It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

NOTE: This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the required level of available chlorine.

DIRECTIONS FOR USE

RESTAURANTS AND TAVERNS - All equipment, utensils, etc. to be sanitized must first be pre-soaked or pre-flushed, or if necessary pre-soaked in order to remove gross food particles, soil or other organic substances. A thorough washing with a compatible detergent is recommended, followed by portable water rinse prior to sanitization. Use 200 ppm solution for two minutes. After washing with dishwashing detergent and rinsing with potable water, immerse utensils in 200 ppm solution of HALT for at least 2 minutes. Allow utensils to air dry.

MACHINE DETERGENT TANKS AND RINSE TERMINAL, RINSE SANITATION - As a terminal sanitizing rinse for prechilled food utensils, adjust automatic dispensing equipment to provide a use solution of 150 to 200 ppm available chlorine according to requirements of Public Health Authorities. Use solution should be tested frequently with a suitable chlorine test kit to assure that the residual strength does not fall below 50 ppm. In the absence of a test kit a starting concentration of 200 ppm should be used. See Table of Proportions.

SANITIZATION OF NONPOROUS FOOD CONTACT SURFACES - RINSE METHOD: A solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solutions containing an initial concentration of 100 ppm available chlorine must be tested and adjusted periodically to insure that the available chlorine does not drop below 50 ppm. See table of proportions and prepare a 100 ppm solution. If no test kit is available, see Table of proportions and prepare a sanitizing solution to provide approximately 200 ppm available chlorine by weight. Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces thoroughly with the sanitizing solution, maintaining contact with the sanitizing solution for at least 1 minute. If solution contains less than 50 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient product to increase it to 200 ppm residual. Do not rinse equipment with water after treatment and do not store equipment overnight. Sanitizers used in automated systems may be used for general cleaning but may not be reused for sanitizing purposes.

STORAGE AND DISPOSAL

Do not contaminate water, food, feed or living things with disposal, disposal of equipment, or by storage, disposal or cleaning of equipment.

HALT STORAGE: Store this product in a cool dry area, away from direct sunlight, and do not allow contamination. In case of spill, flood areas with large quantities of water. Product or residue that cannot be washed should be diluted with water before disposal in a sanitary sewer, in accordance with state and local regulations.

HALT DISPOSAL: To avoid waste, use all material in the container by application according to label directions. If waste cannot be avoided, after removing product to a waste disposal facility or pesticide disposal program (where such programs are not already in use) and follow all state and local regulations.

CONSUMER HANDLING: NONFLAMMABLE CONTAINER DO NOT EXPOSE TO FIRE, STORE IN A COOL, DRY PLACE.

*NOTE: Never mix this product in a mixing or storage tank or storage area.

CONSUMER HANDLING: NONFLAMMABLE CONTAINER DO NOT EXPOSE TO FIRE, STORE IN A COOL, DRY PLACE.

*NOTE: Never mix this product in a mixing or storage tank or storage area.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:
DANGER: Corrosive, may cause severe skin and eye irritation or chemical burns to broken skin. Causes eye irritation. Do not get in eyes, on skin or clothing. Wear safety glasses or goggles and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse. Avoid breathing vapors. Wash poorly ventilated areas as soon as possible. Do not return until others have dispersed.

PHYSICAL AND CHEMICAL HAZARDS:
Strong stabilizing agent: mix only with water according to label directions. Mixing this product with chemicals (e.g., ammonia, acids, detergents, etc.) or organic matter (e.g., foodstuffs, etc.) will release chlorine gas irritating to eyes, lungs and mucous membranes.

ENVIRONMENTAL HAZARDS:
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting agency has been notified in writing prior to the discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional office of the EPA.

State and Local Regulations: Consult your dealer, state or local health authorities for additional information.

Do not apply this product through any type of irrigation system.
