EPA Est. No.: 70909-CT-001

Net Contents: 4 (22 oz per candle)

Manufactured by:
BioSensory, Inc.
107 Providence Street
Putnam, CT 06260

DIRECTIONS FOR USE
It is violation of Federal law to use this product in a manner inconsistent with its labeling.

For outdoor use or for use in semi-enclosed areas such as porches and patios:
Place candle around perimeter of the area to be protected. Use 4 candles – 7oz per candle, per 50 square feet. Place candle on a heat-resistant surface, away from anything flammable, and out of reach of children and pets. Keep wick trimmed to 1/4 inch (6mm) at all times. Container may become hot; handle carefully. Do not blow out or extinguish with water, smother flame to extinguish. Never leave a burning candle unattended.

For maximum protection, light candle and allow a molten pool of wax to fully form around the wick, approximately 10 to 15 minutes. Mosquitoes are disoriented by the inhibitor plume produced by the candles. If you can smell the fragrance from the candle, you are in the inhibitor plume.

Storage: Store in original container in a cool, dry place.
Disposal: Do not reuse this container. Place in trash or offer to Recycling if available.
