# Bug Bait

**Fast, effective control of slugs, snails and listed insects.**

**Ideal for use around listed fruit and vegetables.**

## Product Information

**Deadline®** Bug Bait is a concentrate containing methomyl, a systemic, contact and fumigant insecticide. It is effective against slugs, snails, earwigs, mites, aphids, and a broad spectrum of other insects. **Deadline®** Bug Bait is perfect for use in gardens, kitchens, greenhouses, and other locations where pests are a concern.

**Directions for Use:**

1. Dilute the concentrate according to the label instructions.
2. Apply the bait around the base of plants or in areas where pests are present.
3. Keep the bait out of reach of children and pets.

**Application Method:**

Apply the product according to the label instructions. For best results, apply when pests are active but before other treatments are applied. For additional protection, apply several times throughout the season or growing period.

**Storage:**

Store the concentrate in a cool, dry place out of reach of children and pets.
