FIRST AID
If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
FOR EMERGENCY MEDICAL INFORMATION, CALL 1-800-328-0026.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish. Do not discharge effluent containing this product into canals, ditches, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit issued by the appropriate authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previous notification to the appropriate sewerage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water when disposing of equipment washwaters.

Incompatible with: Spills or Leaks: Wear goggles, rubber gloves, and protective clothing. Absorb spills and leaks with inert material such as sand, clay or vermiculite. Shovel into a sealable container and dispose of in an authorized EPA disposal facility.

In Case of Fire: Use water, carbon dioxide, dry chemical (e.g. Sodium bicarbonate) extinguishing media. Fire fighters should be equipped with self-contained breathing apparatus and turnout gear.

ACTIVE INGREDIENT: Glutaraldehyde.................................................. 15.0%
INERT INGREDIENTS: ........................................................... 85.0%
TOTAL.......................................................... 100.0%

KEEP OUT OF REACH OF CHILDREN
DANGER

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CORROSIVE. Causes irreversible eye damage. Causes skin irritation. Harmful if inhaled, swallowed or absorbed through the skin. Avoid contact with skin, eyes or mouth.

HAZARDS TO DOMESTIC ANIMALS
Not for use near pet drinking water supplies.

HAZARDS TO DOMESTIC AND WILD ANIMALS
Do not contaminate water sources.

HAZARDS TO ENVIRONMENTAL WILDLIFE
Do not contaminate water sources.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: WCS 215 solutions are corrosive to many commonly used materials of construction such as steel, galvanized iron, aluminum, tin and zinc. These solutions can be stored and handled in baked phenolic lined steel, stainless steel or reinforced epoxy equipment. The product freezes at approximately -25°C (-13°F). Therefore, unless the storage tank is inside or underground, heating and insulation may be required. If heating is needed, exposure to high temperatures should be avoided. For short storage (1 month) temperatures up to 100°F (37°C) can be tolerated; however, the preferred maximum storage temperature is approximately 90°F (32°C). Keep away from fire and open flames. A stainless steel centrifugal pump is suggested for transfer service.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or residue is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or your Environmental Control Authority, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or, if allowed, by state and local authorities, by burning. Do not place in streams, ditches, canals or ditches.

Waste Disposal: EPA Reg. No.: 1677-205
Superscript refers to first letter of date code.

WCS 215
COMMERCIAL MICROBIocide
FOR USE IN SUGAR BEET MILLS AND PROCESS WATER SYSTEMS; PAPER MILLS AND ASSOCIATED PROCESS WATER SYSTEMS; PIGMENTS AND FILLER SLURRIES FOR FOOD AND NON-FOOD CONTACT PAPER AND PAPERBOARD; AIR WASHERS AND INDUSTRIAL SCRUBBING SYSTEMS; RECYCLATING COOLING AND PROCESS WATER SYSTEMS; REVERSE OSMOSIS MEMBRANES; HEAT TRANSFER SYSTEMS; SERVICE WATER AND AUXILIARY SYSTEMS; INDUSTRIAL WASTEWATER SYSTEMS INCLUDING WASTEWATER SLUDGE AND HOLDING TANKS.

NOTICE TO USER
This product is a pesticide. All material, including labels, is for use by responsible persons in the manner prescribed. This product is not for sale to minors.

BATCH NUMBER:
Item Code: 84338
CONTAINER SIZE: 55 GALLONS/208 LITERS
NET CONTENTS: 504 lb/229.1 kg

Manufactured by
Ecobal Inc., Water Care Services
370 Wabasha Street North
St. Paul, MN 55102
Made in U.S.A.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL USE DIRECTIONS
Add WCS 215 at a point of uniform mixing where the treated water will be circulated or mixed through the system. Badly fouled systems should be cleaned before treatment begins. WCS 215 can be applied either intermittently (slug dose) or by continuous feed where stated. Where appropriate, feed points should be cleaned with a short line to the delivery source.

AIR WASHERS AND INDUSTRIAL SCRUBBING SYSTEMS, RECYCLATING COOLING AND PROCESS WATER SYSTEMS
Use only in industrial washer or scrubber systems where high flow rates are encountered. WCS 215 is not recommended for use as a final cleaning agent. WCS 215 may be applied intermittently (slug dose) or by continuous feed where stated. Where appropriate, feed points should be cleaned with a short line to the delivery source.

REVERSE OSMOSIS MEMBRANES
Use only where approved for compatibility by the membrane manufacturer. No additional pre-treatment is required for membranes in a tank containing 6.5 to 66.0 gpm (pct) of WCS 215 for up to 24 hours. WCS 215 can also be added in-line to reverse osmosis systems if installed out of service osmosis equipment. Add 3 to 6 gpm (pct) of WCS 215 to the tank on the circulating system and maintain this concentration by periodic addition to counteract any system leakage. Flush the system through with clean water before returning to service.

HEAT TRANSFER SYSTEMS

SUGAR BEET MILLS AND PROCESS WATER SYSTEMS
Apply by intermittent or continuous feed methods. Repeat intermittent dose until complete treatment is achieved. The total should not exceed 0.5 to 1.0 gpm (pct) of water on treatment.

SUGAR BEET MILLS AND PROCESS WATER SYSTEMS
Apply by intermittent or continuous feed methods. Do not expose the system to water for more than 24 hours. Apply 0.5 to 1.0 gpm (pct) of WCS 215 for 24 hours in all water systems. Keep water chemistry within manufacturer’s recommendations.

PAPER MILLS AND ASSOCIATED PROCESS WATER SYSTEMS
Apply by intermittent or continuous feed methods. Add 3 to 6 gpm (pct) of water to the water in the system at a time. Do not allow WCS 215 to remain with the water for more than 24 hours. Apply 0.5 to 1.0 gpm (pct) of water to the water in the system at a time. Do not allow WCS 215 to remain with the water for more than 24 hours.

HYDROTREATING
Use for in line pipelines, valves, pumps and vessels. Water used to hydrotreat pipelines or vessels should contain 333 to 1333 ppm (0.3 to 3.3 g/l) per 1000 gals of water of WCS 215, depending on water quality, pH, environmental conditions and the length of time the equipment will remain off. At neutral pH and below, treated water can remain in the system for more than 1 year.

APPLICATION CONDITIONS
The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all inherently associated with the use of this product. Ingestion of or contact with this product may result in some unavoidable risks. Consequently, care must be taken to avoid the unnecessary risks. Ingestion of this product may cause adverse health effects in some cases. The manufacturer requires that all persons who handle this product wear protective clothing and follow all recommendations in the label. Ingestion of this product may cause adverse health effects in some cases.
