FABRISTAT is based on a highly active mixture of three Twin Chain Quaternary ammonium compounds. Soiled and contaminated fabrics such as diapers, hospital and institutional linen, and athletic apparel is of major housekeeping concern, not only in hospitals, but in institutions, hotels, restaurants and schools. Used as directed, FABRISTAT provides effective residual bacteriostatic and self-sanitizing properties for laundered items such as diapers, hospital and institutional linen, and athletic apparel. For residual bacteriostatic or self-sanitizing activity, conditions of high relative humidity or wet contamination are required. FABRISTAT is designed for commercial and institutional laundry use by addition to the final rinse step. Laundered fabric may also be treated by soaking in a solution of FABRISTAT. For recommended solution concentration see "Directions for Use". FABRISTAT is economical to use because it is concentrated. It should be handled with care.

DIRECTIONS FOR USE
Is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For residual bacteriostatic activity against gram negative or gram positive odor-causing bacteria, or residual self-sanitizing activity against Klebsiella pneumoniae, aberrant ATCC No. 4352 and spatifilous aureus, ATCC No. 6538, use FABRISTAT as directed.

COMMERCIAL AND INSTITUTIONAL LAUNDRY USE
Initial Treatment: Use 0.6 oz. (3.5 teaspoons) of FABRISTAT per a maximum total volume of 50 gallons (500 lbs.) of water and a maximum of 100 lbs. of fabric weight. Dilute the appropriate amount of FABRISTAT in one to two solutions of water and then add to the wash wheel at the beginning of the final rinse cycle. A minimum rinse cycle time of 8 minutes is required.

Repeat Treatment: Follow Initial Treatment directions and re-treat fabric after washing (or if odor persists).

RESERVATION AGAINST MILDNESS BY SOAKING: Use 0.6 oz. (3.5 teaspoons) of FABRISTAT per a maximum total volume of 60 gallons (500 lbs.) of water at a maximum of 100 lbs. of fabric (dry weight). A minimum soaking time of 8 minutes is required. FABRISTAT is effective in all water temperatures.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish. Do not discharge effluent containing this product to lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority in guidance, contact your State Water Board or Regional Office of the EPA.

FABRISTAT
TWIN-CHAIN QUATERNARY AMMONIUM COMPOUND CONCENTRATE
RESIDUAL BACTERICIDAL AND SELF-SANITIZING AGENT
UNDER HUMID OR WET CONTAMINATION CONDITIONS

ACTIVE INGREDIENTS:
Octyl dimethyl ammonium chloride 26.0%
Diacetyl dimethyl ammonium chloride 10.0%
Didecyl dimethyl ammonium chloride 10.0%
OTHER INGREDIENTS: 60.0%
TOTAL: 100.0%

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER. Corrosive. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin, or on clothing. Wear protective eyewear, face shield, or safety glasses. Protective clothing (gloves, boots, or chemical resistant). May be fatal if swallowed. Wash a MSH-NIOSH-approved dustmask filtering respirator number TC-21C or NIOSH approved respirator with any R, P, or HE filter. Harmful if absorbed through the skin. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco.

FIRST AID
If IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person slip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment. NOTE TO DOCTOR: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression, and convulsions may be needed.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. PESTICIDE STORAGE: Open dumping is prohibited. Store in original container in a secure area inaccessible to children.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticides, spray or mixture of residue is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Triple rinse as follows: Fill container ¾ full with water and reinsert the container. Agitate vigorously, and dispose of rinsates consistent with pesticide disposal instructions. Repeat two more times. Then offer for recycling if available or puncture and dispose in sanitary landfill or by other procedures approved by state and local authorities. Follow pesticide disposal instructions for rinsates. Do not re-use rinsates, these containers are acute hazardous wastes and must be disposed in accordance with local, state, and federal regulations.
