FABRISTAT is based on a highly active mixture of three Twin Chain quaternary ammonium compounds. Soiled and contaminated fabrics such as diapers, hospital and institutional linen, and athletic apparel is of major housekeeping concern, not only in hospitals, but in institutions, hotels, restaurants and schools. Used as directed, FABRISTAT provides effective residual bacteriostatic and self-sanitizing properties for laundered items such as diapers, hospital and institutional linens, and athletic apparel. For residual bacteriostatic or self-sanitizing activity, conditions of high relative humidity or wet contamination are required. FABRISTAT is designed for commercial and institutional laundry use by addition to the final rinse step. Laundered fabric may also be treated by soaking in a solution of FABRISTAT. For recommended solution concentration see “Directions for Use”. FABRISTAT is economical to use because it is concentrated. It should be handled with care.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For residual bacteriostatic activity against gram negative and/or gram positive odor-causing bacteria, or residual self-sanitizing activity against Klebsiella pneumoniae, aberrant, ATCC No. 4352 and Staphylococcus aureus, ATCC No. 6538, use Fabristat as directed:

COMMERCIAL AND INSTITUTIONAL LAUNDRY USE
Initial Treatment: Use 0.56 oz. (3.5 teaspoons) of Fabristat per a maximum total of 60 gallons (500 lbs.) of water and a maximum of 100 lbs. of fabric (dry weight). Dilute the appropriate amount of FABRISTAT in one to two gallons of water and then add this solution to the wash wheel at the beginning of the final rinse cycle. A minimum rinse cycle time of 8 minutes is required.
Repeat Treatment: Follow initial Treatment directions and re-treat fabric after each washing (if odor persists).

PREVENTION AGAINST MILDEW BY SOAKING: Use 0.56 oz. (3.5 teaspoons) of Fabristat per a maximum total of 60 gallons (500 lbs.) of water and a maximum of 100 lbs. of fabric (dry weight). A minimum soaking time of 8 minutes is required. FABRISTAT is effective in all water temperatures.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER. Corrosive. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin, or on clothing. Wear protective eyewear (goggles, face shield or safety glasses) protective clothing and protective gloves (rubber or chemical resistant). May be fatal if swallowed or inhaled. Do not breathe vapor. Wear a MSHA/NIOSH-approved dust/mist filter respirator number TC-21C or NIOSH approved respirator with any N, R, P, or H filter. Harmful if absorbed through the skin. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco.

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferable by mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsion may be needed.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. Pesticide Storage: Do not store on site. Avoid creasing or impacting of sidewalls. Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray or mixture of rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of way of smoke.
