DIRECTIONS FOR USE – Non-Commercial

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Application Directions – Non-Commercial

Domestic Lawns and Ornamental Gardens: Thoroughly soak moss with solution, applying 12 to 25 gallons per 1000 square feet (500 to 1000 gallons per acre). For thick moss (greater than 1 inch thick), use up to 50 gallons per 1000 square feet.

Follow Up On Domestic Lawns & Ornamental Gardens: Lightly rinse treated areas with water (1 gallon per 1000 square feet) 15 to 30 minutes after treatment to avoid grass and plant damage. Test spray a small area prior to use. Do not heavily irrigate for at least 6 hours. Reapply every 2 weeks or as needed. If it rains within one day of treatment, an additional application may be required. Moss will turn brown after a few days. For best results, physically remove dead moss one week after treatment. Areas can be re-cut 5 days after treatment.

Other Sites: Apply 8 to 12 gallons of solution per 1000 square feet. For thick moss (greater than 1 inch), use 25 gallons of solution per 1000 square feet. If moss is dry, thoroughly wet moss with water before braiding. Repeat treatment annually or when new moss or algae are visible.

FIRST AID

IF IN EYES
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or going for treatment.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING: Causes substantial but temporary eye injury. Causes skin irritation. Do not get in eyes, on skin or on clothing. Wear protective eyewear (goggles, face shield or safety glasses). Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS
This product may be hazardous to aquatic invertebrates. Do not apply directly to water. Do not contaminate water when disposing of equipment washwater or rinse.

Methods of Application: Apply with any standard hand-held sprayer, backpack sprayer, tank sprayer, mop, watering can or brush. Keep sprayer moving to get an even application. In areas of hard water, use water softeners.

PESTS: MOSS MAX Concentrate is effective in controlling mosses, algae, lichens, and lichens.

Other Sites: MOSS MAX Concentrate may be used around and on homes and other buildings, and home greenhouses. It may be used on mats, Cedar shakes and compositions shingles, Cedar siding, slates, Cedar, redwood and CCA-treated wood decks and fences, brick, stone and concrete walkways, sidewalks and driveways, growing containers, other structural surfaces, hardened bark of trees, bark mulch, pavement, gravel, patios, asphalt, automobile exteriors, and the exteriors of motor homes and boats.

WHEN TO USE: MOSS MAX Concentrate can be used any time during the year. Best results are obtained with actively growing moss in the spring or fall. Do not use on lawns when temperature exceeds 95°F. During warmer weather apply late in the day. Application during cold weather may delay appearance of moss damage.

STORAGE AND DISPOSAL

STORAGE: Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals. Store unused material tightly closed in original container only, away from open flame. Do not store at temperatures below 32°F.

CONTAINER DISPOSAL:
If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partially filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

Hose-End Sprayer Directions
Follow the directions for using the Hose-End sprayer

How to use hose-end sprayer:
1. Remove the closure and save it for resealing the container when you are finished.
2. Insert the dip tube of the hose-end applicator into the bottle and seal the applicator head tightly to the bottle.
3. Connect spray nozzle to garden hose.
4. Turn on the water from the faucet.
5. When you are ready to spray, turn the blue knob on top so that it points to the MIX position on the spray head.
6. The spray deflector on the front of the hose-end applicator can be rotated to give a stream or fan spray.
7. When treating lawns, wait 15 to 30 minutes after spraying, and then thoroughly rinse treated areas with water by using the H2O setting on the sprayer. This will reduce the likelihood of grass damage. Roofs and walls do not require rinsing.

To stop spraying:
1. When you are finished spraying or if you have to stop spraying at any time, turn the blue knob back to the OFF position.
2. Turn off the water from the faucet.
3. Turn the blue knob to H2O then OFF, to drain the water from the hose.
4. Unscrew spray nozzle from hose. Remove hose-end from container.
5. Reseal the container with the child-resistant closure. Rinse the hose-end applicator.

HOW TO USE:
Hose End Sprayer
Shake before using.

1. Attach garden hose to spray nozzle. Turn on water supply

2. Bend safety tab down and turn control to "water"

3. Point nozzle toward plants and turn water control knob to "On". Product will automatically mix with water. Spray upper and lower leaf surfaces thoroughly.
