PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Personal Protective Equipment (PPE): Mixers, loaders and other handlers must wear:
- Long-sleeved shirt and long pants
- Chemical-resistant gloves (such as natural rubber, PPE selection category A)
- Shoes plus socks

Applicators must wear:
- Long-sleeved shirt and long pants
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions are available, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations
Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside.
- Wash thoroughly and change into clean clothing.
- Remove Personal Protective Equipment immediately after handling this product.
- Wash the outside of shoes before removing.
- As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and aquatic invertebrates. Avoid contamination of surface water through runoff or spray drift. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwater.

SURFACE WATER ADVISORY
This product may contaminate water through runoff or through drift of spray in wind. Potentially draining soils and soils with shallow water tables are more prone to produce runoff that contains this product. A level, well maintained vegetative filter strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential for contamination of water from runoff. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

FIRST AID

If Inhaled
- Move persons to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration.
- Call a poison control center or doctor for further treatment advice.

If Swallowed
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to Swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If on Skin or clothing
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 to 30 minutes.
- Call a poison control center or doctor for treatment advice.

Note To Physician: No specific antidote is known. Treat symptomatically.

Have a product container or label with you when calling a poison control center or doctor or going for treatment.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

IMPORTANT: Read entire label and Conditions of Sale before using this product.
### PESTS CONTROLLED AND USE RATE

### WHERE TO APPLY
- To shrubs, trees (including non-bearing fruit and nut trees), flowers and foliage plants in greenhouses, agricultural and container nurseries.
- Apply to the foliage of all plants in food and container nurseries.
- Apply to the foliage of all plants in food and container nurseries.

### HOW TO APPLY
- Apply at 4 fl oz. rate. For best results, apply to the foliage of all plants in food and container nurseries.
- Apply at 4 fl oz. rate. For best results, apply to the foliage of all plants in food and container nurseries.
- Apply at 4 fl oz. rate. For best results, apply to the foliage of all plants in food and container nurseries.
- Apply at 4 fl oz. rate. For best results, apply to the foliage of all plants in food and container nurseries.

### HOW TO APPLY (continued)
- For maximum efficacy against adult whiteflies, use the 4 fl oz. rate. For best results, apply at the foliage of all plants in food and container nurseries.
- Rate range is provided and is generally dependent on the growth stage of the plant and the density of the foliage. Apply at the foliage of all plants in food and container nurseries.
- Rate range is provided and is generally dependent on the growth stage of the plant and the density of the foliage. Apply at the foliage of all plants in food and container nurseries.
- Rate range is provided and is generally dependent on the growth stage of the plant and the density of the foliage. Apply at the foliage of all plants in food and container nurseries.

### AGRICULTURAL USE REQUIREMENTS
- Use this product only in accordance with its labeling and the Worker Protection Standard, 40 CFR part 170.
- This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equip-ment (PPE) and restricted-entry interval. These regulations in this box only apply to uses of this product that are covered by the Worker Protection Standard.
- Do not enter or allow entry into tan tram areas during the restricted entry interval (REI) of 12 hours following application. If PPE required for early entry to treated areas that are permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, use:
  - Coveralls worn over or overalls worn over long pants and short sleeves
  - Chemical resistant gloves (such as natural rubber, latex, or neoprene)
  - Gloves plus socks
RESISTANCE MANAGEMENT
- JUD0 contains an active ingredient with a novel mode of action. Studies to determine cross-resistance with JUD0 linked to other commercial insecticides have demonstrated no cross-resistance. However, repeated use of any plant protection product may increase the development of resistant strains of pests, including insects and mites.
- Using JUD0 in consecutive application cycles during the same growing season is not recommended.
- Use JUD0 as part of a sound resistance management program that includes rotation with other treatments with different modes of action.

PLANT TOLERANCE
- JUD0 has been evaluated for phytotoxicity on a wide range of ornamental plants. However, due to the large number of species and varieties of ornamental plants, it is impossible to test every one for tolerance to JUD0. The professional user should determine if JUD0 could be used safely prior to commercial use. In a small area, test the recommended rates on a small number of plants for phytotoxicity prior to widespread use.
- Before using JUD0 in tank mixes with other products and adjuvants, test the mixture on a small number of plants for phytotoxicity prior to widespread use.
- Do not use JUD0 on geraniums (Pelargonium spp.), Pachysandra, Phlox, and "Glassy" Atriplexes, or "Upright" varieties of rose.
- Insufficient information on tolerance is available for the following ornamentals: Hydrangea, iris, Kalanchoe, Verbena, and Ageratum.
- Do not use JUD0 on plants that are susceptible to phytotoxicity such as roses, hydrangeas, and irises.
- It is recommended that JUD0 not be used on these plants.

ENDANGERED SPECIES
- The use of any pesticide in a manner that may kill or otherwise harm endangered species or adversely modify their habitat is a violation of Federal law.

RESTRICTIONS
- Do not use through irrigation systems.
- Do not use on vegetables growing in water or submerged in water.
- Do not use on plants intended for use as food or feed.
- Do not use on ornamental plants that are eaten by birds.
- Do not use on ornamental plants that are eaten by birds.

PACKAGE HANDLING
- JUD0 is packaged in polyethylene containers. Do not allow pesticide or containers to freeze.

ENDANGERED SPECIES
- The use of any pesticide in a manner that may kill or otherwise harm endangered species or adversely modify their habitat is a violation of Federal law.

COMPATIBILITY / MIXING / ORDER-OF-MIXING
- JUD0 is physically and biologically compatible with many registered pesticides and fertilizers or micronutrients. When considering mixing JUD0 with other pesticides, or other products, contact a local certified applicator for advice. For further information, contact your local CHS, Inc. representative. If you supplier and CHS, Inc. representative have no experience with the combination you are considering, you should conduct a test to determine physical compatibility. To determine physical compatibility, add the recommended proportions of each chemical with the same proportion of water as will be present in the chemical solution tank, into a suitable container, mix thoroughly and allow to stand for five minutes. If the combination remains mixed, or can be readily re-mixed, the mixture is considered physically compatible.
- JUD0 may be used with other recommended pesticides, fertilizers and micronutrients. The proper mixing procedure for JUD0 alone or in tank mixes with other pesticides is:

1) Fill the spray tank 1/4 to 1/3 full with clean water.
2) While recirculating and with the agitator running, add any products in PAB bags (See Notes). Allow time for thorough mixing.
3) Continue to fill spray tank with water until 1/2 full.
4) Add any other water-soluble powder (WP) or wettable granules (WG) products.
5) Add the required amount of JUD0, and any other "Flowable" (F, or SC) type products.
6) Allow enough time for thorough mixing of each product added to tank.
7) If applicable, add any remaining tank mix components: emulsifiable concentrates (EC), fertilizers and micronutrients.
8) Fill spray tank to desired level and maintain constant agitation to ensure uniformity of spray mixture.

- Mix pesticides in areas prone to runoff such as concrete mixing/hosing pads, sized soil in flat terrain or gravelized mix pads, or use a suitable method to contain spills and moisture. Proper empty tanks and residue containers in a safe use.
STORAGE AND DISPOSAL (continued)

CONTAINER DISPOSAL
- Non-refillable container. Do not reuse or refill this container. Triple rinse container or equivalently, after emptying, triple rinse as follows: Empty the remaining contents into an application equipment or a mix tank and drive for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour residue into an application equipment or a mix tank or store residue for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available or recycling program; or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. If burned, stay out of smoke.

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Cautions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once.

By using this product, user or buyer accepts the following Conditions. Disclaimer of Warranties and Limitations of Liability.

CONDITIONS: The directions for use of this product are believed to be adequate and must be followed carefully.
