gallon) (8 teaspoonsful per gallon) (0.1%).

For maintenance, dilute 1 part concentrate in 200 parts water (0.64 ounce per gallon) (4 teaspoonsful per gallon) (0.05%).

Apply with mechanical or compressed air equipment (non-thermal) adjusted to deliver a fine mist. Close doors and windows and shut off ventilating systems. For rapid control of House Flies, Fruit Flies, Gnats, Mosquitoes, Skipper Flies, Wasps, Hornets, Bees, Black Flies, Angoumois Grain Moths and Tobacco Moths, direct spray at an upward angle, distributing it uniformly through the entire area at a rate of 1 ounce per 1,000 cubic feet of space. Keep area closed for at least 10 minutes. Vacate areas after treatment and ventilate and sweep up dead insects before reoccupying.

For rapid kill of exposed or accessible stages of other insects named on this label: Apply using conventional mechanical or compressed air equipment (non-thermal), following directions for space spraying. Apply the above dilutions at a rate of 1 ounce per 1,000 cubic feet of space.

Do not use in rooms, but approximately wash offices, locker. Do not water the treated area to the point of run-off. Do not make applications during rain.

All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:
(1) Treatment to soil or vegetation around structures;
(2) Application to lawns, turf, and other vegetation.

All outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors, and eaves) are limited to spot and crack-and-crevice applications only.

For initial clean-up of severe insect infestation, dilute at a rate of 1 part concentrate in 19 parts water (6.4 fluid ounces per gallon) (0.5%).

For normal infestations, dilute 1 part concentrate in 100 parts water (1.28 ounces per gallon) (8 teaspoonsful per gallon) (0.1%).

For maintenance use, dilute 1 part concentrate in 200 parts water (0.64 ounce per gallon) (4 teaspoonsful per gallon) (0.05%).

Do not allow spray treatment to drift onto pasture land, cropland, poultry ranges or water supplies. Do not use on crops used for food, forage or pasture. Never treat open water with this product. Not to be used within 100 feet (30 meters) of lakes and streams.

**TREATMENT OF FLYING INSECTS:**

**TO AID IN CONTROL OF Mosquitoes, Wasps, Gnats and Skippers:** treat walls, ceilings, moldings, screens, door frames, window frames, beams, light cords and similar resting places.
FOR TEMPORARY REDUCTION OF ANNOYANCE FLIES, GNATS AND MOSQUITOES:
In drive-in restaurants, drive-in theaters, golf courses, urban areas, parks, playgrounds and other recreational areas: Dilute 1 part concentrate in 40 parts water (3.2 fluid ounces per gallon of water) (0.25%). Direct the spray into tall grass, shrubbery and around lawns where these pests may hover or rest. Apply while the air is still and avoid wetting foliage of desirable plants. Apply product before occupancy.
In the treatment of corrals, feedlots, swine lots and zoos, cover any exposed water, drinking fountains and animal feed before application. Fill the area with mist and direct the spray into tall grass, shrubbery and around lawns where the above pests may hover or rest. Apply while the air is still and avoid wetting foliage of desirable plants. In zoos, prevent exposure of reptiles to this product.

GYPSY MOT CATERPILLARS AND ADULTS, ADULT JAPANESE BEETLES, EASTERN AND FOREST TENT CATERPILLARS
TO KILL ON CONTACT: Dilute 1 part concentrate in 40 parts water (3.2 fluid ounces per gallon of water) (0.25%). Apply to ensure thorough coverage of upper and lower leaf surfaces.

ON TREES AND SHRUBS: Treat trees and shrubs as soon as insects emerge (usually late spring). Treat leaves, branches and tree trunks evenly, making sure to penetrate dense foliage. Repeat application every 7 days as necessary for control.

ON ROSES AND IN FLOWER GARDENS: Treat plants and flowers as soon as insects appear. Spray plants and flowers making sure to penetrate dense foliage. Repeat application every 7 days or as necessary for control.

ANIMALS AND ANIMAL PREMISE USE AREAS
CATTLE BARNSDWINE HOUSESMILK ROOMS
POULTRY HOUSES
HORSE BARNSKENNELS
DAIRIESMILKING PARLORS

This insecticide concentrate when diluted, can be used on horses and ponies as a trigger spray and will provide control for up to 4 weeks. Kills stable flies, horse flies, deer flies, face flies, houseflies, horn flies, mosquitoes, and gnats. Note: Do not use on foals under 3 months of age. This product must be diluted prior to use.

Wipe-On: Remove excess dust and dirt. Spray product on clean cloth and wipe animal, being careful to treat back, withers and forelegs. To protect from face flies, apply to face and head but avoid contact with eyes.

For clean-up of severe insect infestation, dilute at a rate of 1 part concentrate in 100 parts water (1.28 ounces per gallon) (8 teaspoons per gallon) (0.1%).

For normal infestations, dilute 1 part concentrate in 200 parts water (0.64 ounces per gallon) (4 teaspoons per gallon) (0.08%).

For maintenance use, dilute 1 part concentrate in 400 parts water (0.32 ounce per gallon) (2 teaspoons per gallon) (0.025%).

LIVESTOCK SPRAY: DAIRY AND BEEF CATTLE, SHEEP, GOATS, SWINE, HORSES AND POUlTRY
FOR DAIRY CATTLE: Spray lactating dairy cows only after milking is complete.

FOR SWINE: Do not ship animals for slaughter within 5 days of last treatment.

TO CONTROL Horn Flies, House Flies, Mosquitoes and Gnats: Apply to wet the hair thoroughly, paying particular attention to topline, underline, flanks, withers and other infested areas. Repeat treatment at intervals of 6 to 12 days for small insect populations or as needed when flies are emerging in large numbers.

TO CONTROL Stable Flies, Horse Flies and Deer Flies: Apply a quart per adult animal to wet the hair thoroughly, paying particular attention to the legs, flanks, barrel, topline and other body areas commonly attacked by these flies. Repeat daily as needed.

TO CONTROL Face Flies: Apply using sprayer which produces large wetting droplets. Apply to the face of the animal in the morning before releasing to pasture. Apply sufficiently to wet the face, but not more than 1 1/2 ounces per animal. Repeat daily as needed.

---
TO CONTROL Poultry Lice: Spray roosts, walls and nests or cages thoroughly, followed by spraying over the birds with a fine mist.

TO CONTROL Bedbugs and Mites (including Northern Fowl Mites) in Poultry Houses: Spray crevices of roost poles, cracks in walls and cracks in nests where bedbugs and mites hide. Spray birds with a fine mist, paying particular attention to vents. Use at the rate of 1 gallon of spray per 100 birds.

TO CONTROL Sheep "Tick" or Red: Thoroughly wet all portions of the body by dipping or spraying with sufficient pressure and with a nozzle adjustment to give penetration of the wool. Treat at a rate sufficient to wet the animal.

TO CONTROL Fleas, Ticks, Lice and Mange Mites (adults and larvae) on Dogs and Livestock: Thoroughly wet the animal by dipping, spraying or spraying. Allow animal to dry in a warm place without rinsing or towel drying. Gives long-lasting protection against reinfection. Repeat applications at intervals of 2 to 3 weeks. DO NOT TREAT PUPPIES LESS THAN TWELVE WEEKS OLD.

Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

Consult a veterinarian before using this product on debilitated, aged, medicaled, pregnant or nursing animals.

TO CONTROL Fleas, Flies, Ticks, Lice and Mange Mites (adults and larvae) in kennels, dog houses, runs and yards: Thoroughly wet pest breeding or resting area to runoff. Most efficient pest control is accomplished when heavy pressure and good contact is achieved. Timing and frequency of application should be based on pest populations reaching nuisance levels, but accompanying manure removal and sanitation practices should precede spraying. Do not spray feed, food or water. Repeat as needed, but not more often than once every 2 weeks.

IN CATTLE BARNS, HORSE BARNs, SWINE HOUSES, KENNELS, MILKING PARLORS, MILK ROOMS, DAIRIES AND POULTRY HOUSES:

TO CONTROL Flies, Mosquitoes, Mealworms, Darkling Beetles and Gnats:

For initial clean-up of severe insect infestation, dilute at a rate of 1 part concentrate in 100 parts water (1.28 ounces per gallon) (8 teaspoons per gallon) (0.1%).

For normal infestations, dilute 1 part concentrate in 200 parts water (0.64 ounces per gallon) (4 teaspoons per gallon) (0.5%).

For maintenance use, dilute 1 part concentrate in 400 parts water (0.32 ounces per gallon) (2 teaspoons per gallon) (0.025%).

Apply as a fog or fine mist, directing the spray toward the ceiling and upper corners until the area is filled with mist. Use about 2 ounces per 1,000 cubic feet of space. For best results, close doors and windows before spraying and keep closed for 10 to 15 minutes. Vacate the treated area and ventilate before reoccupying.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store upright at room temperature. Avoid exposure to extreme temperatures. Always store pesticides in the original container. Store away from food, pet food, feed, seed, fertilizers, and veterinary supplies. Place liquid formulations on lower shelves and dry formulations above.

PESTICIDE DISPOSAL: To avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

CONTAINER HANDLING: Nonrefillable container. Do not reseal or refill this container. Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¾ full with water and recap. Shake for 10 seconds. Pour rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available, or puncture and dispose of in a sanitary landfill or by incineration. Do not burn unless allowed by state and local ordinances.
